### **Sukhoi Su-27 Flanker** E. Gordon, Yefim Gordon, 1999

The Su-27 entered service with the Russian Air Force in the mid-1980s. This comprehensive history is based on documents supplied from Sukhoi, interviews with design and engineering employees of the company, and all available information that has been published on this deadly aircraft. Contains development history, operational service history, technical details, and explanations of each model in the range. Technical drawings, photos, and text combine to make this the ultimate Sukhoi Su-27 reference.

*Sukhoi Su-27 & 30/33/34/35: Famous Russian Aircraft* Yefim Gordon, Dmitriy Komissarov, 2018-10  
The Sukhoi Design Bureau was tasked in 1969 with developing a fourth-generation heavy fighter and thus began the story of the Su-27, known to the western world as the Flanker--an aircraft which turned out to be one of the most successful Soviet fighter designs. This book tells the story of how the original project developed, how the final configuration of what was known as the T-10 was selected and why the brave decision to scrap the original project and rework it as the T-10S was taken, a decision that proved to be justified. The book covers the design and testing of the prototypes in both configurations, the production entry of the basic Su-27 single-seat fighter and the Su-27UB two-seat combat trainer together with the efforts of Sukhoi to keep them up to date with mid-life upgrades to Generation 4++' (Su-35S) level. The operational histories of Su-27 versions including the Su-30/Su-34/Su-35 are also

described. When the Soviet Navy decided to bolster its fleet with carriers optimized for conventional take-off and landing (CTOL) aircraft, Sukhoi responded by developing the Su-27K, which later entered service as the Su-33, Russia's first operational CTOL shipboard fighter. These naval variants are included in the book as is a chapter describing the story of how China purchased license manufacturing rights for the Su-27 and went on to develop its own versions with indigenous avionics and weapons, including the basic J-11 fighter and the J-15 Flying Shark--a clone of the Su-33. The post-Soviet republics included, the Su-27/Su-30/Su-34/Su-35 family has seen service with nearly 20 nations, including places as far apart as Vietnam, Malaysia, Ethiopia, Indonesia, Angola, India and Venezuela. The book describes in depth the development and operational career of the Su-27 family, including mid-life upgrades and the latest variants, and features detailed fleet lists. Richly illustrated with color photographs, line drawings and color profiles of the various color schemes carried by the type, this is the definitive work on a truly outstanding aircraft.

*Sukhoi Su-27 Flanker* E. Gordon, Yefim Gordon, Peter Davison, 2006 Recognized as one of the best fighters of the 1990s, the Su-27 Flanker is a single-seat supersonic interceptor that is often declared the finest and most successful fighter of the Cold War era. Designed by Sukhoi OKB, the imposing fighter quickly gained popularity and respect from countries all across the globe. Intended to be a direct competitor to the new

generation of American fighters such as the F-15, the Su-27 was designed with outstanding range, heavy armament, and high agility. Excellent performance, handling, and serviceability have made the aircraft popular with its pilots and ground personnel alike. Equipped with an analog fly-by-wire control system, a full avionics suite, and up to 10 air-to-air missiles, the Flanker also features a rearward-facing radar between the engines, allowing it to fire at targets behind the aircraft. Outfitted with two Lyul'ka AL-31F turbofans, each 12,500 kgp (27,557 lb st) with afterburning, the Su-27's high thrust-to-weight ratio and refined aerodynamics allow superb flight characteristics at high angles of attack. Yefim Gordon and Peter Davison are the authors of several books on Soviet aircraft including the Specialty Press titles Mikoyan Gurevich MiG-29 Fulcrum and Mikoyan Gurevich MiG-15 Fagot. Over 300 photos illustrate the story of the Su-27. Topics covered include design, development, structural detail, international production, trials, upgrades and generations, comparisons, overseas sales, and much more. This book is a must have for all warbird enthusiasts!

**Sukhoi Su-27** Hans-Heiri Stapfer, 2007 The Soviet answer to the F-15 Eagle and response to the trend in US fighters design toward improved maneuverability. A supersonic all-weather counter-air fighter, the Su-27 is equipped with a look-down/shoot-down weapons system and beyond-visual-range air-to-air missiles. Its range, thrust-to-weight ratio and maneuverability are all significant improvements over earlier Soviet

fighters; one of the world's foremost combat aircraft and a potent adversary. Over 200 color and b/w photos, line drawings and 10 color profiles; 80 pages.

