Wilbur Smith

Over Fields of Fire Anna Timofeeva-Egorova,2010-08-22 During the 1930s the Soviet Union launched a major effort to create a modern Air Force. That process required training tens of thousands of pilots. Among those pilots were larger numbers of young women, training shoulder to shoulder with their male counterparts. A common training program of the day involved studying in 'flying clubs' during leisure hours, first using gliders and then training planes. Following this, the best graduates could enter military schools to become professional combat pilots or flight navigators. The author of this book passed through all of those stages and had become an experienced training pilot when the USSR entered the war. Volunteering for frontline duty, the author flew 130 combat missions piloting the U2 biplane in a liaison squadron. In the initial period of the war, the German Luftwaffe dominated the sky. Daily combat sorties demanded bravery and skill from the pilots of the liaison squadron operating obsolete, unarmed planes. Over the course of a year the author was shot down by German fighters three times but kept flying nevertheless. In late 1942 Anna Egorova became the first female pilot to fly the famous Sturmovik (ground attack) plane that played a major role in the ground battles of the Eastern Front. Earning the respect of her fellow male pilots, the author became not just a mature combat pilot, but a commanding officer. Over the course of two years the author advanced from ordinary pilot to the executive officer of the Squadron, and then was appointed Regimental navigator, in the process flying approximately 270 combat missions over the southern sector of the Eastern Front initially (Taman, the Crimea) before switching to the 1st Belorussian Front, and seeing action over White Russia and Poland. Flying on a mission over Poland in 1944 the author was shot down over a target by German flak. Severely burned, she was taken prisoner. After surviving in a German POW camp for 5 months, she was liberated by Soviet troops. After experiencing numerous humiliations as an 'ex-POW' in 1965 the author finally received a top military award, a long-delayed 'Golden Star' with the honorary title of 'Hero of the Soviet Union'. This is a quite unique story of courage, determination and bravery in the face of tremendous personal adversity. The many obstacles Anna had to cross before she could fly first the Po-2, then the Sturmovik, are recounted in detail, including her tough work helping to build the Moscow Metro before the outbreak of war. Above all, *Over Fields of Fire* is a very human story - sometimes sad, sometimes angry, filled with hope, at other times with near-despair, abundant in comradeship and professionalism - and never less than a large dose of determination!

Il-2 Shturmovik Guards Units of World War 2 Oleg Rastrenin,2013-08-20 Over 43,000 Il-2/10s were built between 1941 and 1955, more than any other combat aircraft in history, making this one of the most important Soviet aircraft deployed in World War II. Built originally as a two-seater, the Il-2 had lost the rear gunner's position by the time it started to reach frontline units. Armed with ground-attack rockets, the aircraft proved deadly against Wehrmacht panzers as pairs of Il-2s roamed the frontline at low level. However, the Shturmoviks (armoured attackers) were vulnerable to attack from the rear by enemy fighters, so Ilyushin reverted to the two-seat layout in September 1942. Oleg Rastrenin provides a fascinating account of the complex development history of a plane that was crucial to Russia's defence. From Stalingrad to Kursk to Berlin, this book charts the aeroplane's vital contribution to the most famous battles of the Eastern front.

Russian Aviation, Space Flight and Visual Culture Vlad Strukov,Helena Goscilo,2016-09-13 Among the many successes of the Soviet Union were inaugural space flight—ahead of the United States—and many other triumphs related to aviation. Aviators and cosmonauts enjoyed heroic status in the Soviet Union, and provided supports of the Soviet project with iconic figures which could be used to bolster the regime's visions, self-confidence, and the image of itself as forward looking and futuristic. This book explores how the themes of aviation and space flight have been depicted in film, animation, art, architecture, and digital media. Incorporating many illustrations, the book covers a wide range of subjects, including the representations of heroes, the construction of myths, and the relationship between visual art forms and Soviet/Russian culture and society.

Kursk 1943 Anders Frankson,Niklas Zetterling,2016-12-05 The battle at Kursk in 1943 is often referred to as the greatest tank battle in the history of warfare. This volume makes extensive use of

German archival documents as well as various Russian books and articles. As well as an account of the battle, it addresses methodological issues.

Weapons and Warfare [2 volumes] Spencer C. Tucker, 2020-03-26 This work covers major weapons throughout human history, beginning with clubs and maces; through crossbows, swords, and gunpowder; up to the hypersonic railgun, lasers, and robotic weapons under development today. Weapons and Warfare is designed to provide students with a comprehensive and highly informative overview of weapons and their impact on the course of human history. In addition to providing basic factual information, this encyclopedia will delve into the greater historical context and significance of each weapon. The chronological organization by time period will enable readers to fully understand the evolution of weapons throughout history. The work begins with a foreword by a top scholar and a detailed introductory essay by the editor that provides an illuminating historical overview of weapons. It then offers entries on more than 650 individual weapons systems. Each entry has sources for further reading. The weapons are presented alphabetically within six time periods, ranging from the prehistoric and ancient periods to the contemporary period. Each period has its own introduction that treats the major trends occurring in that era. In addition, 50 sidebars offer fascinating facts on various weapons. Numerous illustrations throughout the text are also included.

