Taiga Trevor Day,2010 Taiga forests occupy a larger area than all the tropical rain forests. These dark, mostly coniferous, forests grow in a band of extreme weather circling the northern hemisphere from Alaska to Japan. Biologists divide the living world into major zones called biomes, including deserts, oceans, tropical forests, and tundra. Looking at biomes helps us understand the connections between our planet's climate and the plants and animals that live there. Biomes also have a huge impact on people. Each book reveals the fascinating web of relationships between climate, plants, animals, and people that makes every biome unique. Inside this book Superb photography, bringing each biome dramatically to life Clear maps of each major region of every featured habitat identify the main areas of environmental stress Fact panels give at-a-glance information on each region Meets curriculum standards for the study of biomes and their importance for plants, animals, and people Glossary, sources of further information, and index Book jacket.

Forest Ecosystems in the Alaskan Taiga K. van Cleve,F.S.III. Chapin,P.W. Flanagan,L.A. Viereck,C.T. Dyrness,2012-12-06 The information presented in this book is the result of combined research efforts of scientists at the University of Alaska, Fairbanks, the Institute of Northern Forestry, USDA Forest Service, and the Systems Ecology Research Group, San Diego State University. The objective of the volume is to present a synthetic overview of structure and function of taiga forest ecosystems in interior Alaska. The data base for this work has appeared in earlier published articles including the special issue of the Canadian Journal of Forest Research Volume 13:5 (1983). Stimulus for this book was a conference held in Fairbanks from June 10-14, 1983. The papers presented at the conference were fore runners of the chapters in this book. We invited 19 scientists from North America and England to critique our research and synthesis efforts. Six of these people were asked to write introductory chapters for each section of the book. Formal presentation sessions, combined with field trips to research sites, introduced the invitees to the primary and secondary successional ecosystems with which we were dealing. A major wildfire, only 24 km from the University campus, was contained the week prior to the conference and one field trip provided graphic evidence of fire impact in subarctic forests. The conference conveners regretted that it was not possible to host a similar meeting during synthesis efforts in mid-January.

Research Opportunities and Needs in the Taiga of Alaska Austin Edward Helmers,Charles T. Cushwa,1973 An appraisal of taiga (the northern forests of interior Alaska) environment research opportunities and needs was made based upon accomplishments since Alaskan statehood, current involvement of citizens in resource issues, information needs incident to the National Environmental Policy Act of 1969, and needs of new resource managing agencies and changing ownerships brought about by statehood and the settlement of aboriginal land claims. Based upon this appraisal, it is proposed that the research needs can best be met through a ultidisciplinary interagency program. The program suggests closer coordination among several departments of the University of Alaska and a number of State and Federal agencies currently involved in applicable research. The urgency of research implementation is related to rapid change and diminishing opportunity to insure orderly development of Alaska's resources.

The Taiga Syndrome Cristina Rivera Garza,2018-10-01 Fairy tale meets detective drama in this David Lynch–like novel by a writer Jonathan Lethem calls “one of Mexico's greatest . . . we are just barely beginning to catch up to what she has to offer.” A fairy tale run amok, The Taiga Syndrome follows an unnamed Ex-Detective as she searches for a couple who has fled to the far reaches of the earth. A betrayed husband is convinced by a brief telegram that his second ex-wife wants him to track her down—that she wants to be found. He hires the Ex-Detective, who sets out with a translator into a snowy, hostile forest where strange things happen and translation betrays both sense and one’s senses. Tales of Hansel and Gretel and Little Red Riding Hood haunt the Ex-Detective’s quest into a territory overrun with the primitive excesses of Capitalism—accumulation and expulsion, corruption and cruelty—though the lessons of her journey are more experiential than moral: that just as love can fly away, sometimes unloving flies away as well. That sometimes leaving everything behind is the only thing left to do.

Taiga’s True Views Melinda Takeuchi,1994-03-01 This lavishly illustrated book on one of Japan's preeminent painters focuses on the relationship between topography and the language of visual symbols a painter manipulates, or must invent, to suggest specific places.

The Consolations of the Forest Sylvain Tesson,2013-10-01 A meditation on escaping the chaos of modern life and rediscovering the luxury of solitude. Winner of the Prix Médicis for nonfiction, The Consolations of the Forest is a Thoreau-esque quest to find solace, taken to the extreme. No stranger to inhospitable places, Sylvain Tesson exiles himself to a wooden cabin on Siberia’s Lake Baikal, a full day’s hike from any neighbor, with his thoughts, his books, a couple of dogs, and many bottles of vodka for company. Writing from February to July, he shares his deep appreciation for the harsh but beautiful land, the resilient men and women who populate it, and the bizarre and tragic history that has given Siberia an almost mythological place in the imagination. Rich with observation, introspection, and the good humor necessary to laugh at his own folly, Tesson’s memoir is about the ultimate freedom of owning your own time. Only in the hands of a gifted storyteller can an experiment in isolation become an exceptional adventure accessible to all. By recording his impressions in the face of silence, his struggles in a hostile environment, his hopes, doubts, and moments of pure joy in communion with nature, Tesson makes a decidedly out-of-the-ordinary experience relatable. The awe and joy are contagious, and one comes away with the comforting knowledge that as long as there is a cabin deep in the woods, nothing is completely lost.
