The Street Sweeper Elliot Perlman, 2012 'Excellent... Harrowing, humane and brilliant.' - The Times (UK) How breathtakingly close we are to lives that at first seem so far away. From the civil rights struggle in the United States to the Nazi crimes against humanity in Europe, there are more stories than people passing each other every day on the bustling streets of every crowded city. Only some survive to become history. Recently released from prison, Lamont Williams, an African American probationary janitor in a Manhattan hospital and father of a little girl he can't locate, strikes up an unlikely friendship with an elderly patient, a Holocaust survivor who had been a prisoner in Auschwitz-Birkenau. A few kilometres uptown, Australian historian Adam Zignelik, an untenured Columbia professor, finds both his career and his long-term romantic relationship falling apart. Emerging out of the depths of his own personal history, Adam sees, in a promising research topic suggested by an American World War II veteran, the beginnings of something that might just save him professionally and perhaps even personally. As these two men try to survive in early twenty-first-century New York, hi

Urban Sediment Removal Robert Brinkmann, Graham A. Tobin, 2012-12-06 There is not an extensive literature on street sweeping. Much of the research that has been completed exists in the gray area of technical reports and government documents. Furthermore, a great deal of this research is locally based, and has not been widely published. Indeed, our review of the scientific literature, revealed that, while storm water quality has received a lot of attention, few academicians have been involved in street sweeping research per se. Thus, throughout our research into street we sweeper effectiveness, sweeping protocols, and sweeping practices, wished that there had been a book

summarizing some of the important issues associated with street sweeping. As our frustration grew, we realized that we were uniquely poised to write such a book as our research had encompassed a variety of different projects including sweeper testing, waste management, and related storm water quality. Also, early on in this exercise, we recognized that there was a growing demand for information about street sweeping policies and management, especially for studies focusing on the effectiveness of different sweeping schedules, on waste management operations, and on non-point, pollution reduction practices associated with storm water runoff. It was abundantly clear that there was a profound lack of research on street sweeping that could assist with developing local, regional, or national policies. There was, in effect, little guidance for city managers on these issues.
