Hiroshige's Views of Tokyo Oliver R. Impey, Hiroshige Andō, 1993 This booklet illustrates a selection of 20 woodblock prints from the series of prints by Ando Hiroshige called Meisho Edo Hakkei or One Hundred Views of Famous Places in Edo. Published between 1856-59, they were the last series designed by Hiroshige, who died in 1858.

Hiroshige 100 Famous Views of Edo Cristina Berna, Eric Thomsen, Come on the journey from Edo, modern day Tokyo, to Kyoto, as experienced by Utagawa Hiroshige in, when he travelled the road to participate in an important procession in 1832. There were 53 post stations along this important road, apart from the start and terminus, in all 55 prints, which are all here in the order from Edo to Kyoto. This was the most popular print series ever made in Japan. It was even more popular than Hokusai's series Thirty-six Views of Mount Fuji, which had been recently published and which had influenced Hiroshige tremendously (ISBN 9782919787159 as hard cover). It is possible to travel the same road today and some villages are still looking quite like they did back then. The postal stations were constructed between 1601 and 1624.

The Life and Work of Martin Johnson Heade Theodore E. Stebbins, Janet L. Comey, Martin Johnson Heade, Karen E. Quinn, 2000-01-01 Martin Johnson Heade was one of the most significant American painters of the nineteenth century, creator of portraits, history and genre pictures, still lifes, ornithological studies, landscapes, and marines, and his own unique orchid and hummingbird compositions. This book brings a perspective to Heade and his works, presenting him as one of the most original and productive painters of his time. Theodore Stebbins builds on his acclaimed 1975 study of Heade, drawing on several newly discovered collections of Heade's letters and the painter's own Brazilian journal. Stebbins tells of Heade's training and early career as an itinerant portraitist and

discusses his move to New York, where, under the influence of Frederic E. Church, he began painting landscapes and seascapes. He examines Heade's relationships with patrons and dealers, writers and scientists, and he sheds new light on Heade's trips to Brazil, to the Central American tropics, and to London. And he describes Heade's move to Florida in 1883, which marked not his retirement but a final period of creativity that lasted until his death in 1904. The book includes not only an examination of Heade's life and works but also reproductions of all his 620 known paintings, including nearly 250 that have been discovered since 1975.

The three masters rank highly among the most famous Japanese artistic productions of all time. The Geographical Unconscious Argyro Loukaki, 2016-03-09 This ambitious and innovative volume stretches over time and space, over the history of modernity in relation to antiquity, between East and West, to offer insights into what the author terms the 'geographical unconscious.' She argues that, by tapping into this, we can contribute towards the reinstatement of some kind of morality and justice in today's troubled world. Approaching selected moments from ancient times to the present of Greek cultural and aesthetic geographies on the basis of a wide range of sources, the book examines diachronic spatiotemporal flows, some of which are mainly cultural, others urban or landscape-related, in conjunction with parallel currents of change and key issues of our time in the West more generally, but also in the East. In doing so, *The Geographical Unconscious* reflects on visual and spatial perceptions through the ages; it re-considers selective affinities plus differences and identifies enduring age-old themes, while stressing the deep ancient wisdom, the disregarded relevance of the aesthetic, and the unity between human senses, nature, and space. The analysis provides new

insights towards the spatial complexities of the current age, the idea of Europe, of the East, the West, and their interrelations, as well as the notion of modernity.
