**SU-76 on the Battlefield** Neil Stokes,2017-02-22 The SU-76 and SU-76M were the most widely produced Soviet self-propelled artillery pieces of the Second World War, second only to the T-34 tank in terms of production numbers. The SU-76M saw action in all campaigns in the latter years of the war and continued to serve with the Soviet Army and other states long after the war. This book provides a concise yet comprehensive description of the development, production and service of this important series, followed by extensive photographic coverage of the SU-76 and SU-76M in service.

**Single Vehicle No. 01 Su-76m** Przemyslaw Skulski,2021-06-02 This book contains compilations of the color profiles, scale plans, and photo details of the single variant of the Su-76M Soviet self-propelled gun. Scale plans are in 1/35 scale plus drawings from wartime technical manuals. Also includes photos of the details in b&w.

**SU-76 Assault Gun** Steven J. Zaloga,2019-05-30 The SU-76 assault gun was the second most widely manufactured Soviet armoured fighting vehicle of World War II, out-numbered only by the legendary T-34. Inspired in part by the German Marder series of tank destroyers, Soviet designers realized that the chassis of the obsolete T-70 light tank could be adapted to a much more substantial gun if it was placed in a fixed casemate rather than in a turret. This led to the design of the SU-76, which saw its combat debut at Kursk in the summer of 1943. The SU-76 was deployed primarily as an infantry direct support weapon, becoming the infantry tank of the Red Infantry, much as the StuG III became the infantry tank of the German infantry. Featuring full colour artwork and written by an expert on tank warfare during World War II, this fascinating study describes one of the Soviet Union's most

important armoured vehicles during its struggle with Nazi Germany.

Soviet Tanks in Manchuria 1945 William E. Hiestand, 2023-03-16 A new illustrated study of the devastating, but little-known, Soviet armored blitzkrieg against the Japanese in the last weeks of World War II, and how it influenced Soviet tank doctrine as the Cold War dawned. Although long overshadowed in the West by the dropping of the atomic bombs on Hiroshima and Nagasaki, the USSR's lightning strike into Manchuria in August 1945 was one of the most successful and unique campaigns of the era. Soviet forces, led by over 5,500 tanks and self-propelled guns, attacked across huge distances and deserts, marshes, and mountains to smash Japan's million-strong Kwantung Army in a matter of days. Japanese forces were short of training and equipment, but nevertheless

fought fiercely, inflicting 32,000 casualties on the Soviets. Red Army operations were characterized by surprise, speed, and deep penetrations by tank-heavy forces born of the brutal lessons they had learned during years fighting the Wehrmacht. Lessons from the campaign directly shaped Soviet Cold War force structure and planning for mechanized operations against the West. Illustrated with contemporary artwork and rare photos from one of the best collections of Soviet military photos in the West, this fascinating book explains exactly how the last blitzkrieg of World War II was planned, fought, and won, and how it influenced the Red Army's plans for tank warfare against NATO in Europe.

**Tanks in the Battle of Germany 1945** Steven J. Zaloga, 2022-11-24 A new history and analysis of the German and Soviet tank forces that battled on eastern German soil in the final months of World War II. The final months of World War II on the Eastern Front saw the Wehrmacht fighting with exhausted armoured divisions, albeit now armed with the most advanced and heaviest tanks of the war, to slow the Soviet advance. The Red Army meanwhile was rolling relentlessly westwards, with its own highly developed tank forces now equipped with T34/85s and the huge IS-2 heavy tanks, intent on taking Berlin and as much German territory as possible. This book is a history and analysis of the state of these two mighty armoured forces, as their battles decided the fate of Germany. It covers their initial encounters on the German frontier in 1944 (East Prussia), the fighting of the Oder-Vistula offensive in January 1945 and describes the condition of the German tank forces and their Hungarian allies as they were beaten back. It also considers the huge impact of The Red Army and other significant Allied forces such as those from Poland, Czechoslovakia and Romania on the outcome of

victory in the war.

