Jet Fighters Jim Winchester,2011-12-15 Presents illustrations, historical notes, facts, and specifications for jet fighters, ranging from the earliest designs of the mid twentieth century to some of the most modern fighters in use today.

The Royal Air Force at Home Ian Watson,2010-06-19 Military public relations endeavors ultimately seek to build a sense of common interests and aims, and so generally foster good relations with the people they defend, and there in ensure a stable society. The armed forces when engaging on any public relations exercise, have traditionally sought to provide an entertaining spectacle. For years this has been typified by parades, bands, mock battles, drill displays and other relevant feats of military prowess which have captured the imagination of the public and inspired potential recruits. The 20th Century brought a new dimension to the field of warfare and subsequently added a new strand to the fabric of public ceremony and displays by the armed forces. That new dimension was the arrival of powered flight.Display flying began within five years of the Wright Brothers making their milestone first flight. The first events staged in Britain which centered on demonstrations by flying machines, were organized by the town councils of Blackpool and Doncaster and were held within days of each other in October 1909. 1920 was the year that the first of the famed and legendary Hendon Air Pageants was staged, and this is where military air shows traditionally began. The Hendon Displays were organized and staged by the still fledging Royal Air Force and it was probably due in no small part to the prestige and spectacle of this fresh new dimension of military pageantry, together with other like events held at RAF airfields through the next two decades, that the very existence of the RAF was saved from the threat of abolition. The history of the RAF's commitment (one that compares almost uniquely with other air forces) toward display flying through the years after World War II has now come of age. This account of their record in this often overlooked but then again traditional field of military customs, describes and illustrates the major public RAF events since 1920.

Israeli A-4 Skyhawk Units in Combat Shlomo Aloni,2013-01-20 The light and agile A-4 Skyhawk was the first modern American jet to be offered to the Israeli Air Force, marking the point where the US took over from France as Israel's chief military supplier. Deliveries began too late for the A-4 to fight in the Six-Day War, but it soon formed the backbone of the IAF's ground-attack force. From 1969 to 1970 it flew endless sorties against Egyptian forces in the War of Attrition. Then, during the Yom Kippur War, five squadrons of A-4s saw combat and 50 planes were lost as they battled against the Arab armored onslaught. Using previously unpublished first-hand accounts and rare photography from the IAF archives and pilots' private collections, Shlomo Aloni tells the definitive history of the IAF's A-4 squadrons, including the story of Ezra "BABAN" Dotan who became an ace with an unique double-kill of MiG17s.

Six-Day War 1967 Shlomo Aloni,2019-06-27 On one day in June, the balance of air power in the Middle East was turned upside down by perhaps the most ruthlessly effective air superiority campaign in history - Operation Moked, or Focus. In 1967, the Israeli Air Force was outnumbered more than two to one by the jets of hostile Egypt, Syria, Jordan and Iraq. Operation Focus was Israel's ingenious strike plan to overturn the balance. At 0745hrs on June 6, Israeli jets hit Egypt's airfields simultaneously, first bombing runways and then strafing aircraft. Another 20 follow-up missions were already in the air, initially scheduled to hit every five minutes. This new history of Operation Focus explains how the concept for Focus was devised and meticulously planned, the astonishing rate of serviceability and turnaround speed it required from ground crews, and how the relentless tempo of strikes shattered one air force after another. It is the story of how Israel's victory in the Six-Day War began with a single, shocking day.

Loud and Clear Iftach Spector,2009-06-15 A recently retired Israeli Air Force general and its

second-highest-scoring fighter ace, Iftach Spector is one of Israel's living legends. He was the leader of the flight that attacked the USS Liberty in 1967. After the 1967 and 1973 wars, in which he commanded a squadron of fighter-bombers, he rose to head the IAF's Training and War Lessons Section and later became its Chief of Operations. He was one of the eight Israeli pilots who attacked Saddam Hussein's nuclear reactor at Osirak in 1981. In 2003, his career took an even more dramatic turn: he was the senior signatory of the famous "Pilots' Letter," in which Spector and 27 other Israeli pilots stated their refusal to bomb targets in Palestine where collateral damage would likely be severe. His maverick conscience is well on display in this artfully written memoir, which is currently a 10-week-and-counting bestseller in Israel and has been licensed in Brazil as well. The son of a family that immigrated to Palestine at the turn of the 20th century, whose father and mother served in the Palmach, Israel's early clandestine commando force, Spector has written a rich and reflective meditation on loyalty, on what is right and wrong in war, and on his dedication to the idea and reality of the state of Israel. The Pilots' Letter ended Spector's military career, but also made him one of the most compelling and celebrated defenders of the conscience of the Jewish state. In that battle, as in his previous battles against Nasser's MiGs, his mother's constant lesson to him sustained him: "All from within." General Spector's first book, *A DREAM IN BLACK AND AZURE* (1992; never translated into English), won the Sade Literary Award, given to him personally by Prime Minister Yitzhak Rabin. He has a B.A. in history and Middle East Studies from Tel Aviv University and a masters in political science from UCLA, both with honors.

Canadian Warplanes Harold A. Skaarup, 2009-11-16 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been flown by members of the Canadian Air Force, Royal Canadian Air Force, Royal Canadian Navy, Canadian Army and the present-day Canadian Forces. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active Canadian squadrons both at home and overseas. 100 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to Canadian service aircraft. For those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museum's current inventory or on display as gate guardians throughout Canada and overseas. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Canada's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view Canada's Warplane survivors.