*Sukhoi Su-27* Yefim Gordon, 2007 In the late 1960s, the Soviet Union became aware that the U.S. was developing a new generation of jet fighters that had an exceptional range, heavy armor, and great agility in the air. These U.S. aircraft, the F-14 Tomcat, F-15 Eagle, F-16 Fighting Hornet, and F/A-18 Hornet dominated U.S. air power for three decades. In the context of the Cold War, the Soviets could not be seen to be lagging behind the Americans. Their response to these new U.S. aircraft was the Sukhoi Su-27 Flanker, which was designed as a long-range air superiority aircraft and interceptor. The first of the modified pre-production aircraft appeared in 1981, but it was not until 1984 that significant numbers of the Su-27 started to enter service. Eventually some 680 Su-27 were built for the Soviets, of which 400 remain in service with the Russian Tactical Air Force today. Outside of Russia, the Su-27 is also in service with the Chinese, and on the inventories of the air forces of Vietnam, Malaysia, Ethiopia, Indonesia, Syria, and Angola. This book describes in depth the development, operational career, history, and variants within the Su-27 family. The book incorporates color and black and white photos to portray some of the various camouflage schemes carried by the type in Soviet, Russian, and other air forces over the past two decades.

*Sukhoi Su-27 Series* Theodore Gianna, 2023-09-20

Sukhoi Su-27 production began in 1982. The Su-27 project, however, started in 1969, when the United States declared intentions to construct a new fighter, the F-15 Eagle. The Soviet government wasted no time developing a response to counterbalance the latest American aircraft. The project was named the 'Promising Frontline Fighter Project'. Sukhoi was chosen as the project's winner, and the new frontline fighter was named the Su-27. After the Su-27 entered service with the Russian Air Force (VVS), the sky was the limit for Sukhoi and its family of fighters. The company churned out outstanding variants of the Su-27 series. The first variant is the Su-30 two-seat all-weather, air-to-air, and air interdiction missions multirole fighter. The Su-30, which evolved from the Su-27UB two-seat combat trainer, features updated avionics and can conduct ground attack missions. The following aircraft is the two-seat Su-32 fighter bomber. It was designed for round-the-clock, all-weather engagement of ground and surface targets at considerable distances from home bases. It also has precision-guided weapons to attack enemy aircraft in an intense counter-fire and ECM environment. The subsequent aircraft is the Su-33 all-weather carrier-based twin-engine air superiority fighter, designed primarily for use on the Russian 'Admiral Kuznetsov' heavy aviation cruiser. Next is the superb Su-34 multifunctional supersonic fighter bomber which is equipped with the 'Kinzhal' hypersonic missile system. Then comes the granddaddy of the series, the Su-35S 4++ generation multirole super-maneuverable fighter, arguably the most visually

striking fighter aircraft on the market today, and is an exceedingly lethal adversary in a combat situation. It possesses extreme super maneuverability and is exceptionally agile and quick. It could also strike targets on the ground. Lastly, there was the Su-37, the most maneuverable variant due to the 'Thrust Vector Control' (TVC) system, which allowed the aircraft to evade a stall scenario during low-speed situations when the control surfaces became ineffective. Using TVC, the aircraft could be controlled in these conditions by relying on engine thrust as opposed to airflow. The Su-37 project was terminated, and only one Su-37 was produced. Nonetheless, the Su-35s today continue to utilize TVC technology.

*Su-27 Flanker* Tom Basham, 1995 The first Windows 95 military flight simulation and a flight model with unprecedented accuracy, this game had Russia's top test pilot, Anaroly Kvotchur, as a technical advisor to its development process. This book is sure to give the player a clear and concise knowledge of the SU-27 Flanker.

**The Sukhoi Su-27** Andy Gröning, 2018-11-28 This detailed, illustrated look at the Russian Sukhoi Su-27 fighter aircraft features complete discussions of its design, construction, and operational use, as well as all technical systems and weapons. Developed in the 1970s as a match for the American F-15 Eagle, the aircraft remains one

of the most important fighters in the current Russian arsenal, and has formed the basis for many variants including the Su-30, Su-34, and Su-35. Though larger than Russia's famed MiG-29, it is extremely maneuverable and considerably more powerful. The Su-27 can also fly at extremely high angles of attack--an ability it is fond of demonstrating at airshows, along with its legendary Cobra maneuver. The Su-27 remains in production, and nearly a dozen countries--including China, India, and Vietnam--currently operate this high-performance aircraft. The book is superbly illustrated with more than 210 color images, and includes more than thirty color aircraft profiles displaying color schemes.

