United States Air Force

North American T-6 Texan Pere Redón,2015 At the beginning of the 1930s, North American Aviation designed one of the most popular aircraft of all time, the T-6 Texan. Over 24,404 planes in 260 versions and variants were produced. This WWII vintage, propeller-driven aircraft is covered in its various forms and uses, including combat and training. Detailed specifications, unit insignia, and historical and present-day photographs are provided.

The Incredible T-6 Pilot Maker Walt Ohlrich,Jeffrey L. Ethell,1982-11-01 The photos in this edition are black and white. Harvard, Texan, J-Bird, T-6, whatever name you gave the aircraft, it was the right plane, in the right place, at the right time. One of the most important aircraft to emerge from the 1930s, it proved to be an excellent training machine for fledgling pilots throughout the world. So adaptable was the design that it was used to teach carrier landings, aerial fixed gunnery, glide bombing, flexible hand-held gunnery, aerial photography, instrument flying & advanced military flying. It was safe, reliable, challenging and a perfect machine for transition from elementary trainers to the front-line P-40s, P-51s & similar hot ships of the period. For more than twenty years it taught American military pilots to fly & it still serves today with the air forces of several nations. Pilot Maker by Jeff Ethell & Walt Ohlrich documents for the first time, the fascinating story of this important aircraft. 144 pages, paperback, 7x10, 220 photos and includes all models produced.

North American Snj / T-6 Texan Pilot's Flight Operating Instructions United States Army Air Forces,United States Navy,2010-08 Originally designated as the advanced trainer AT-6, North American's single-engine training aircraft was extensively used by the U.S. Army Air Forces, U.S. Navy (as the SNJ), Royal Air Force (as the Harvard) and allied air forces during WWII. The prototype first flew in 1935, and by the time production ceased over 15,000 T-6s of all types were built. This included the AT-6B, which could hold a machine gun and was used for gunnery training, the AT-6G which offered a steerable tailwheel and advanced hydraulic system, and the Navy's SNJ-3C with arresting gear to permit carrier training. Aside from training duties T-6s saw service as forward air controllers, and served in combat on several occasions including for the French during the Algerian war. The T-6 remains a popular aircraft for Hollywood (in Tora! Tora! Tora! painted T-6s impersonated Japanese Zeros) and at air shows, where its throaty engine and classic warbird looks make it a crowd pleaser. This pilot's flight handbook dates from 1945, and features details on the AT-6C / SNJ-4 and Harvard IIA airplanes. Originally restricted, it was declassified long ago, and is reprinted here in its entirety.

Iraqi Air Force Reborn Arnaud Delalande,2016 Iraqi Air Power Reborn provides the most authoritative account of the Iraqi air arms in the years following Operation Iraqi Freedom. In the space of over a decade since Harpia Publishing presented its groundbreaking and ever-popular Iraqi Fighters, the Iraqi Air Force has undergone an unprecedented transformation. Having been almost entirely decimated by coalition air strikes in 2003, and during the insurgency that followed, Baghdad has set about rebuilding its air power from scratch. This book summarizes the history of the Iraqi Air Force and its various incarnations until 2003 before detailing the efforts to establish a new-look Air Force, which began with training formations, before adding transport and reconnaissance squadrons, and finally attack and fighter squadrons - the latter now equipped with the Lockheed Martin F-16 Fighting Falcon. Coverage also extends to Iraqi Army Aviation, and its various transport, special operations, armed reconnaissance and attack squadrons. Iraqi Army Aviation in particular has been blooded in the fighting that has plagued Iraq since the coalition invasion, and, using pilot testimonies and other sources, author Arnaud Delalande provides exhaustive coverage of successive campaigns waged by Iraqi air power against local and foreign insurgents, including the so-called Islamic State. As well as an overview of Iraq's air arsenal, therefore, this work also serves as a primer of the ongoing conflict within the country. A map of all current Iraqi air bases complements the comprehensive photographic coverage and a detailed order of battle is included, together with squadron patches. A full list is provided of aircraft serial numbers and attrition to all causes since 2004. Iraqi Air Power Reborn is one of the first books in an all-new format from Harpia Publishing. Those readers familiar with Harpia's previous titles will recognize the format, layout, and high-quality production standards. Compared to earlier Harpia titles, however, the new series are altogether more compact, running to a total of 80 pages, and enabling coverage of 'smaller' themes. Of course, these books also retain the now-familiar in-depth coverage, painstaking research and lavish illustrations of their 'bigger brothers'.

To Kiss a Texan Jodi Thomas,1999-05-01 Two tortured souls find a second chance at happiness in this compelling western historical romance in New York Times bestselling author Jodi Thomas' McLain series. Wes McLain returned from the civil war with little money, and less hope. He had given up on love. Until he saw her...Allie, the blue-eyed girl who had been called a savage, a wild soul—and was prisoner of what seemed to be a horrible fate. But when Wes looked into her eyes, he wanted only to free her, and to take her with him on a journey through the frontiers of Texas. But Allie has been brutally mistreated for years, and is now too afraid to even speak. Wes will have to heal her and it will take more than good intentions or a few moonlight kisses to win her trust. And when Allie's finally ready to speak again, she will tell Wes more than he ever imagined.