*T-34/76 Medium Tank 1941-45* Steven J. Zaloga,2013-08-20 The T-34 was the most influential tank design of World War 2. When first introduced into combat in the summer of 1941, it represented a revolutionary leap forward in tank design. Its firepower, armour protection and mobility were superior to that of any other medium tank of the period. This superiority did not last long. While the T-34 underwent a series of incremental improvements during 1943, it was being surpassed by new German tank designs, most notably the Panther. This title traces the life of the original T-34 through all its difficulties to eventual success.

Bautzen 1945 Eduardo Manuel Gil Martínez,2021-02-26 The last clear German victory in World War II occurred in the last days of April 1945 during the defense, loss and subsequent recovery of the Saxon city of Bautzen. On that occasion, when all was lost, the remnants of once powerful German units, such as the Panzer Divisions Hermann Göring, Brandenburg or Grossdeutschland, inflicted a total defeat on the proud Soviet-Polish units, more robust and better armed, that supported the Red Army advance towards the capital of the Reich. This text tells the story of the events that took place in that city, the capital of Upper Lusatia, just south of the German capital. The high efficiency of the German soldiers made the difference with a real state of an army by then in decay and with no more fuel, showing how the fighting spirit was kept high until the end thanks to the

concrete possibility of stopping the Soviets, even if only for a few hours or days, in their overwhelming advance to allow the evacuation of the greatest number of German people towards the West of the country. An innovative work this one by Gil Martínez, that will certainly occupy, together with the previous one already published in Breslau 1945, a special place in the library of all those who are interested in the military history of the last terrible world conflict.

Stalin's Keys to Victory Walter S. Dunn Jr., 2007-10-17  
An important reevaluation of World War II on the Eastern Front Detailed look at how the Soviet Union created more new divisions in a few months than the U.S. did during the entire war More than 60 tables list losses, tank and weapon production, and unit formation, with special emphasis on rifle and tank divisions and brigades When Hitler invaded the Soviet Union in June 1941, the German Army quickly annihilated a major portion of the Red Army. Yet the Red Army rebounded to successfully defend Moscow in late 1941, defeat the Germans at Stalingrad in 1942 and Kursk in 1943, and deliver the deathblow in Belarus in 1944. Dunn examines these 4 battles while explaining how the Soviets lost a third of their prewar army yet returned to beat one of the most highly trained and experienced armies the world has ever seen.

*Russian Armour in the Second World War* Michael Green, 2013-09-19 This WWII pictorial history of Russia's tanks and armored fighting vehicles provides a vivid look at the Eastern Front through rare wartime photographs. When Hitler's armies advanced into Russia, it was Stalin's tanks and armored fighting vehicles that finally pushed them back from the outskirts of Moscow. At the Battle of Kursk in the summer of 1943, the Soviet tanks and AFVs proved their effectiveness by defeating the cream of the Panzertruppen. From that point on, the tanks and armored fighting vehicles

of the Red Army continued their offensive operations until they victoriously entered Berlin in April and May of 1945. In this fascinating pictorial history, military expert Michael Green provides historical images of the full range of Russian armor as well as exterior and interior color photos of preserved and restored tanks and AFVs from the period. This latest book in the Images of War series brings to life the Red Army's efforts to repel Hitler's Panzer Armies.

*Red Army Weapons of the Second World War* Michael Green,2022-09-21 While the Red Army's arsenal at the start of the Second World War included weapons dating back to the Great War or earlier, the 1930s' modernization program had introduced the automatic Tokarev pistol and self-loading Tokarev rifle. Its small arms were soon replaced by mass-produced sub-machine guns, such as the PPSH 1941, nicknamed the 'PePeSha,'. Supplementing the submachine guns, the Degtyarev Light Machine Gun DP-27. Fitted with a circular pan magazine, it received the not-unsurprising nickname 'Record Player.' New mortars and towed artillery

pieces, ranging from 76mm to 203mm, entered service in the pre-war years. In addition to a wide range of towed, self-propelled and anti-tank guns, the Soviets fielded the Katyusha rocket launchers in 1941, nicknamed the 'Stalin's organ' by the Germans. The 1930s saw the introduction of the BT light tank series. The iconic T-34 medium tank series came into service in late 1940, joined by the IS-2 heavy tank from early 1944, the prefix letters 'IS' translates to Joseph Stalin. These formidable AFVs led the Red Army to victory in May 1945 over Nazi Germany. All these weapons and more are covered with numerous images in this authoritative overview of the subject.

