Aeroplane: Su-22 M4 (NATO: Fitter-K) USSR Fighter-Bomber Adam Bialek,2020-10-08

Photographic documentation of the plane, with visible construction details. Album contains photos without texts. Aeroplane: Sukhoi Su-22 M4 (NATO: Fitter-K) USSR fighter-bomber Technical data Span: 10,02 m (32.8 ft) swept - 13,65 m (42.65 ft) spread Length: 62.3 ft Take-off: weight 36,155 lb Maximum speed: 1,000 kt Ceiling: 49,870 ft Range: 1,376 NM Armament two 30 mm NR-30 cannons, R-60 guided air to air missiles, Ch-25 and Ch-29 guided air to surface missiles, rocket launchers and bombs of total weight of 8,818 lb Powerplant :AL-21F-3 turbojet engine rated at 30,000 lbf with afterburner Fighter - bomber aircraft with variable wing geometry, a subsequent development version of Su-17 (export designation Su-20), equipped with more modern navigation and targeting systems. Su-17M4 (export designation Su-22M4) was the most advanced version, introduced in 1980, equipped with PrNK-54 mission system, coupled with the Orbita computer, enabling the automatic target approach and bomb release without the visual contact, and Klon laser targeting device for laser guided missiles. About 100 Su-22 were delivered to Poland during 1984 - 1985. After multiple overhauls and upgrades, these aircraft are still operated by Polish Air Force as the main type of strike aircraft.

Su-22 M4/Um3k Krzysztof Barcz,Dariusz Warszawski,2009-12-15 * Includes free decals and masking foil * Packed with photos and including three color profiles The SU-22 was designed as a high speed, medium range, low level ground attack and reconnaissance aircraft. Although its origin can be traced back to the basic SU7 aircraft of the 1950's, the design was continuously developed emerging as the variable geometry (Swing-wing 30:63) SU17 / 22, the most modern and powerful Warsaw Pact fighter bomber. The intent of the design was to have trouble free use under the most

demanding operating and environmental conditions combined with ease of maintenance. The SU22 M4 is still widely used in Europe and the Middle East, being broadly compatible to a Tornado GR1 although lacking the latter's all-weather capability. Like the Tornado it is equipped with a laser range finder designator and terrain following radar and could be equipped with bombs, guided missiles and rockets in addition to the installed twin 30mm canon for the air to surface attack role. Air-to-air threats were countered via rockets, guided missiles and canon. This is a Monograph on this supersonic fighter bomber, containing 165 photos, including numerous color photos with English/Polish photo captions, featuring external and internal views, and 3 color profiles. Includes a free decal sheet. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. Includes extra features such as decals and masking foil.

Sukhoi Su-22 Fitter Robert Pied, Nicolas Deboeck, 2022-04-05 A complete photographic portrait of the SU-22 Fitter, the export version of the Russian Su-17; Russia's first swing-wing fighter.

Aerofax: Sukhoi Su-7/17/22 Yefim Gordon, 2004-05 Thorough Aerofax-series coverage is given here to the 'Fitter' family of Soviet fighters and fighter-bombers, with masses of fresh information and images emerging from previously unseen Russian sources. The Su-7 was first flown in 1958, with deliveries to the Soviet Air Force beginning in the same year. It could be seen as the Soviet contemporary of the F-100 Super Sabre. The original high-speed, highly-maneuverable single-seat

fighter was developed in several versions and produced in large numbers for the VVS and Warsaw Pact countries during the 1960s. It was developed in the late 1960s with a completely new variable-sweep wing as the Su-17 fighter-bomber, again further modified during its long life to take on many other roles including reconnaissance, training and so on. The Su-22 was an export version of the Su-17, and the 'Fitter' family has served with many air forces in Europe, Libya, Peru, Vietnam and Syria.

Sukhoi Su-7/Su-17 E. Gordon, Yefim Gordon, Dmitriy Komissarov, 2011 Following on from the collection of successful 'Famous Russian Aircraft' titles, Yefim Gordon has teamed up with Keith Dexter and Dmitriy Komissarov to produce this insight into the Sukhoi fighter bomber family. In the early 1950s the reborn aircraft design bureau headed by Pavel O. Sukhoi started its renewed activities by creating two aircraft sharing the same fuselage design and powerplant - the delta-wing T-3 and the swept-wing S-1. The former became the progenitor of several interceptors, starting with the Su-9; the other aircraft became the Su-7 tactical fighter but soon evolved into the Su-7B fighter-bomber. Known to the West as the Fitter, the Su-7B and its improved Su-7BM and Su-7BKL versions formed the backbone of the Soviet fighter-bomber aviation. They were also exported to many friendly nations - first and foremost to some Warsaw Pact member states (Poland and Czechoslovakia), as well as to non-aligned nations like India, Algeria, Egypt, Iraq and others. The Fitter saw action in quite a few wars - the Indo-Pakistani border conflict of 1971, the Arab-Israeli wars. The initial Su-7 Fitter-A was superseded by the Su-17 which differed primarily in having variable-geometry wings. The prototype made its maiden flight in 1966; the production version completely supplanted the original Su-7 in Soviet Air Force service in the 1980s. The swing-wing Su-17 proved highly efficient in the Afghan War, earning the affection of the pilots who flew it. Its

