Modelling a German 15cm sIG33 Sturmpanzerabwehrkanone 33B Gary Edmundson, 2012-06-20 The 'Bison' and Grille' are today's commonly used names for the German self-propelled 15cm schwere Panzerabwehrkanone 33 (sIG33) vehicles of World War II. The sIG33 was the most powerful support weapon for the German infantry at the beginning of the war, and from 1940 it was mounted on a range of tracked vehicles. This title provides a detailed, step-by-step guide to modelling a 1/35-scale German self-propelled sIG33 Vehicle. The modeller is led through the various skill levels of construction by combining existing kits with some aftermarket accessories and scratch-built items. Key aspects such as finishing techniques, including painting and displaying your model are also covered. **German Self-propelled Artillery at War 1940-1945** Ian Baxter, 2023-10-30 Despite the German Panzerwaffe's ability to engage its foes rapidly with concentrated force, additional fire power was often required to break through enemy lines. Initially this was with towed artillery but, as the war developed, converting tanks into fast-moving self-propelled artillery carrying vehicles proved far more effective. As a result a number of weapon systems came into service including the Pz.Kpfw.I and II. Other conversions followed including the Pz.Kpfw.III Wespe with its 10.5cm gun, the Pz.Kpfw.III/IV Hummel armed with a 15cm howitzer, the Sturmpanzer Brummbär with its powerful 15cm gun and the Grille series based on the Czech Pz.Kpfw 38(t) tank chassis. These and other armored vehicles were capable of providing both close fire support for infantry and acting as anti-tank weapons. This highly illustrated book describes the key role played by German self-propelled artillery from its introduction in 1940 in France, to North Africa, Italy, Russia and North-West Europe. It analyzes the development of the numerous variants that came into service as these formidable weapon systems were adapted and up-gunned to face the ever-increasing enemy threat. With rare and often published photographs this book provides a unique insight into German self-propelled artillery from its early triumphant war years to final defeat in 1945.

**Stalingrad** Ben Skipper, 2023-05-04 The very name Stalingrad has become synonymous with military folly and political arrogance. Its capture by the Wehrmacht was a crushing defeat, both militarily and politically, for the Red Army. The 6th Army was a highly experienced key element of Army Group South. In late June 1942 it rolled eastwards as part of the summer offensive to capture the vital oilfields of Baku and secure the city on the Volga that bore the name of the Soviet leader. The 6th Army was the acme of German military might and on paper it should have easily overwhelmed the defenders of Chuikov's 62nd Army. However its commander, General Friedrich Wilhelm Ernst Paulus, lacked field experience. His army would pay the price. Stalingrad was a new type of battlefield and it would test the mettle of attacker and defender to the very limit, all the while the thermometer plunged. This Battle Craft title also looks at four pieces of military hardware that were involved in these legendary battles. Innumerable T-34's, which often rolled off local assembly lines unpainted and straight into battle took on the Stug III assault gun as it supported troops fighting for mere meters of territory. Overhead, in the frigid air, deadly V, Ju87 Stuka and Yak 9s, were locked in battle for air superiority over the shattered remains of a once vibrant city. The Quartermaster section provides the modeller with an insight into the development and operational use of the four

chosen vehicles and aircraft that were involved in the Battles of El Alamein. A selection of historical and contemporary photos and illustrations feature alongside stunning showcase builds, providing the modeller with subjects to whet the creative appetite. It also features details of model kits and extras that can really help the modeller bring military history to life.

**Modelling the German 15cm sIG33 Bison and Grille** Gary Edmundson, 2012-02-20 The 'Bison' and 'Grille' are today's commonly used names for the German self-propelled 15cm schwere Infanteriegeschütz 33 (sIG 33) vehicles of World War II. The sIG 33 was the most powerful support weapon for the German infantry at the beginning of the war and from 1940 it was mounted on a range of tracked vehicles. This book demonstrates the construction of five 1/35-scale models of specific examples of the various self-propelled sIG 33 vehicles. The modeller is led through the various skill levels of construction by combining existing kits with some aftermarket accessories and scratch-built items.

**Stalingrad 1942-43 (2)** Robert Forczyk, 2021-09-16 The second in a three-part series examining the Stalingrad campaign, one of the most decisive military operations in World War II, that set the stage for the ultimate defeat of the Third Reich. By early September 1942, 6.Armee and 4.Panzer-Armee had reached the outskirts of Stalingrad, and Hitler believed it was about to fall. He ordered for the capture of the city as soon as possible, but this was easier said than done. On 13 September, a direct German assault was launched against the city on the Volga and a protracted urban battle followed amid the ruins, already devastated by massive Luftwaffe raids. Although hit hard by the initial German offensive, a ruthless and obstinate Red Army was able to hold onto the city through a costly battle of attrition that sacrificed huge amounts of men and materiel. This second volume in the Stalingrad trilogy, written by a leading expert on the military history of the Eastern Front, brings the fighting in the city to life in full visual detail, including the iconic battles at the Krasny Oktyabr Steel Plant, the Grain Elevator, the Barrikady and STZ factories, the 'Tennis Racquet' and Rynok-Spartanovka. Drawing from sources on both sides, this book offers a truly comprehensive account of history's greatest urban battle.

**Sturmgeschütze** Bob Carruthers, 2013-06-05 An overview of the Wehrmacht's little-known mobile assault guns designed to provide close infantry support against enemy field defenses in World War II. The Sturmgeschütze rumbling forward into action is one of the iconic images of World War II. As mobile assault guns, the StuGs were essentially designed as infantry support weapons, but they also proved themselves as highly effective tank destroyers. Written by Emmy Award-winning author Bob Carruthers this fascinating study encompasses the design, development and combat history of the StuG II and IV. Drawing on a variety of rare primary sources and photographs this outstanding study explains the role of the StuG in context and examines the combat records of the StuG aces such as Franz von Malachowski, and Knight's Cross holder Oberwachtmeister Hugo Primožic of Stug.Abt.667. Indispensable reading for anyone with an interest in armored warfare, this book is part of the Hitler's War Machine series, a new military history range compiled and edited by Emmy Award winning-author and historian Bob Carruthers. The series draws on primary sources and contemporary documents to provide a new insight into the true nature of Hitler's Wehrmacht.