**The Sukhoi Su-27/Su-33** Stanislaw Krzysztow Mokwa, 2019-12-27 In the late 1960s Soviet Union started working on fighters that would be a counterbalance for the American F-15 Eagle. In 1969, a competition for a new fighter was announced, but when the parameters to be met were given, Pavel Sukhoi withdrew from it. He considered that the required performance could not be reached. Despite this, the designers from his office - Oleg Samojtowicz, Valery Nikolaenko and Vladimir Antonov - developed the plane and presented it for the competition as T-10 prototype. The aircraft was constructed as a heavy interceptor fighter (light version was the MiG-29, which was submitted in the same competition).

Canadian MiG Flights Harold Skaarup, 2008-05 This book is a collection of there I was stories highlighting the experiences of Canadian Forces pilots who have had the opportunity of a lifetime to fly in the combat aircraft operated by former adversaries. Technical descriptions of key Soviet-built fighter jets such as the MiG-15, MiG-21, MiG-23, MiG-25, MiG-29, Sukhoi Su-22 and Su-27 are included for general reference. The Canadian Fighter pilots mentioned in the story have generously provided their observations and comments on their specific experiences of flight in aircraft such as the MiG-29 (NATO codenamed Fulcrum), Sukhoi Su-22 (codenamed Fitter) and Su-27 (codenamed Flanker), both in Canada and overseas. The stories as told first hand by the pilots who contributed them should provide interesting reading for aviation enthusiasts of all ages. An Annex listing aircraft known to have been brought to the West by defecting pilots since 1949 is also included. The Annex briefly describes pilots and aircraft and the circumstances that brought the various defectors to the west, including the MiG-15 flown to South Korea by Lieutenant No Kum-Sok and the MiG-25 flown to Japan by Lieutenant Viktor Belenko. Brief details of Soviet-built aircraft later flown in NATO opposition force flight test programs are also

included.

**Patents for Power** Robert M. Farley,David H. Isaacs,2020-10-30 In an era when knowledge can travel with astonishing speed, the need for analysis of intellectual property (IP) law—and its focus on patents, trade secrets, trademarks, and issues of copyright—has never been greater. But as Robert M. Farley and David H. Isaacs stress in *Patents for Power*, we have long overlooked critical ties between IP law and one area of worldwide concern: military technology. This deft blend of case studies, theoretical analyses, and policy advice reveals the fundamental role of IP law in shaping how states create and transmit defense equipment and weaponry. The book probes two major issues: the effect of IP law on innovation itself and the effect of IP law on the international diffusion, or sharing, of technology. Discussing a range of inventions, from the AK-47 rifle to the B-29 Superfortress bomber to the MQ-1 Predator drone, the authors show how IP systems (or their lack) have impacted domestic and international relations across a number of countries, including the United States, Russia, China, and South Korea. The study finds, among other results, that while the open nature of the IP system may encourage industrial espionage like

cyberwarfare, increased state uptake of IP law is helping to establish international standards for IP protection. This clear-eyed approach to law and national security is thus essential for anyone interested in history, political science, and legal studies.

**Sukhoi Su-27** Hans Halberstadt, 1992 The Sukhoi Su-27 is one of the world's greatest fighter-interceptor aircraft, designed to penetrate deep behind enemy defenses to destroy the all-important AWACS and airborne refueling aircraft that are the keys to Western air superiority. The Flanker is a thoroughly modern interceptor with advanced turbofan engines and fly-by-wire controls that give it unbelievable agility for its size. Since its debut at the 1989 Paris air show where it stunned the audience with an unprecedented maneuver dubbed the Pugachev Cobra, we have seen many beautiful photographs of the aircraft during demonstration flights and on the flight line, but what else do we know about this fascinating new Russian fighter? Little, until now. This book reveals every detail of the Su-27 and fighter operations at a Russian combat base. - Back cover.
