Swallowtail Butterflies T. R. New, N. Mark Collins, 1991 This is the first insect Action Plan prepared by the IUCN Species Survival Commission, and was chosen because swallowtail butterflies are perhaps the most charismatic to non-entomologists. Some are the largest butterflies which exist, and the birdwings in particular have long excited wonder and comment among naturalists of all persuasions. Out of a total of 573 species, 170 are considered to need conservation action. This Action Plan exemplifies the wide-ranging conservation needs of swallowtails by selecting a geographically broad suite of faunas and individual taxa for priority conservation action. Endangering processes are accelerating alarmingly in most of the regions listed for attention. The plan covers 34 regions throughout the world, considering within each region the conservation status of particular species,

action needed, and how projects could be undertaken, together with an indication of costs involved.

Tiger, 1953 Describes the complete cycle of a swallowtail butterfly: mating, laying eggs, hatching out as a caterpillar, formation of the chrysalid and transformation to a butterfly.

Butterflies of Houston and Southeast Texas John Tveten, Gloria Tveten, 2010-07-05 All across the country, butterflies are becoming as popular as birds and wildflowers, especially among people seeking to enjoy the rich natural resources that Texas possesses. John and Gloria Tveten have been studying butterflies in Southeast Texas for thirty-five years, and here they offer their considerable knowledge to everyone who shares their passion for butterflies. In this easy-to-use field guide, the Tvetens describe and illustrate more than 100 species of butterflies that live in Southeast Texas and can often be found across the state. Striking color photographs of living butterflies and caterpillars (a unique addition) show the key marks and characteristics necessary for field identification. The Tvetens' enjoyable and authoritative text describes each species' life history, habits, flight patterns, and characteristic markings. An account of the different butterfly families, from

swallowtails to longwings to skippers, precedes the descriptions of the species within each family. The Tvetens also include an interesting discussion of butterfly biology, a complete checklist of area butterflies, an index of butterfly-attracting plants, and pointers to other butterfly resources.
