Storytellers come to their careers centered on the stories they love and soon realize that in order to make a living at what they love, they must build a business. This in-depth book tells them just how and what to do in every detail, from choosing a sound system to building a website to using podcasts and setting up an office. Resource lists and tried and true ideas abound as the author shares her marketing and business success story throughout. Each chapter is a story in itself, beginning and ending with different traditional folktale openings and closings. There is even a chapter on how to plan for retirement.

Folk Masters Barry Bergey, 2018-03-05 Portraits of one hundred recipients of the United States' highest honor in the folk and traditional arts, captured in their element. Discover one hundred of the greatest folk artists practicing in the United States in *Folk Masters: A Portrait of America*. Over the past twenty-five years, photographer Tom Pich has traveled the country to the homes and studios of recipients of the National Endowment

for the Arts' National Heritage Fellowship, the highest honor given to folk and traditional artists in the nation. His portraits give us a glimpse into their art, their process, and their culture. While each image tells a story on its own, Barry Bergey, former Director of Folk and Traditional Arts at the National Endowment for the Arts, provides further insight into the lives of each featured artist as well as the remarkable stories behind each photograph. Folk Masters honors again the extraordinary women and men who simultaneously take the traditional arts to new heights while ensuring their continuation from generation to generation. "This beautiful, informative, and exquisitely produced book features 100 extraordinary traditional artists from across America, each a recipient of the National Endowment for the Arts National Heritage Fellowship—the nation's highest award for excellence in the folk and traditional arts. Folk Masters is a stunning tribute to the great diversity of cultures and artistic traditions that enrich our country." —Marjorie Hunt, Folklife Curator, Smithsonian Center for Folklife and Cultural Heritage "Folk Masters documents and honors the extraordinary women and men who take traditional arts to new heights while also ensuring their continuation from generation to generation." —The Library of Congress "Folk Masters is visual, emotional, and inspirational. Here is a portrait of America many Americans never see and may not believe actually exists. Pich and Bergey have done an admirable job of conveying their vision." —Journal of Folklore Research

Lowering Suicide Risk in Returning Troops B.K. Wiederhold, 2008-08-20 *Lowering Suicide Risk in Returning Troops: Wounds of War* discusses the topic of increased suicide risk in service men and women around the world. Research has shown that those who have served in both combat missions and peacekeeping operations are at an increased risk for suicide. Research suggests that this may result from their 'wounds of war'. Some wounds may be more 'invisible'; such as depression, posttraumatic stress disorder, and chronic pain, while others are more visibly apparent; such as physical disabilities. Whatever the wound, however, it seems they may all lead to an increased risk of suicide. In this book, many aspects of military suicide and how to effectively deal with this issue are discussed. Specifically, some of the questions raised are: How do we detect those who are vulnerable to increased suicide risk, possibly due to a combination of genetics and past environmental insults? How do we most appropriately assess for increased risk? Once

detected, how do we help to decrease that risk? Are there pre-deployment training methods we can employ to help 'inoculate' individuals against increased risk? Are there in-theater and post-deployment methods most appropriate for dealing with this risk?

Shigeru Miyamoto Jennifer deWinter, 2015-05-21 Video games are considered by many to be just entertainment-essentially void of skillful, artistic intervention. But as any gamer knows, there's incredible technical and graphic talent behind even a flickering Gameboy screen. You may have never heard Shigeru Miyamoto's name, but you've probably spent many a lazy afternoon absorbed in his work. Joining Nintendo as a video game designer in the late 1970s, Miyamoto created the powerhouse franchises Super Mario Bros., The Legend of Zelda, and Donkey Kong-games so ubiquitous that Miyamoto was named one of TIME's 100 Most Influential People in 2007. Combining critical essays with interviews, bibliographies, and striking visuals, Shigeru Miyamoto unveils the artist behind thousands of glowing gaming screens, tracing out his design decisions, aesthetic preferences, and the material conditions that shaped his work. With this incredible (and incredibly unknown) figure, series editors Jennifer DeWinter and Carly Kocurek launch the Influential Video Game Designers series, at last giving these artists the recognition they deserve.

Taiko Boom Shawn Bender, 2012-08-07 Based on ethnographic fieldwork conducted among taiko groups in Japan, 'Taiko Boom' explores the origins of taiko in the early postwar period and its popularization over the following decades of rapid economic growth in Japan's cities and countryside.

Persuasive Games Ian Bogost, 2010-08-13 An exploration of the way videogames mount arguments and make expressive statements about the world that analyzes their unique persuasive power in

terms of their computational properties. Videogames are an expressive medium, and a persuasive medium; they represent how real and imagined systems work, and they invite players to interact with those systems and form judgments about them. In this innovative analysis, Ian Bogost examines the way videogames mount arguments and influence players. Drawing on the 2,500-year history of rhetoric, the study of persuasive expression, Bogost analyzes rhetoric's unique function in software in general and videogames in particular. The field of media studies already analyzes visual rhetoric, the art of using imagery and visual representation persuasively. Bogost argues that videogames, thanks to their basic representational mode of procedurality (rule-based representations and interactions), open a new domain for persuasion; they realize a new form of rhetoric. Bogost calls this new form procedural rhetoric, a type of rhetoric tied to the core affordances of computers: running processes and executing rule-based symbolic manipulation. He argues further that videogames have a unique persuasive power that goes beyond other forms of computational persuasion. Not only can videogames support existing social and cultural positions, but they can also disrupt and change these positions themselves, leading to potentially significant long-term social change. Bogost looks at three areas in which videogame persuasion has already taken form and shows considerable potential: politics, advertising, and learning.

Mario Titles ,

Keys to Play Roger Moseley, 2016-10-28 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program for monographs. Visit www.luminosoa.org to learn more. How do keyboards make music playable? Drawing on theories of media, systems, and cultural techniques, *Keys to Play* spans Greek myth and contemporary Japanese digital games to chart a genealogy of musical play and its animation via improvisation, performance, and recreation. As a paradigmatic digital interface, the keyboard forms a field of play on which the book's diverse objects of inquiry—from clavichords to PCs and eighteenth-century musical dice games to the latest rhythm-action titles—enter into analogical relations. Remapping the keyboard's topography by way of Mozart and Super Mario, who head an expansive cast of historical and virtual actors, *Keys to Play* invites readers to unlock ludic dimensions of music that are at once old and new.

Game Preview Nicolae Sfetcu, 2014-05-04 A guide for game preview and rules: history, definitions, classification, theory, video game consoles, cheating, links, etc. While many different subdivisions have been proposed, anthropologists classify games under three major headings, and have drawn some conclusions as to the social bases

that each sort of game requires. They divide games broadly into, games of pure skill, such as hopscotch and target shooting; games of pure strategy, such as checkers, go, or tic-tac-toe; and games of chance, such as craps and snakes and ladders. A guide for game preview and rules: history, definitions, classification, theory, video game consoles, cheating, links, etc.
