10 Years of Neuropharmacology Nicholas Barnes,2020-07-08 I am delighted to write a preface for this Celebratory eBook published in the Specialty Section Neuropharmacology, within the journal Frontiers in Pharmacology. The eBook delivers a compendium of high impact papers published previously in the journal over the last ten years; at the time of writing this collection of 20 papers has been viewed 700k times with over 75k downloads. Clearly this Section is delivering a useful resource to the scientific and medical research community! The scope of the Specialty Section Neuropharmacology is deliberately broad. We encourage submission of high quality and impactful papers in the field of neuropharmacology along the full length of the translational escalator; from cellular and molecular investigations to clinical trials. I believe this is a real strength of the Section and helps attract a diverse readership that builds the stakeholder network to promote further engagement of the Section with the research community. I have no doubt that this has contributed to the growth of the Section with submissions and accepted papers displaying 10-year (2009-2019) compound annual growth rates (CAGRs) of 58% and 78%, respectively. Vitaly, high quality, scientific rigour and impact are fundamental to a paper being accepted and this inevitably leads to a relatively high level of rejection, but the transparency of the review process means a fair decision is reached. Essential for the handling and considered review of submitted papers, the Specialty Section Neuropharmacology has a dynamic cohort of Associate Editors that have been selected carefully (81 at the time of writing) that represent the full spectrum of neuropharmacology as well as being widespread geographically around the globe. The Associate Editors are supported by nearly 500 Review Editors that ensures informed review – indeed the relatively open and interactive review process often adds considerably to the accepted version of the paper. As we celebrate the success of Frontiers in Pharmacology and the Specialty Section Neuropharmacology with this eBook, we must also recognise and be thankful for the hard work and dedication of those in the Editorial Office; their enthusiasm and willingness to help is outstanding and they form an integral component of the overall team that delivers the success. I look forward to further success for the Specialty Section Neuropharmacology. Happy reading! Professor Nicholas M. Barnes, FBPhS Specialty Chief Editor, Neuropharmacology

Monitoring endogenous GPCRs: lessons for drug design Dominique Massotte,2015-10-07 G protein-coupled receptors (GPCRs) are integral membrane proteins forming the fourth largest superfamily in the human genome. Many of these receptors play key physiological roles and several pathologies have been associated with receptor functional abnormalities. GPCRs therefore represent important goals for drug design in pharmaceutical companies since they constitute the target of about one third of the drugs currently on the market. However, endogenous GPCRs are most often difficult to study because of a lack of tools to target them specifically and single out their response to physiological or drug-elicited stimulations. Hence, studies mostly focused on recombinant receptors expressed in a variety of cellular models that do not always closely reflect the receptor natural environment and often deal with levels of expression exceeding by far physiological ranges. Recent technological developments combining for example genetically modified animals and advanced imaging approaches have improved our ability to visualize endogenous GPCRs. To date, trailing receptor activation, subsequent intracellular redistribution, changes in signaling cascade up to integrated response to a drug-elicited stimulation is at hand though the impact of a physiological challenge on receptor dynamics remains a major issue. Data however suggest that the receptor may embrace a different fate depending on the type of stimulation in particular if sustained or repeated. This suggests that current drugs may only partially mimic the genuine response of the receptor and may explain, at least in part, their secondary effects. Commonalities and specificities between physiological and drug-induced activation can thus represent valuable guidelines for the design of future drugs.

Lola John Starkey,2017-06-08 Lola, a British company, is probably the best-known and best-respected builder of racing cars, and has built successful cars for almost every racing formula. This book covers the 63 types of Lola car built between 1957 and 1977. Lola expert John Starkey was curator of the Donington racing car collection.

