North American T-6 Texan Pere Redón,2015 At the beginning of the 1930s, North American Aviation designed one of the most popular aircraft of all time, the T-6 Texan. Over 24,404 planes in 260 versions and variants were produced. This WWII vintage, propeller-driven aircraft is covered in its various forms and uses, including combat and training. Detailed specifications, unit insignia, and historical and present-day photographs are provided.

This allows us to preserve the book accurately and present it in the way the author intended. Since the original versions are generally quite old, there may occasionally be certain imperfections within these reproductions. The Incredible T-6 Pilot Maker Walt Ohlrich,Jeffrey L. Ethell,1982-11-01 The photos in this edition are black and white. Harvard, Texan, J-Bird, T-6, whatever name you gave the aircraft, it was the right plane, in the right place, at the right time. One of the most important aircraft to emerge from the 1930s, it proved to be an excellent training machine for fledgling pilots throughout the world. So adaptable was the design that it was used to teach carrier landings, aerial fixed gunnery, glide bombing, flexible hand-held gunnery, aerial photography, instrument flying & advanced military flying. It was safe, reliable, challenging and a perfect machine for transition from elementary trainers to the front-line P-40s, P-51s & similar hot ships of the period. For more than twenty years it taught American military pilots to fly & it still serves today with the air forces of several nations. Pilot Maker by Jeff Ethell & Walt Ohlrich documents for the first time, the fascinating story of this important aircraft. 144 pages, paperback, 7x10, 220 photos and includes all models produced.

Big Girls Don't Cry Brenda Novak,2009-05-01 Sometimes Mr. Right couldn't be more wrong... Thanks to a devastating revelation about her husband, Reenie Holbrook's once-perfect marriage is over. For eleven years she had the life she wanted—and now it's gone. Sometimes Mr. Wrong couldn't be more right... Reenie decides that the first step in recovering from her ordeal is to find work; after all, she has three young children to support. She's thrilled when she lands a job at Dundee High teaching history—until Isaac Russell, the man who triggered the unraveling of her marriage, accepts a temporary position teaching science. Then she's tempted to quit. Reenie doesn't care if the whole town admires Isaac...and she won't admit that, secretly, she admires him, too. She doesn't want to see him or his sister in her town. Lean In Sheryl Sandberg,2013-03-11 The #1 international best seller In Lean In, Sheryl Sandberg reignited the conversation around women in the workplace. Sandberg is chief operating officer of Facebook and coauthor of Option B with Adam Grant. In 2010, she gave an electrifying TED talk in which she described how women unintentionally hold themselves back in their careers. Her talk, which has been viewed more than six million times, encouraged women to “sit at the table,” seek challenges, take risks, and pursue their goals with gusto. Lean In continues that conversation, combining personal anecdotes, hard data, and compelling research to change the conversation from what women can’t do to what they can. Sandberg provides practical advice on negotiation techniques, mentorship, and building a satisfying career. She describes specific steps women can take to combine professional achievement with personal fulfillment, and demonstrates how men can benefit by supporting women both in the workplace and at home. Written with humor and wisdom, Lean In is a revelatory, inspiring call to action and a blueprint for individual growth that will empower women around the world to achieve their full potential.

Investigation of the Compressive Strength and Creep of 7075-T6 Aluminum-alloy Plates at Elevated Temperatures William D. Deveikis,1957 Elevated-temperature compressive-strength test results from room temperature to 600 degrees F and creep test results from 350 degrees F to 500 degrees F are presented for V-groove edge-supported plates of 7075-T6 aluminum alloy. The test data are compared with calculations obtained from procedures for estimating maximum strength from material stress-strain curves and creep-failure stresses from isochronous stress-strain curves. The strength and creep results from this investigation are also compared with similar results from 2024-T3 aluminum-alloy plates.