#### Tanks in Operation Bagration 1944 Steven J.

Zaloga, 2023-05-25 A new study of tank warfare used in the Soviet offensive of Operation Bagration, which destroyed Army Group Center. Operation Bagration, the 1944 summer campaign on the Russian Front, has been called "Hitler's Greatest Defeat." The operation involved substantial tank and armored vehicles on both sides but the German forces were severely hampered by the transfer of dozens of Panzer divisions to France to repel an expected Allied invasion. Forced to make hard decisions, German tank forces in the central Belarus sector were weak compared to the heavy concentration of Panzers in northern Ukraine. The Red Army exploited this vulnerability, crushing Army Group Center, and pushing beyond the Soviet frontier into Poland and East Prussia. With this crucial victory secured, the Red Army conducted successive offensives beyond the Carpathian Mountains, arriving at the Vistula river in Poland, and forcing Romania to switch sides. The Red Army had embarked on a major tank modernization after the Kursk battles of 1943 and as a result, Operation Bagration saw the first widespread use of T-34-85 and IS-2 tanks as well as self-propelled guns. Germany's Panther tank finally reached

technical maturity in the summer of 1944 but small numbers weakened its battlefield impact, while other innovations such as the Tiger II heavy tank failed to leave their mark. Using new photos and a fascinating selection of color illustrations explaining the camouflage and markings of these tanks, this book describes how the tanks and AFVs on both sides contributed to the eventual defeat of Army Group Center.

From the early battles for Leningrad and Sevastopol to the tank clash of Kursk and the bitter urban warfare of Stalingrad, this new Theatre Book for Bolt Action provides wargamers with new scenarios and special rules that give them everything they need to focus their gaming on the Eastern Front.

### **Tank Warfare on the Eastern Front, 1943-1945**

Robert Forczyk, 2016-03-30 The author of *Case White* offers an extensive history of German and Soviet armored warfare toward the end of World War II. By 1943, after the catastrophic German defeat at Stalingrad, the Wehrmacht's panzer armies gradually lost the initiative on the Eastern Front. The tide of the war had turned. Their combined arms technique, which had swept Soviet forces before it during 1941 and 1942, had lost its edge. Thereafter the war on the Eastern Front was dominated by tank-led offensives and, as Robert Forczyk shows, the Red Army's mechanized forces gained the upper hand, delivering a sequence of powerful blows that shattered one German defensive line after another. His incisive study offers fresh insight into how the two most powerful mechanized armies of the Second World War developed their tank tactics and weaponry during this period of growing Soviet dominance. He uses German,

Russian, and English sources to provide the first comprehensive overview and analysis of armored warfare from the German and Soviet perspectives. This major study of the greatest tank war in history is compelling reading.

The Dnepr 1943 Robert Forczyk,2016-03-24 Against the wishes of Hitler, German forces under Erich von Manstein were forced to retreat following the failure of the Kursk offensive of July 1943. The weakened force only had one possible refuge, behind the wide Dnepr River. The race to the natural defensive line was on, with the Soviets launching one of their largest offensives of the war - with over 2 million men on the move. Expert Eastern Front historian Robert Forczyk describes the dramatic four-month campaign that saw the Red Army not only succeed in crossing the Dnepr at multiple points, but also liberate Kiev, capital of the Ukraine. Revealing new detail about the largest Soviet airborne operation of the war and the increasingly desperate delaying tactics employed by Manstein as catastrophic casualties mounted on both sides,

Forczyk charts the course of the battle that confirmed to many observers that the relentless Soviet advance westward could not be halted. Berlin would be next.
