Japanese Animation Masao Yokota, Tze-yue G. Hu, 2013-07-02
Japanese Animation: East Asian Perspectives makes available for the first time to English readership a selection of viewpoints from media practitioners, designers, educators, and scholars working in the East Asian Pacific. This collection not only engages a multidisciplinary approach in understanding the subject of Japanese animation but also shows ways to research, teach, and more fully explore this multidimensional world. Presented in six sections, the translated essays cross-reference each other. The collection adopts a wide range of critical, historical, practical, and experimental approaches. This variety provides a creative and fascinating edge for both specialist and nonspecialist readers. Contributors' works share a common relevance, interest, and involvement despite their regional considerations and the different modes of analysis demonstrated. They form a composite of teaching and research ideas on Japanese animation.

Animation Chris Pallant, 2021-01-01 *Animation: Critical and Primary Sources* is a major multi-volume work of reference that brings together seminal writings on animation studies. Gathering historical and contemporary texts from a wide-ranging number of sources, the volumes provide a key resource in understanding and studying the past and future directions of animation studies. The four volumes thematically trace animation studies from its many definitions, or a lack thereof, to the institutional nature of animation production, to establishing greater space within animation discourse for the consideration of broadcast and interactive animation, and finally, giving greater contextual understanding of the field of animation studies, by focusing on 'Authorship', 'Genre', 'Identity Politics', and 'Spectatorship', thus enabling readers to engage more deeply with the ideas discussed in the final volume. Ordering the collection in this way avoids imposing an overly simplistic chronological framework, thereby allowing debates that have developed over years (and even decades) to stand side by side. Each volume is separately introduced and the essays structured into coherent sections on specific themes--

Pervasive Animation Suzanne Buchan, 2013-08-22 This new addition to the AFI Film Readers series brings together original scholarship on animation in contemporary moving image culture, from classic experimental and independent shorts to digital animation and installation. The collection - that is also a philosophy of animation - foregrounds new critical perspectives on animation, connects them to historical and contemporary philosophical and theoretical contexts and production practice, and expands the existing canon. Throughout, contributors offer an interdisciplinary roadmap of new directions in film and animation studies, discussing animation in relationship to

aesthetics, ideology, philosophy, historiography, visualization, genealogies, spectatorship, representation, technologies, and material culture.

The Asian Cinema Experience Stephen Teo, 2013-05-07

This book explores the range and dynamism of contemporary Asian cinemas, covering East Asia (China, Japan, South Korea, Hong Kong, Taiwan), Southeast Asia (Thailand, Singapore, Malaysia), South Asia (Bollywood), and West Asia (Iran), in order to discover what is common about them and to engender a theory or concept of Asian Cinema. It goes beyond existing work which provides a field survey of Asian cinema, probing more deeply into the field of Asian Cinema, arguing that Asian Cinema constitutes a separate pedagogical subject, and putting forward an alternative cinematic paradigm. The book covers styles, including the works of classical Asian Cinema masters, and specific genres such as horror films, and Bollywood and Anime, two very popular modes of Asian Cinema; spaces, including artistic use of space and perspective in Chinese cinema, geographic and personal space in Iranian cinema, the private erotic space of films from South Korea and Thailand, and the persistence of the family unit in the urban spaces of Asian big cities in many Asian films; and concepts such as Pan-Asianism, Orientalism, Nationalism and Third Cinema. The rise of Asian nations on the world stage has been coupled with a growing interest, both inside and outside Asia, of Asian culture, of which film is increasingly an indispensable component – this book provides a rich, insightful overview of what exactly constitutes Asian Cinema.

Superheroes on World Screens Rayna Denison, Rachel

Mizsei-Ward, 2015-05-26 Superheroes such as Superman and Spider-Man have spread all over the world. As this edited volume shows, many national cultures have created or reimagined the idea of the superhero, while the realm of superheroes now contains many icons whose histories borrow from local folklore and legends. Consequently, the superhero needs reconsideration, to be regarded as part of both local and global culture as well as examined for the rich meanings that such broad origins and re-

workings create. This collection stands out as the first concentrated attempt to think through the meanings and significance of the superhero, not only as a product of culture in the United States, but as a series of local, transnational, and global exchanges in popular media. Through analysis of mainly film, television, and computer screens, contributors offer three challenges to the idea of the American superhero: transnational reimagining of superhero culture, emerging local superheroes, and the use of local superheroes to undermine dominant political ideologies. The essays explore the shifting transnational meanings of Doctor Who, Thor, and the Phantom, as these characters are reimagined in world culture. Other chapters chart the rise of local superheroes from India, the Middle East, Thailand, and South Korea. These explorations demonstrate how far superheroes have traveled to inspire audiences worldwide.

