Model Maker Warships and Submarines Ian Graham,2004-12 From ancient biremes to gigantic aircraft carriers, from mighty steamers to futuristic submarines, Model Maker Warships and Submarines is filled with the wonders of seafaring vessels past and present. Learn about these amazing machines and also discover the secrets of the ships of the future. This book includes five full-color press-out models to build and over 70 decals to decorate the models. The text is well written and provides detailed historical information and facts. Each spread is also highlighted by illustrations, photographs, and dynamic graphics. Kids will learn the difference between galleons, ironclad ships vs. dreadnoughts, and destroyers and aircraft carriers. This 48-page book discusses the importance of ships and submarines used in battles and wars from 700 B.C. to the present, in addition to the engineering developments from decade to decade. From the Greeks and Romans to the English and Spanish, kids will receive a complete education on this topic and then have the opportunity to recreate five different paper models.

Homemade Working Model Submarine Maruza,2016-03-15 This book is a complete guide to build a beautiful model of submarine that can dive, surface, and move forward without electric power. The submarine design is very simple, yet effective. Nothing complicated moving parts inside the submarine. The submarine is very easy to be crafted by using cheap household materials and can be done by 10 years old kid. The basic principles that support the submarine performance is state of the art technology. Therefore, this book is a good education for kids or adults who would like to learn about submarine technology. Some boat designs are tested to find the best performance. This way readers can analyze, compare and hopefully find and create their own design, which could be even better. This submarine science toy is using baking powder as 'fuel'. Using origami of plastic paper and polystyrene, this submarine looks like a real submarine. Go to below address to view a video about a submarine in action in swimming pool.

Submarine! Edward L. Beach,2012-04-15 Welcomed as the first book about American submarines in World War II to be written by a man who actually fought them, this compelling personal account of the war beneath the sea firmly established Edward L. Beach's reputation as a writer in the early 1950s. Given the survival rate of those in the silent service, it is a story many submariners did not live to tell. In fact, most of the crew of Beach's boat, the USS Trigger, were lost soon after he left for another assignment. A veteran of twelve war patrols, Beach's luck held out, and he authentically recaptures the moments of elation, desperation, and numbing fear that were part of the daily lives of these warriors as they hunted down the enemy in the Pacific. Beach helped sink the Trigger's first ships and survived more than his share of exploding depth charges from avenging warships. In the book, he weaves the story of his own boat with equally thrilling tales of other battle-hardened submarines and the brave and determined men who fought them against the Japanese. Beach's readers share in the destruction of five destroyers in four days and join in the deadliest game of all--stalking

other submarines. They also come to understand the terror and uncertainty of being at the other end of the pursuit, silently sweating out depth-charge poundings in a leaking boat. For an authentic account of what went on under the waves, this book remains one of the very best.