Flashpoints Michael Napier, 2022-06-09 From acclaimed aviation historian Michael Napier, this is a highly illustrated survey of the aerial fighting in the flashpoints of the Cold War. The Cold War years were a period of unprecedented peace in Europe, yet they also saw a number of localised but nonetheless very intense wars throughout the wider world in which air power played a vital role. *Flashpoints* describes eight of these Cold War conflicts: the Suez Crisis of 1956, the Congo Crisis of 1960-65, the Indo-Pakistan Wars of 1965 and 1971, the Arab-Israeli Wars of 1967 and 1973, the Falklands War of 1982 and the Iran-Iraq War of 1980-88. In all of them both sides had a credible air force equipped with modern types, and air power shaped the final outcome. Acclaimed aviation historian Michael Napier details the wide range of aircraft types used and the development of tactics over the period. The postwar years saw a revolution in aviation technology and design, particularly in the fields of missile development and electronic warfare, and these conflicts saw some of the most modern technology that the NATO and Warsaw Pact forces deployed, alongside some relatively obscure aircraft types such as the Westland Wyvern and the Folland Gnat. Highly illustrated, with over 240 images and maps, *Flashpoints* is an authoritative account of the most important air wars of the Cold War.

Early Jet Fighters 1944-1954: The Soviet Union and Europe Leo Marriott,2020-03-30 In his previous book on early jet fighters Leo Marriott traced the history of the revolutionary aircraft produced by the British and Americans immediately after the Second World War; in this companion volume he describes jet fighter development on the continent of Europe and in the Soviet Union during the same remarkable period. Using over 200 archive photographs he covers the pioneering German designs, then the range of experimental and operational fighters constructed by the Soviets, the French and the Swedes. The sheer variety of the designs that manufacturers came up with during this short, intense period of innovation mean that the book is fascinating reading. Several of the most famous jet fighters feature prominently in the rare photographs and are analysed in the expert text, including the Messerschmitt Me 262, the Heinkel He 162, the MiGs 15, 17 and 19, the Dassault Ouragan and the Saab J29. But perhaps the most rewarding aspect of the book is its record of experimental projects which tested new concepts that rapidly became established elements of jet aircraft design. The photographs of these largely forgotten aircraft give us an insight into the extraordinary technical challenges and the ambition and inventiveness of the designers and manufacturers who overcame them.

In Cold War Skies Michael Napier,2020-08-20 Throughout the second half of the 20th century, international relations across the globe were dominated by the Cold War. From 1949 until the fall of the Berlin Wall in 1989, US and Soviet strategic forces were deployed across the Arctic Ocean in North America and Northern Russia, while the best-equipped armed forces that the world had ever seen faced each other directly across the 'Iron Curtain' in Europe. In Cold War Skies examines the air power of the major powers both at a strategic and at a tactical level throughout the 40 years of the Cold War. In this fascinating book, acclaimed historian Michael Napier looks at each decade of the war in turn, examining the deployment of strategic offensive and defensive forces in North America and Northern Russia as well as the situation in Europe. He details the strategic forces and land-based tactical aircraft used by the air forces of the USA, USSR, NATO, Warsaw Pact countries and the European non-aligned nations. He also describes the aircraft types in the context of the units that operated them and the roles in which they were used. The text is supported by a wide range of first-hand accounts of operational flying during the Cold War, as well as numerous high-quality images.

The Walls of Israel Jean Lartéguy,2014-04-01 Surrounded on all borders but its western coastline by hostile and aggressive neighbors, the state of Israel resembles the walled city of the Middle Ages. But its walls are not stone and mortar, they are flesh and blood—they are the soldiers, both men and women—the airmen, the tankscorpsmen and the paratroops. These young people—from the old ghettos of Europe, from the cities of North Africa and Asia, native-born Sabras—are the protecting wall that keeps Israel free. The Walls of Israel is Jean Lartéguy's fascinating 1968 study of the Israeli armed forces. Talking with them, living with them, joining in their operations (he was taken along on a nighttime ambush set up to catch Syrian infiltrators), Lartéguy got to know the Israeli soldier as few could. From this book, wide ranging and filled with lively anecdotes, emerges a picture of an army, tough and determined, yet intelligent and realistic enough to foresee a long and dangerous road ahead before a peace is won.

Six Days In June Eric Hammel,2020-12-23 SIX DAYS IN JUNE How Israel Won the 1967 Arab-Israeli War Eric Hammel Distinguished military historian Eric Hammel becomes the first chronicler of the 1967 Six Day War to unite the story of development of Israel's bold brand of military training and planning with a detailed narrative account of her breathtaking victories in Sinai, Jerusalem, The West Bank, and the Golan Heights. Unlike all earlier accounts of the 1967 war, Hammel's sweeping narrative describes how, from the early 1950s, the Israel Defense Force—Zahal—undertook a relentless and often visionary campaign to prepare for the inevitable war of national survival that, when it came, radically altered the Middle East and has profoundly influenced international politics ever since. Israel's brilliant, innovative military thinkers developed extremely flexible strategies,

operational plans, and battlefield tactics aimed at overcoming several large Arab forces with Zahal's much smaller army and air force. Zahal's innovations proved to be so effective and fundamentally sound that they established the norms of modern military planning and performance that saw the United States and her coalition allies through the lightning Desert Storm campaign of 1991. Hammel decisively disproves the enduring myth that Israel's stunning 1967 victory was a "miracle" or a "fluke." He explains how, by necessity and in secret, a tiny Third-World nation developed a First-World military force that has become the envy of all the nations of the world. Hammel is at his proven best when describing the actions of men at war. Six Days in June seamlessly meshes classic military history with the human drama of Israel's finest hour. Eric Hammel is the author of more than thirty-five highly acclaimed books on military affairs, including Chosin: Heroic Ordeal of the Korean War; Ace: A Marine Night Fighter Pilot in World War II; The Root: The Marines in Beirut; and Duel for the Golan: The 100-Hour Battle that Saved Israel.