A Killing Art Gillis, Alex, 2016-08-01 The eagerly anticipated updated return of a bestselling martial arts classic The leaders of Tae Kwon Do, an Olympic sport and one of the world's most popular martial arts, are fond of saying that their art is ancient and filled with old dynasties and superhuman feats. In fact, Tae Kwon Do is as full of lies as it is powerful techniques. Since its rough beginnings in the Korean military 60 years ago, the art empowered individuals and nations, but its leaders too often hid the painful truths that led to that empowerment „ the gangsters, secret-service agents, and dictators who encouraged cheating, corruption, and murder. *A Killing Art: The Untold History of Tae Kwon Do* takes you into the cults, geisha houses, and crime syndicates that made Tae Kwon Do. It shows how, in the end, a few key leaders kept the art clean and turned it into an empowering art for tens of millions of people in more than 150 countries. *A Killing Art* is part history and part biography „ and a wild ride to enlightenment. This new and revised edition of the bestselling book contains previously unnamed sources and updated chapters.

How the World Remade Hollywood Ed Glaser, 2022-03-07 For decades, filmmakers worldwide have been remaking Hollywood movies in colorful ways. They've chronicled a singing and dancing Hannibal Lecter in India, star-crossed lovers aboard the doomed Nigerian ship Titanic, a Japanese expedition to the planet of the apes, and an uncivil war in Turkey between Captain America and

a mobbed-up Spider-Man. Most of these films were low budget and many were unauthorized, but all of them were fantastic--and lately have begun to resurface thanks to cherry-picked YouTube clips. But why and how were they made in the first place? This book tells the little-known stories of the wily filmmakers who made an Italian 007 flick by casting Sean Connery's tradesman brother, produced a Turkish space opera by stealing a print of Star Wars for its effects footage, and transported a full-fledged Terminator to the present day--not from a post-apocalyptic future, but from the vibrant mythology of Indonesia. Their stories reveal more than mere imitations; they demonstrate the fascinating ways ideas evolve as they cross borders.

Mechademia 9 Frenchy Lunning,2014-11-15 If the source of manga and anime is physically located in Japan, the temptation for many critics and scholars is to ask what aspects of Japanese culture and history gave rise to these media. This ninth volume of Mechademia—an annual collection of critical work on anime and manga—challenges the tendency to answer the question of origins by reductively generalizing and essentializing “Japaneseness.” The essays brought together in Mechademia 9 lead us to understand the extent to which “Japan” might be seen as an idea generated by anime, manga, and other texts rather than the other way around. What is it that manga and anime produce that no other medium can precisely duplicate? Is anime

its own medium or a genre of animation—or something in between? And how must we adapt existing critical modes in order to read these new kinds of texts? While the authors begin with similar questions about the roots of Japanese popular culture and media, they invoke a wide range of theoretical work in the search for answers, including feminist criticism, disability studies, poststructuralist textual criticism, postcolonialism, art history, film theory, phenomenology, and more. Richly provocative and insightful, *Mechademia 9* both enacts and resists the pursuit of fixed starting points, inspiring further creative investigation of this global artistic phenomenon. Technologies of the New Real Arthur Kroker, Marilouise Kroker, 2021-10-01 With astonishing speed, we have been projected into a new reality where interactions with drones, robotic bodies, and high-level surveillance are increasingly mainstream. In this age of groundbreaking developments in robotic technologies, synthetic biology is merging with artificial intelligence, forming a newly blended reality of machines, bodies, and affect. *Technologies of the New Real* draws from critical intersections of technology and society - including drones, surveillance, DIY bodies, and innovations in robotic technology - to explore what these advances can tell us about our present reality, or what authors Arthur and Marilouise Kroker deem the new real of digital culture in the twenty-first century.

Technologies of the New Real explores the many technologies of our present reality as they infiltrate the social, political, and

economic static of our everyday lives, seemingly eroding traditionally conceived boundaries between humans and machines, and rendering fully ambivalent borders between the human mind and simulated data.