Black Tulip Erik Schmidt, 2020-02-29 This myth-busting military biography reveals the true story of the legendary WWII German flying ace—and how his story was manipulated during the Cold War. Over the course of 1,404 wartime missions, Luftwaffe fighter pilot Erich Hartmann claimed a staggering 352 airborne kills. His storied career contains all the dramas you would expect: frostbitten fighter sweeps over the Eastern Front, drunken forays to Hitler's Eagle's Nest, a decade of imprisonment in the wretched Soviet POW camps, and further military service during the Cold War. Then, just as Hartmann's career was faltering, he was adopted by a network of writers and commentators deeply invested in his reputation. These men, mostly Americans, published celebratory stories about Hartmann and his elite fraternity of Luftwaffe pilots. With each dogfight tale put into print, Hartmann's legacy became loftier and more secure, and his complicated service in support of Nazism faded away. Black Tulip digs beneath this one-dimensional account of Hartmann's life, revealing a man who was neither a full-blown Nazi nor an impeccable knight.

Bear Hug J. Wes Watson, 2012-10-18 At the end of WWII the two mightiest armies in history stood on opposite sides of the Elbe River in Germany, basking in their victory over Nazi Germany. But was that shooting war truly over? Joseph Stalin could not help but notice that by the time of their August, 1944, Conference in Potsdam, that both FDR and Churchill were no longer on the world stage, replaced by a "failed haberdasher", Harry Truman, and a British Socialist, Clement Attlee. With the Allied armies depleting their European forces for the coming invasion of Japan, Stalin embarks on an ambitious plan to continue to roll westward, and complete the submission of all of Europe before the Allies can react to stop him. And with a brilliant plan he temporarily thwarts the Americans' atomic bomb capability. It becomes a race and a struggle for a hodge-podge of Allied units, commanded by personal enemies George Patton and Bernard Montgomery, as the two generals try to patch up their differences. They try everything both in, and out, of the book, including using former German enemies to try to buy enough time to halt the Soviet onslaught.

Lavochkin Fighters of the Second World War Jason Moore , 2017-03-13 The Lavochkin fighters remain little known in the West, although with the Yakovlev fighter series they were the backbone of the Red Air Force fighter force during the Second World War. The author rectifies that with this comprehensive history of these fighters. With this book he describes in great detail the three main variants of the Lavochkin fighter series during the Second World War: the only partially successful LaGG-3 inline-engined fighter, the successful radial-engined La-5 fighter, and the superb radial engined La-7 fighter, one of the best piston-engined fighter aircraft of the entire Second World War. Both the design and history of these fighters are featured, including how the mediocre inline engined LaGG-3 was turned into a top notch fighter by the replacement of the Klimov inline engine by the Shvetsov M-82 radial engine. Besides describing the wartime designs he includes a section on the postwar successors to the Second World War fighters, the completely new all metal La-9 and La-11,

which saw extensive postwar service. Accurate color profiles illustrate all variants.

Ilyushin Il-2 Yefim Gordon, Sergey Komissarov, 2010 This is the definitive history of the Ilyushin Il-2 Sturmovik and provides detailed coverage on every aspect of this famous warplane. This is perhaps the most famous aircraft in the history of Russian and Soviet aviation. During World War 2 this rugged ground attack aircraft was arguably the Soviets' most effective weapon. Protected by its heavy armor, the low-flying aircraft was incredibly difficult to shoot down, and its powerful array of weaponry included a cannon, machine guns, rockets, and special HEAT antitank bombs. It was capable of penetrating the armor of every German tank in the field at the time, including the Panther and Tiger tanks, as well as reaping destruction among the ranks of enemy infantry on the ground. The Il-2 was so successful that the design was produced in greater numbers than any other military aircraft in history, with over 40,000 being built between 1941 and 1955.

The Ethics of Playing, Researching, and Teaching Games in the Writing Classroom

Richard Colby, Matthew S.S. Johnson, Rebekah Shultz Colby, 2021-01-27 This book explores ethos and games while analyzing the ethical dimensions of playing, researching, and teaching games. Contributors, primarily from rhetoric and writing studies, connect instances of ethos and ethical practice with writing pedagogy, game studies, video games, gaming communities, gameworlds, and the gaming industry. The collection's eighteen chapters investigate game-based writing classrooms, gamification, game design, player agency, and writing and gaming scholarship in order to illuminate how ethos is reputed, interpreted, and remembered in virtual gamespaces and in the gaming industry. Ethos is constructed, invented, and created in and for games, but inevitably spills out into other domains, affecting agency, ideology, and the cultures that surround game developers, players, and scholars.

