But when love begins to flutter in Kanon's heart, will he be tempted to abandon his station and take the witch's hand as well?

Exploring the Macabre, Malevolent, and Mysterious Matthew Hodge,Elizabeth Kusko,2020-09-28

In this unique volume, a number of scholars spanning diverse areas and backgrounds offer fresh insight into how perceived concepts of horror and dark subject matter influence cultures and societies around the world. The contributions here explore how topics considered disturbing, mysterious, or fascinating are found not only in works of fiction and entertainment, but also in the cultural fabrics,

belief systems, artistic creations, and even governmental structures of societies. Topics discussed in this book include witchcraft, voodoo, zombies, spiritualism, serial killers, monsters, cemeteries, pop culture entertainment, and the sublime in transcendental experiences. As the academic study of horror becomes more mainstream, collections such as this are instrumental in realizing just how much it impacts our lives—past, present, future, and imaginary. Thus, this volume of intriguing and profound topics offers scholars, students, and lovers of learning a much-needed fresh and innovative intellectual exploration of the horror genre and the cultural fascination with the mysterious unknown.

Shadow of Magic: The Hidden Order of Magic (Book 5) June Leung,

Learning to Industrialize Kenichi Ohno, 2014-04-03 This book proposes a new, pragmatic way of approaching economic development which features policy learning based on a comparison of international best policy practices. While the important role of government in promoting private sector development is being recognized, policy discussion often remains general without details as to what exactly to do and how to avoid common pitfalls. This book fills the gap by showing concrete policy contents, procedures, and organizations adopted in high-performing East Asian economies. Natural resources and foreign aid and investment can take a country to a certain income level, but growth stalls when given advantages are exhausted. Economies will be caught in middle income traps if growth impetus is not internally generated. Meanwhile, countries that have soared to high income

introduced mindset, policies, and institutions that encouraged, or even forced, accumulation of human capital – skills, technology, and knowledge. How this can be done systematically is the main topic of policy learning. However, government should not randomly adopt what Singapore or Taiwan did in the past. A continued march to prosperity is possible only when policy makers acquire capability to formulate policy suitable for local context after studying a number of international experiences. Developing countries wanting to adopt effective industrial strategies but not knowing where to start will benefit greatly by the ideas and hands-on examples presented by the author. Students of development economics will find a new methodological perspective which can supplement the ongoing industrial policy debate. The book also gives an excellent account of national pride and pragmatism exhibited by officials in East Asia who produced remarkable economic growth, as well as serious effort by an African country to emulate this miracle.

Basho Bash Matsuo, 2008 Matsuo Basho stands today as Japan's most renowned writer, and one of the most revered. Yet despite his stature, Basho's complete haiku have never been collected under one cover. Until now. To render the writer's full body of work in English, Jane Reichhold, an American haiku poet and translator, dedicated over ten years to the present compilation. In *Barbo: The*

Complete Haiku she accomplishes the feat with distinction. Dividing the poet's creative output into seven periods of development, Reichhold frames each period with a decisive biographical sketch of the poet's travels, creative influences, and personal triumphs and defeats. Supplementary material includes two hundred pages of scrupulously researched notes, which also contain a literal translation of the poem, the original Japanese, and a Romanized reading. A glossary, chronology, index of first lines, and explanation of Basho's haiku techniques provide additional background information. Finally in the spirit of Basho, elegant semi-e ink drawings by well-known Japanese artist Shiro Tsujimura front each chapter.

Basho's Haiku Matsuo Basho, 2012-02-01 2005 CHOICE Outstanding Academic Title Basho's Haiku offers the most comprehensive translation yet of the poetry of Japanese writer Matsuo Basho (1644–1694), who is credited with perfecting and popularizing the haiku form of poetry. One of the most widely read Japanese writers, both within his own country and worldwide, Basho is especially beloved by those who appreciate nature and those who practice Zen Buddhism. Born into the samurai

class, Bashō rejected that world after the death of his master and became a wandering poet and teacher. During his travels across Japan, he became a lay Zen monk and studied history and classical poetry. His poems contained a mystical quality and expressed universal themes through simple images from the natural world. David Landis Barnhill's brilliant book strives for literal translations of Bashō's work, arranged chronologically in order to show Bashō's development as a writer. Avoiding wordy and explanatory translations, Barnhill captures the brevity and vitality of the original Japanese, letting the images suggest the depth of meaning involved. Barnhill also presents an overview of haiku poetry and analyzes the significance of nature in this literary form, while suggesting the importance of Bashō to contemporary American literature and environmental thought.

The Biology of Science Fiction Cinema Mark C. Glassy, 2015-09-11 Science fiction films of the 1930s and 1940s were often set in dark laboratories that had strange looking glass containers with bubbling fluids and mad scientists conducting glandular and hormonal experiments. In the 1950s, films were more focused on radiation induced mutations. The 1960s and 1970s brought more sophisticated biological sciences to the movies and focused on such relatively new concepts as immunology,

cyrobiology, and biochemistry. In the 1980s and 1990s, the focus of science fiction films has been DNA. This work of film criticism relates 71 science fiction films to the biological sciences. The author covers cell biology, pharmacology, endocrinology, hematology, and entomology, to name just a few topics. An analysis of each film includes a brief plot synopsis, the author's favorite quotations, the biological principles involved, the accuracy of the laboratory, and correct and incorrect biological information. In his analyses, the author sets out what would be required to achieve in real life the results seen in the movies and whether these experiments or events could actually happen.