high combat capabilities were duly recognized abroad; apart from the Warsaw Pact (Poland, Czechoslovakia, East Germany, Hungary and Bulgaria), the Su-20 and Su-22 export variants were delivered to Egypt, Iraq, Peru, Yemen, Afghanistan and other nations. Iraq used its Su-22s against Iran in the war of 1980-88, and the ultimate Su-22M4 is still in service with the Polish Air Force - albeit with upgrades to make it compatible with NATO operational standards. This new title written by 3 aviation enthusiasts, including expert in the field Yefim Gordon, and is illustrated with a whole host of unpublished photos, as well as numerous line drawings and colour side views, which will undoubtedly be of interest to aviation enthusiasts and scale modellers alike. The in service and operators chapters feature insignia and unit badges/nose art worn by individual aircraft, making this a must have for any aviation and scale model enthusiast's collection.

Canadian MiG Flights Harold Skaarup,2008-05 This book is a collection of there I was stories

highlighting the experiences of Canadian Forces pilots who have had the opportunity of a lifetime to fly in the combat aircraft operated by former adversaries. Technical descriptions of key Soviet-built fighter jets such as the MiG-15, MiG-21, MiG-23, MiG-25, MiG-29, Sukhoi Su-22 and Su-27 are included for general reference. The Canadian Fighter pilots mentioned in the story have generously provided their observations and comments on their specific experiences of flight in aircraft such as the MiG-29 (NATO codenamed Fulcrum), Sukhoi Su-22 (codenamed Fitter) and Su-27 (codenamed Flanker), both in Canada and overseas. The stories as told first hand by the pilots who contributed them should provide interesting reading for aviation enthusiasts of all ages. An Annex listing aircraft known to have been brought to the West by defecting pilots since 1949 is also included. The Annex briefly describes pilots and aircraft and the circumstances that brought the various defectors to the west, including the MiG-15 flown to South Korea by Lieutenant No Kum-Sok and the MiG-25 flown to Japan by Lieutenant Viktor Belenko. Brief details of Soviet-built aircraft later flown in NATO opposition force flight test programs are also included.

Iranian F-4 Phantom II Units in Combat Farzad Bishop, Tom Cooper, 2012-11-20 Different versions of the jet have provided the backbone of the frontline strength of the Iranian air force since the 1970s, and whole generations of Iranian pilots and ground personnel have been trained to fly and maintain them. Indeed, the type bore the brunt of active combat operations during the long war with Iraq. Iranian F-4 Phantom IIs were also some of the best equipped examples ever exported by the

USA. Some Iranian Phantom II pilots gathered immense experience on the type, flying it in combat for more than ten years. This book removes the veil of secrecy surrounding Iranian Phantom II operations since the war with Iraq.

Sukhoi Su-15 Yefim Gordon, Dmitriy Komissarov, 2015-04-30 A history of this supersonic Soviet interceptor, including useful information for model makers. In the late 1950s, the Sukhoi Design Bureau, already an established fighter maker, started work on a successor to its Su-9 and Su-11 single-engined interceptors for the national Air Defense Force. Similar to its predecessors, the new aircraft, designated Su-15, had delta wings; unlike the Su-9/Su-11, however, it had twin engines and lateral air intakes freeing up the nose for a powerful fire control radar. First flown in May 1962, the Su-15 officially entered service in 1965 and was built in several versions, the late ones having cranked-delta wings and a more capable radar. Being an air defense fighter, the Su-15 frequently had to deal with intruders. Unfortunately the aircraft gained notoriety in two separate incidents involving shoot-downs of Boeing airliners (a 707 in 1978 and a 747 in 1983), both of which were South Korean and had intruded into Soviet airspace on what were very probably clandestine spy missions. This book describes the developmental and service history of the Sukhoi Su-15, and contains a comprehensive survey of all model-making kits currently available on the market.
