Mad Wives and Island Dreams Philip Gabriel,1998-10-01 Hailed by the noted critic Karatani Kojin as a more important and lasting writer than Mishima, Shimao Toshio (1917-1986) remains almost unknown in the West. Several of his short stories have appeared in English translation, yet it is only now, with the publication of Philip Gabriel's comprehensive and searching study, that Shimao's work is being introduced to the worldwide audience it deserves. Mad Wives and Island Dreams not only is a thorough assessment of the literary legacy of a highly original and influential writer, but also represents a significant contribution to the consideration of much broader issues relating to the emergence and nature of the postwar Japanese sense of identity. Shimao's fiction covers a wide range of topics: the war and its aftermath, the unconscious, the nuclear family, madness, the position of women, the culture of Japan's southern islands. Shimao's experiences as a survivor of a kamikaze unit underscore much of his literature and resulted in a series of compelling short stories unique in modern fiction. Many of these early, critically acclaimed works, including the classic *Everyday Life in a Dream*, are based on the narrative logic of the unconscious. Mad Wives and Island Dreams contextualizes these dream stories as a literary expression of wartime trauma and argues that Shimao's powerful narration of guilt and victimization challenges standard readings of Japanese war literature. Shimao's most popular works are the byosaimono (literally stories of a sick wife), which chronicle the real-life crisis of his wife's madness in the mid-1950s. Among these is the writer's best-known work, the 1977 novel *Shi no toge* (The sting of death), widely recognized as one of the masterpieces of Japanese literature. The novel further explores Shimao's literature of the victimizer and wartime experience while revealing a feminist perspective that explores links between the suppressed aspirations of women and madness. Perhaps, most importantly, just as the novel examines the relationship between the wife, Miho, and her southern island roots, *Shi no toge* parallels Shimao's growing concern over the culture of marginalized regions and notions of cultural diversity-a concern that would eventually result in the Yaponesia essays. In Mad Wives and Island Dreams, Gabriel succeeds in linking all of the seemingly disparate strands within Shimao's oeuvre--the war stories, the byosaimono, the dream stories, the Yaponesia writings-categories all too often discussed in isolation. He shows convincingly that together they represent a consistent and concerted attempt to depict the existence of the Other, the significant periphery of a less than homogenous whole. This volume will prove fascinating and important reading for those interested in questions of cultural identity and marginalization as well as Japanese literature and culture.

Wind Power Ben Backwell,2014-09-23 Wind Power - The Struggle for Control of a New Global Industry looks at the nations, companies and people fighting for control of one of the world’s fastest growing new industries and how we can harness one of the planet’s most powerful energy resources - wind power. The book also examines the challenges the sector faces as it competes for influence and investment with the fossil fuel industry across the globe. The wind power business has grown from a niche sector within the energy industry to a global industry attracting substantial investment in recent years. In Europe wind has become the biggest source of new power generation capacity, while wind is successfully competing with the gas, coal and nuclear sectors in China and the US. The specialist wind turbine companies that pioneered the business

have gone global over the last decade, while big industrial conglomerates have entered the fray. European companies are struggling to maintain their technological and market lead in the sector, in a three cornered battle with China and the US. Meanwhile, the industry is fighting to drive down costs in the face of a fossil fuel generation industry bolstered by the onset of cheap shale gas. And wind companies continue to wrestle with a stop-go cycle of investment across the world, with some traditional markets stuttering under the impact of the financial crisis and fiscal austerity, while new power hungry markets in Asia and South America emerge. Wind Power – The Struggle for Control of a New Global Industry analyses the industry climbers, the investment trends and the technological advancements that will define the future of wind energy.
