Misadventures of a Civil War Submarine James P. Delgado,2012-03-06 In 2001, while vacationing on Panama's Pacific coast, maritime archaeologist James P. Delgado came upon the hulk of a mysterious iron vessel, revealed by the ebbing tides in a small cove at Isla San Telmo. Local inquiries proved inconclusive: the wreck was described as everything from a sunken Japanese suicide submarine from World War II to a poison-laden craft of death that was responsible for the ruin of the pearl beds, decades before. His professional interest fully aroused, Delgado would go on to learn that the wreck was the remains of one of the first successful deep-diving submersibles, built in 1864 by Julius H. Kroehl, an innovator and entrepreneur who initially sought to develop his invention for military use during the Civil War. The craft's completion coming too late for that conflict, Kroehl subsequently convinced investors that it could be used to harvest pearls from the Pacific beds off Panama, in waters too deep for native pearl divers to reach. In *Misadventures of a Civil War Submarine*, Delgado chronicles the confluence of technological advancement, entrepreneurial aspiration, American capitalist ambition, and ignorance of the physiological effects of deep diving. As he details the layers of knowledge uncovered by his work both in archival sources and in the field excavation of Kroehl's ill-fated vessel, Delgado weaves the tangled threads of history into a compelling narrative. This finely crafted saga will fascinate and inform professional archaeologists and researchers, naval historians, students and aficionados of maritime exploration, and interested general readers.

**Silent Killers** James P. Delgado,Clive Cussler,2011-06-20 James P. Delgado, President and CEO of the Institute of Nautical Archaeology, presents a detailed and visually stunning examination of the history and development of the modern nuclear submarine. Calling on his training as a nautical archaeologist who was among the first explorers to dive the Titanic, Delgado recreates the story of the submarine from the bottom up - that is through eerie photographs of subs at the bottom of the sea. In addition, he explores submarine technology, from wooden to iron to steel hulls, from hand-cranked to nuclear-powered propulsion, from candlelight to electricity, from gunpowder 'torpedoes' to nuclear missiles. An esteemed underwater archaeologist and marine historian, Jim Delgado has compiled an extraordinary history of the dragons of the deep. *Silent Killers* is a triumph that is educational as well as highly entertaining. **MV Hughes Glomar Explorer** Mark H. Glissmeyer,2020-03-20 In March of 1968 a Soviet submarine was lost with all hands 16,500 feet below the surface of the Pacific Ocean. In 1974 portions of the submarine were brought to the surface using a covert recovery system designed specifically for the mission. The story of the more than six years intervening is the story of Project AZORIAN, that is, the story of the MV Hughes Glomar Explorer. This endeavor ranks at the forefront of imaginative and bold operations. It combines immense size and scope, advancements with technology, complex engineering and testing, and a demanding mission scenario in an unforgiving marine environment. While some aspects of the CIA mission remain Top Secret, recently declassified documents allow this story to be told from its early beginnings with the loss of the submarine, until the final days when the recovery ship sailed on her last voyage. This hardcover version includes 36 figures and charts showing the details of the project including construction, maps, recovery vehicle, submersible, and target location.

**The Taking of K-129** Josh Dean,2018-09-25 An incredible true tale of espionage and engineering set at the height of the Cold War--a mix between *The Hunt for Red October* and *Argo*--about how the CIA, the U.S. Navy, and America's most eccentric mogul spent six years and nearly a billion dollars to steal the nuclear-armed Soviet submarine K-129 after it had sunk to the bottom of the Pacific Ocean; all while the Russians were watching. In the early hours of February 25, 1968, a Russian submarine armed with three nuclear ballistic missiles set sail from its base in Siberia on a routine combat patrol to Hawaii. Then it vanished. As the Soviet Navy searched in vain for the lost vessel, a small, highly classified American operation using sophisticated deep-sea spy equipment found it--wrecked on the sea floor at a depth of 16,800 feet, far beyond the capabilities of any salvage that existed. But the potential intelligence assets onboard the ship--the nuclear warheads, battle orders, and cryptological machines--justified going to extreme lengths to find a way to raise the submarine. So began Project Azorian, a top secret mission that took six years, cost an estimated \$800 million, and would become the largest and most daring covert operation in CIA history. After the U.S. Navy declared retrieving the sub impossible, the mission fell to the CIA's burgeoning Directorate of Science and Technology, the little-known division responsible for the legendary U-2 and SR-71 Blackbird spy planes. Working with Global Marine Systems, the country's foremost maker of exotic, deep-sea drilling vessels, the CIA commissioned the most expensive ship ever built and told the world that it belonged to the reclusive billionaire Howard Hughes, who would use the mammoth ship to mine rare minerals from the ocean floor. In reality, a complex network of spies, scientists, and politicians attempted a project even crazier than Hughes's reputation: raising the sub directly under the watchful eyes of the Russians.