PT-19, PT-23 and PT-26 Airplanes Pilot's Flight Operating Instructions United States Army Air Force,2011-02 As late as 1940, the majority of Army Air Force trainees received flight lessons in biplanes such as the PT-17. The advent of high-performance combat aircraft led the USAAF to seek a new plane for primary training, that would better simulate a modern fighter aircraft. Fairchild's M62, a two-seat monoplane with a higher stalling speed that required careful flying, beat out 17 competitors for the job. Designated PT-19, the rugged aircraft was produced in large quantities beginning in 1941. The basic model was equipped with a 200 hp Ranger engine, had a 36'wingspan, and could achieve 132 mph in flight. Variants included the PT-19B designed for instrument training, the PT-23 which had a 220 hp Continental radial power-plant, and the PT-26 Cornell which featured an enclosed cockpit. By war's end PT-19s and variants were built by Fairchild, Aeronca, Howard, St. Louis Aircraft Corp. and Fleet Aircraft. The USAAF accepted over 6000 PT-19s and variants, and Cornells flew for the air forces of Canada, Norway, Brazil, Ecuador, Chile and many other nations. This pilot's flight handbook dates from 1943, and covers the PT-19, PT-19A, PT-19B, PT-23 and PT-26. Originally restricted, it was declassified long ago, and is reprinted here in its entirety.

The Adventures of Tommy the Texan and Captain Billy William Moyle,2019-09-30 Book one of The Adventures of Tommy the Texan and Captain Billy narrated the story of how Billy's relationship began with his friend in flight, Tommy the Texan. Their adventures brought them from their meeting in a barn in Arizona to Tommy's new home in a hangar at a small airport in Danbury, Connecticut. Billy and his crew restored Tommy and prepped him to return to the air. Book two of the Tommy the Texan series, The Adventures of Tommy the Texan and Captain Billy: A Return to Blue Skies, shares how the bond between Tommy, a T-6 Texan airplane, and Captain Billy keeps growing as he and his crew prepare for Tommy's first test flight and a return to blue skies. Lois and Tracie, two of Billy's pilot friends, become new members of the team. The story follows the team as they get Tommy ready for his test flight and face a challenge that could be a big problem. The crew flies down to Florida to attend a flying formation clinic where Billy hopes to get certified so their adventures can continue.

BuNos! Disposition of World War II USN, USMC and USCG Aircraft Listed by Bureau Number Douglas E. Campbell,2012-02-01 A snapshot in time. After thousands of hours of research and data entry over a 35-year

period, the information on the disposition of some 25,000 US Navy, US Marine Corps and US Coast Guard aircraft needs to be published. These aircraft mainly represent those built and lost during World War II - between 7 December 1941 and 15 August 1945 - but this book also contains aircraft built before WWII that were lost during WWII or disposed of after WWII (lost during the Korean War, lost on training exercises, sold to private investors, currently located in museums and even some still proudly sitting as gate guards across the US, etc.).

To Fly and Fight Clarence E. "Bud" Anderson, 2017-05-12 Bud Anderson is a flyers flyer. The Californians enduring love of flying began in the 1920s with the planes that flew over his fathers farm. In January 1942, he entered the Army Air Corps Aviation Cadet Program. Later after he received his wings and flew P-39s, he was chosen as one of the original flight leaders of the new 357th Fighter Group. Equipped with the new and deadly P-51 Mustang, the group shot down five enemy aircraft for each one it lost while escorting bombers to targets deep inside Germany. But the price was high. Half of its pilots were killed or imprisoned, including some of Buds closest friends. In February 1944, Bud Anderson, entered the uncertain, exhilarating, and deadly world of aerial combat. He flew two tours of combat against the Luftwaffe in less than a year. In battles sometimes involving hundreds of airplanes, he ranked among the groups leading aces with 16 aerial victories. He flew 116 missions in his old crow without ever being hit by enemy aircraft or turning back for any reason, despite one life or death confrontation after another. His friend Chuck Yeager, who flew with Anderson in the 357th, says, In an airplane, the guy was a mongoosethe best fighter pilot I ever saw. Buds years as a test pilot were at least as risky. In one bizarre experiment, he repeatedly linked up in midair with a B-29 bomber, wingtip to wingtip. In other tests, he flew a jet fighter that was launched and retrieved from a giant B-36 bomber. As in combat, he lost many friends flying tests such as these. Bud commanded a squadron of F-86 jet fighters in postwar Korea, and a wing of F-105s on Okinawa during the mid-1960s. In 1970 at age 48, he flew combat strikes as a wing commander against communist supply lines. To Fly and Fight is about flying, plain and simple: the joys and dangers and the very special skills it demands. Touching, thoughtful, and dead honest, it is the story of a boy who grew up living his dream.

Beechcraft T-34 Mentor Pilot's Flight Operating Instructions United States Air Force, 2013-04 Designed in 1948 by the brilliant Walter Beech, the T-34 Mentor was intended as a low cost replacement for the T-6/NJ Texan. The aircraft bore many similarities to the Beechcraft Bonanza, but had a two-seat cockpit with bubble canopy, and a conventional tail. The original T-34s were equipped with a piston engine. Fifteen years after production ceased, the design was upgraded and deliveries began of a turbo-prop equipped T-34C Turbo-Mentor, which remained in production until 1990. The T-34 is one of the most reliable aircraft of its type with many remaining in service today, six decades after it was first produced. Over 2300 Mentors in various versions were produced worldwide, including the T-34A for the Air Force and the T-34B variant for the U.S. Navy.