We Regret To Inform You Christopher B. Scharping, 2013-10-23 This well-researched World War II novel is based on a true story from Medina, a small town between Buffalo and Rochester, New York. A husband and wife have one son. When World War II began, the son enlisted in the US Army Air Forces as a pilot. The flight training and combat sequences are detailed and accurate. Later, the son is listed as Missing In Action along with his entire crew and the B-17 bomber they were flying as part of an 8th Air Force mission over Czechoslovakia. The father and son have been the closest of friends and the loss and lack of information is unacceptable. The father vows to find his son as soon as the war is over. The story unfolds from that point. Follow the son, Allen Stefaniak, through college, romance, flying training and off to war. The story takes place in Western New York State; Chicago; Army bases in Texas, Florida, Georgia, and Maine; in England, North Africa, Germany, Sweden, and Russia. Will the father, Stanley, be reunited with his son? What adventures and frustrations will impede the search? Come along and find out. The story is panoramic in its scope and universal in its message. Live those years of destiny again with the Stefaniak family during one of the most turbulent times in American history.

Soviet Aircraft Industry Peter G Dancey, 2017-04-22 Soviet aircraft industry was an essential part of the USSR's campaign for global dominance in the twentieth century. Thanks to the thick fog of secrecy that enveloped it throughout the Cold War, it has long inspired the fascination of analysts and enthusiasts in the West; until the collapse of the USSR in 1991, details of Soviet aircraft were often a matter of conjecture. This book aims to uncover fully the mystery surrounding this topic. Drawing on original and previously unpublished information obtained directly from the former USSR, *Soviet Aircraft Industry* examines the unique characteristics of Soviet-designed aircraft—particularly military types, which were the cause of great concern to the West. Further, by virtue of the industry's central role throughout Soviet history, this book provides a rare and important perspective into the broader theme of Russia's great communist experiment.

West Point History of World War II, Vol. 2 The United States Military Academy, 2016-11-08 The definitive, must-have military history of World War II—spanning 1942 until the end of the war—packed with the same expert analysis, exclusive tactical maps, unique graphics, and historical images used by The United States Military Academy at West Point to teach the art of war to its own cadets. Since its founding, West Point has taught its cadets the history of warfare, and since 1847 it

has done so through a singular text, *The West Point History of Warfare*. That text has been updated repeatedly, and now through a unique partnership with West Point graduates, *The West Point History of Warfare* has been completely rewritten. Volume 1 concluded with the midpoint of World War II in 1942, which is where this latest edition begins, covering all aspects of the war in chapters such as "Strategic Seapower and Airpower" by Richard J. Overy, "The Defeat of Japan" by Robert W. Love, Jr., "The Allies Turn the Tide" by Robert M. Citino, and "Occupation, Demobilization, and Assessing Victory" by Steve R. Waddell. As with previous volumes, *The West Point History of World War II*, Volume 2 boasts rich, full-color illustrations with unique tactical maps created by expert cartographers in collaboration with West Point's military historians, as well as dozens of graphics uniquely created for this volume and hundreds of historical images, many of which are from the West Point archives. Authoritative, compelling, a goldmine for history lovers, this essential resource belongs in the library of every serious student of World War II.

Ilyushin Il-2 AM-8 Maciej Noszczak, 2011-07-15 The Ilyushin Il-2 was a World War II ground-attack aircraft, produced by the Soviet Union in very large numbers. In combination with its successor, the Ilyushin Il-10, over 40,000 were built, making it the single most produced military aircraft design in all of aviation history, as well as one of the most produced piloted aircraft in history. Regarded as the best ground attack aircraft of World War II, it was a prominent aircraft for tank killing with its accuracy in dive bombing and its 37mm guns penetrating their thin back armor. To Il-2 pilots, the aircraft was simply the diminutive Ilyusha. To the soldiers on the ground, it was the Hunchback, the Flying Tank or the Flying Infantryman. The Il-2 aircraft played a crucial role on the Eastern Front, and in Soviet opinion it was the most decisive aircraft in the history of modern land warfare. Joseph Stalin said of them that They are as essential to the Red Army as air and bread. About Top DrawingsL This series of highly illustrated books present detailed scale drawings of aircraft and vehicles, with supporting color profile artwork. With detailed captions on the history, combat action and development of each machine, each volume is an exceptional reference tool for modelers.