Changing Times Martin Chick,2020-01-15 This is a study of how, and why, the British economy has changed since 1951. It covers the Golden Age of 1945-1973 when unemployment was below one million; when governments built millions of council houses and flats; when electricity, telephones, and gas were supplied by nationalised monopolies; when income and wealth inequality were narrowing; and when the UK was not a member of the European Economic Community. Moving through the inflation, rising unemployment, and rapid contraction of the manufacturing industry from the mid- 1970s, Changing Times examines the transfer of assets which was effected in the privatisation of public housing and nationalised industries from the early 1980s. The role of the State changed as public investment fell. The financing of old-age care, of state pensions, and of the National Health Service became of increasing concern and were less politically amenable to the approach of using private finance (the Private Finance Initiative and tuition fees) to fund former public obligations. Changes were made to the system of taxation, but public expenditure changed little as a share of national income, although the government now built little. Difficulties emerged in ensuring adequate housing for a growing population, and uncertainty grew as to where future investment in necessities like electricity supply would come from. Having narrowed in the Golden Age, inequality of income and wealth widened. Environmental concerns also grew, from the local smogs of the 1950s, through the concern with acid rain from the 1960s, to the current global concern with climate change. The financial crash of 2008 and the decision to 'Brexit' in the referendum of 2016 reduced economic growth and highlighted the extent of economic change since 1951. This is a study of that change.

The Dictionary of Substances and their Effects (DOSE) S D Gangolli,2007-10-31 This new edition of The Dictionary and Substances and their Effects (DOSE) supersedes the renowned 1st edition. The 1st edition has been completely revised, updated and extended with all the latest significant data on the chemicals known to have adverse effects on lifeforms or the environment. The new edition is a must for all those who need easy access to a single source of the latest essential and fully referenced data on chemicals which are known to have significant toxic or environmental effects. The web database is ideal for targeted searches and customised data retrieval. The 2nd edition of DOSE includes new toxicity, environmental and regulatory data from the world's literature, presented in concise summaries. These new data are essential for the accurate assessment of the risks associated with the use and disposal of chemicals. Data on over 100 chemicals new to this

edition have been added, including endocrine disruptors, food carcinogens, pesticides and compounds studied by IARC and NTP. All of the 4000 chemicals contained in the 1st edition have been reviewed. New and updated information for these chemicals includes: * occupational exposure limits for 6 countries * recent toxicity and ecotoxicity data * results of new carcinogenicity, mutagenicity and environmental fate studies * the latest regulatory requirements DOSE 2nd edition comprises 7 hardcover volumes covering over 4000 chemicals alphabetically, and includes indexes of substance names and synonyms, molecular formulae, and CAS Registry Numbers; glossaries of medical terms and Latin to English organism names; an abbreviations listing and a comprehensive guide to the types of data and their origin. DOSE is also available via Knovel's Engineering and Scientific Online Reference, located at www.knovel.com.

The Enlightenment in Practice Jeremy L. Caradonna,2012-02-17 Public academic prize contests-the concours académique-played a significant role in the intellectual life of Enlightenment France, with aspirants formulating positions on such matters as slavery, poverty, the education of women, tax reform, and urban renewal and submitting the resulting essays for scrutiny by panels of judges. In *The Enlightenment in Practice*, Jeremy L. Caradonna draws on archives both in Paris and the provinces to show that thousands of individuals-ranging from elite men and women of letters artisans, and peasants-participated in these intellectual competitions, a far broader range of people than has been previously assumed. Caradonna contends that the Enlightenment in France can no longer be seen as a cultural movement restricted to a small coterie of philosophers or a limited number of printed texts. Moreover, Caradonna demonstrates that the French monarchy took academic competitions quite seriously, sponsoring numerous contests on such practical matters as deforestation, the quality of drinking water, and the nighttime illumination of cities. In some cases, the contests served as an early mechanism for technology transfer: the state used submissions to identify technical experts to whom it could turn for advice. Finally, the author shows how this unique intellectual exercise declined during the upheavals of the French Revolution, when voicing moderate public criticism became a rather dangerous act.

Grand Prix Ford Graham Robson,2015-10-09 In 1965, Colin Chapman persuaded Ford to underwrite development of a V8 for the new 3000cc Grand Prix formula. Built by Cosworth, the new DFV engine won Lotus four World Championship Grands Prix in 1967. A year later, and now available to other constructors, the engine began its domination of Grand Prix racing.