**Argonaut** John Poluhowich,1999 From the inspired fiction of Jules Verne to the dark menace of the Cold War, submarines have captivated the imaginations of millions for more than a century. Many inventors have been credited for the submarine, but one significant figure has been seriously overlooked. Without the efforts of Simon Lake, underwater navigation would be quite different from what it is today. *Argonaut* illustrates Lake's creativity and passion.

**Ask an Ocean Explorer** Jonathan Copley,2019-02-21 'Like Sir David Attenborough, he has the rare ability to be an excellent communicator and has written an engaging book sprinkled with mind-blowing facts about the deep oceans' - Daily Express 'A new informed perspective on the wide, watery world we inhabit' - Coast magazine 'Book of the month' 'The gripping story of how ocean science has advanced in recent years is captivatingly told by Jon Copley in this introduction to the deep ocean' - China Dialogue 'Deftly conjures the wonders of a bathynaut's world' - Nature It is often said that we know more about space than we do our own oceans, but is that really the case? Or do we in fact know a great deal more about the oceans than many people realise. The wellbeing of our oceans and the life contained within and around them has never been more important. But to truly understand the vital role they play, we need to first understand how the oceans work, how we explore them and learn about the mysteries they hold, and what our effect is on them. Between these pages is everything you need to know about our oceans, explained in 25 questions. Combining untold history of ocean exploration and personal account of what it's like to be a 'bathynaut' diving in a mini-submarine, *Ask an Ocean Explorer* brings to light weird and wonderful deep-sea creatures and how the oceans and their future is connected to our everyday lives.

**Explorer Academy** Trudi Strain Trueit,2018 Twelve-year-old Cruz Coronado leaves his home in Hawaii to study and travel with other young people invited to attend the elite Explorer Academy in Washington, D.C., but a family connection to the organization could jeopardize his future.

*Lost Subs* Spencer Dunmore,2010-08 Through gripping text and powerful images, this chronicle traces the evolution of the submarine and the history of under-the-seas warfare. Harrowing tales of a submerged death and eerie images of ghost ships are haunting, yet the daring stories of the vessels and their inhabitants invoke a nostalgic courage, allowing the reader to reflect on a

sunken, dark fate that is rarely mentioned. State-of-the-art underwater photographs, accompanied by archival images and cutaway diagrams, answer many questions about why each submarine sank and make this the definitive illustrated history.

**War at Sea** James P. Delgado,2019-06-27 The ocean is humanity's largest battlefield. Resting in its depths lie the lost ships of war, spanning the totality of human history. Many wrecks are nameless, others from more recent times are remembered, honored even, as are the battles that claimed them, like Actium, Trafalgar, Tsushima, Jutland, Pearl Harbor, and Midway. Underwater exploration is increasingly discovering long-lost warships from the deepest parts of the ocean, revealing a vast undersea museum that speaks to battles won and lost, service, sacrifice, and the human costs of warfare. War at Sea is a dramatic global tour of this remote museum and other formerly lost traces of humanity's naval heritage. It is also an account by the world's leading naval archaeologist of how underwater exploration has discovered these remains, thus resolving mysteries, adding to our understanding of the past, and providing intimate details of the experience of naval warfare. Arranged chronologically, the book begins with the warships and battles of the ancient Egyptians, Phoenicians, Greeks, Romans, and Chinese, and then progresses through three thousand years to the lost ships of the Cold War. James Delgado, who has personally explored, dived, and studied a number of the wrecks and sites in the book, provides insights as an explorer, archaeologist, and storyteller. The result is a unique and compelling history of naval warfare. From fallen triremes and galleons to dreadnoughts, aircraft carriers, and nuclear submarines, this book vividly brings thousands of years of naval warfare to life.

**Adventures of a Sea Hunter** James Delgado,2009-07-01 As a Sea Hunter and host, with novelist Clive Cussler, for the new National Geographic International television series, join Delgado as the team searches for, discovers and explores, among others, the wrecks of RMS Carpathia, the ship that rescued Titanic's survivors; Mary Celeste, the infamous ghost ship found sailing alone without a soul aboard, in the mid-Atlantic in 1872; Vrouw Maria, a perfectly preserved Dutch cargo ship of 1771, discovered on the bottom of the Baltic Ocean packed with cargo, including crates of long-lost Old Masters belonging to Empress Catherine the Great of Russia; the lost ships of the Mongol fleet of Kublai Khan that invaded Japan in 1274; and wreck of the USS Mississinewa, the first ship sunk by a Japanese suicide submarine in WWII. Stories and personalities of the past are interspersed with visits and voyages around the world - crossing the Atlantic, drifting in a powerless ship at the mercy of gales in the heart of the Pacific, and navigating through the fabled Northwest Passage. The undeniable thrill of being where history was made make Adventures of a Sea Hunter a highly entertaining, personal account of the exploration of the sea and the past that rests beneath the waves.
