The Bloomsbury Handbook of Posthumanism Mads Rosendahl Thomsen, Jacob Wamberg, 2020-07-23 As our ideas of the human have come under increasing challenges – from technological change, from medical advances, from the existential threat of climate crisis, from an ideological decentering of the human, amongst many other things – the 'posthuman' has become an increasingly central topic in the Humanities. Bringing together leading scholars from across the world and a wide range of disciplines, this is the most comprehensive available survey of cutting edge contemporary scholarship on posthumanism in literature, culture and theory. The Bloomsbury Handbook of Posthumanism explores: - Central critical concepts and approaches, including transhumanism, new materialism and the Anthropocene - Ethical perspectives on ecology, race, gender and disability - Technology, from data and artificial intelligence to medicine and genetics - A wide range of genres and forms, from literary and science fiction, through film, television and music, to comics, video games and social media.

Posthuman Management Matthew E. Gladden,2016-08-07 What are the best practices for leading a workforce in which human employees have merged cognitively and physically with electronic information systems and work alongside social robots, artificial life-forms, and self-aware networks that are 'colleagues' rather than simply 'tools'? How does one manage organizational structures and activities that span actual and virtual worlds? How are the forces of technological posthumanization transforming the theory and practice of management? This volume explores the reality that an

organization's workers, managers, customers, and other stakeholders increasingly comprise a complex network of human agents, artificial agents, and hybrid human-synthetic entities. The first part of the book develops the theoretical foundations of an emerging 'organizational posthumanism' and presents frameworks for understanding and managing the evolving workplace relationship between human and synthetic beings. Other chapters investigate topics such as the likelihood that social robots might utilize charismatic authority to lead human workers; potential roles of Als as managers of cross-cultural virtual teams; the ethics and legality of entrusting organizational decision-making to spatially diffuse robots that have no discernible physical form; quantitative approaches to comparing managerial capabilities of human and artificial agents; the creation of artificial life-forms that function as autonomous enterprises competing against human businesses; neural implants as gateways that allow human users to participate in new forms of organizational life; and the implications of advanced neuroprosthetics for information security and business model design. As the first comprehensive application of posthumanist methodologies to management, this volume will interest management scholars and management practitioners who must understand and guide the forces of technologization that are rapidly reshaping organizations' form, dynamics, and societal roles.

Thinking with Animation Joff P. N. Bradley, Catherine Ju-yu Cheng, 2021-08-09 This volume brings together scholars based predominantly in Asia to contribute provocative and experimental essays on the dynamic relationship between animation and philosophy. In an inventive and playful philosophical way, they address not only the mainstay of Japanese animation, but also Korean film, picture books and Mickey Mouse to understand what we might call film-philosophy in Asia. In thinking animation with concepts from the technicolour philosophies of Deleuze, Guattari, Stiegler, Benjamin, Kristeva and Heidegger, the book sees animation not as a representation of a philosophical idea per se, but conceptualizes it as a philosophical thinking-device. In the images themselves, what is at work is not just the thinking of a particular director or manga artist, but, rather, thinking as such, through and by the

images themselves. The scholars in this collection are committed to thinking images themselves as thought-experiments and thinking machines.

Sociable Robots and the Future of Social Relations J. Seibt, M. Nørskov, R. Hakli, 2014-12-18 The robotics industry is growing rapidly, and to a large extent the development of this market sector is due to the area of social robotics – the production of robots that are designed to enter the space of

human social interaction, both physically and semantically. Since social robots present a new type of social agent, they have been aptly classified as a disruptive technology, i.e. the sort of technology which affects the core of our current social practices and might lead to profound cultural and social change. Due to its disruptive and innovative potential, social robotics raises not only questions about utility, ethics, and legal aspects, but calls for "robophilosophy" – the comprehensive philosophical reflection from the perspectives of all philosophical disciplines. This book presents the proceedings of the first conference in this new area, "Robo-Philosophy 2014 – Sociable Robots and the Future of Social Relations, held in Aarhus, Denmark, in August 2014. The short papers and abstracts collected here address questions of social robotics from the perspectives of philosophy of mind, social ontology, ethics, meta-ethics, political philosophy, aesthetics, intercultural philosophy, and metaphilosophy. Social robotics is still in its early stages, but it is precisely now that we need to reflect its possible cultural repercussions. This book is accessible to a wide readership and will be of interest to everyone involved in the development and use of social robotics applications, from social roboticists to policy makers.

The Ghost in the shell - Stand Alone Complex - Tome 01 Yu Kinutani, Shirow Masamune, 2017-03-22 Ghost in the shell, chef d'œuvre de Masamune Shirow, ainsi que les magnifiques films d'animation réalisés par Mamoru Oshii, ne sont plus à présenter. La série Stand Alone Complex (S.A.C.) reprend le même univers et les mêmes personnages pour les faire évoluer dans un monde parallèle où l'héroïne, le Major Motoko Kusanagi, restée au sein de la Section 9, n'aurait jamais rencontré le Puppet Master. Avec l'aide de Batô, Togusa, des Tachikoma et de toute son équipe, elle

devra déjouer les complots qui se trament dans un Japon cyberpunk. Avec un propos et un design modernisé, ce titre s'adresse tout autant aux fans de la première heure qu'aux novices qui pourront découvrir là l'essence de l'imagination foisonnante de Shirow. Bien après la sortie de la première série, cette licence a toujours continué d'être exploitée sous diverses formes : manga, séries d'animation et jeux vidéo et jouit donc d'une actualité constante. Un jeu multijoueurs de tir à la première personne sera lancé en France pour 2014, tandis qu'au Japon, a été annoncée la mise en production de l'opus suivant : Ghost in the shell ARISE.
