Deep Alberta John Acorn,2007-02-07 Alberta is well known for its fossil treasures, and author John Acorn is as keen on the long-dead creatures of Alberta as he is on the living. Here, John features 80 of the most noteworthy fossils, fossil locations, and fossil hunters from this most palaeontological of provinces. There's more to the story of deep Alberta than dinosaurs, but dinosaur fans will find all their favourite beasts here as well -- from Edmontosaurus to Tyrannosaurus rex, and everything in-between. Then there are the surprises, such as the world's oldest pike, the discovery of a venomous mammal, and the fossils found in such unlikely places as Edmonton and Calgary. Prepared with the collaboration of palaeontologists around Alberta, and the world-renowned Royal Tyrrell Museum, this is a book that is long overdue, and that deserves a place on everyone's bookshelf.

Dinosaur Systematics Kenneth Carpenter, Philip J. Currie, 1992-07-31 In recent years dinosaurs have captured the attention of the public at an unprecedented scale. At the heart of this resurgence in popular interest is an increased level of research activity, much of which is innovative in the field of palaeontology. For instance, whereas earlier palaeontological studies emphasized basic morphologic description and taxonomic classification, modern studies attempt to examine the role and nature of dinosaurs as living animals. More than ever before, we understand how these extinct species functioned, behaved, interacted with each other and the environment, and evolved. Nevertheless, these studies rely on certain basic building blocks of knowledge, including facts about dinosaur anatomy and taxonomic relationships. One of the purposes of this volume is to unravel some of the problems surrounding dinosaur systematics and to increase our understanding of dinosaurs as a biological species. *Dinosaur Systematics* presents a current overview of dinosaur systematics using various examples to explore what is a species in a dinosaur, what separates genders in dinosaurs, what morphological changes occur with maturation of a species, and what morphological variations occur within a species.
