In the 2040s, the human race desired in the atomic beneficence and was reaching the atomic times which are at the height of prosperity. On the way which returns to NASA after spending the New Year holiday in Japan on January 3rd in 2050, Takeru and Rumi of the undergraduate arrived at San Francisco Airport in America. They were space Pilot's egg. When thinking whether or not it felt the shake of the disastrous earthquake for several seconds while resting at the airport lobby, the huge explosive sound as earsplitting in the moment occurred. The airplanes to be flying in the air began to collide in the air. Moreover, at the ground, it occurred in the place where the crash among the trains and the crash among the cars result and surely, it took on an aspect as it sees hell. Moreover, 5 minutes later, the time speed of the earth had begun to decline gradually. The body that the influence of the extraordinary magnetic field began to shrink Naotsune in the sun gradually and to have come and for the distribution of the dark matter which exists at the interplanetary in the solar system which was keeping a balance to have begun a malfunction in the past As for the earthquake with mighty magnitude 9.0 which occurred in San Francisco on January 3rd in 2050, the nuclear reactor in all-America each place made a meltdown occur in the influence of the earthquake. After that, the shocking truth that the energy of the huge atomic-explosion did a leak to the superconductive cable which was set up around the all-America mainland through the power-transmission wire at the exploded nuclear power plant and that it caused the huge extraordinary magnetic field came to light. Most of the machines by which a computer system and an IC chip all over the world were embedded were cruelly, too, destroyed and all the information of the person, goods, the money had disappeared with the occurrence of the huge magnetic field this time. Moreover, in the whole world, the atomic dust of radioactivity material diffused, and the human race sheltered in the shelter which got ready in the underground depth and became the status that it cannot help being content with the cellar life. In the next day of the worldwide destruction which is due to the extraordinary magnetic field, the leader in the whole world gathered to the United Nations and reviewed the ideal way of the world in the future. As a result, it resulted in the conclusion that there is a alternative only in only 6 month grace's there being and immigrating to the other planet even if it estimates the shelter life of the human race long. It is an immigration to the twin earth. After that, the formation to seem a huge spacecraft by the distant sky in each main city in the whole world *of* showed the appearance. It is the group of the spaceman who did the appearance of the human race and the Tweedledum and Tweedledee that appeared at the ground from the inside of the formation of the spacecraft which was staying in the of metropolis sky. They called the earth in the twin planet which they live in Muses. It said that it came to sense the critical status of the earth this time via 200 pieces of Mannen and to extend a hand. Takeru and Rumi were chosen as the selection member and about 1 month as Team Member which scouts the other party, stayed at the earth in the twin planet. In the story of the Muses person, they seem equipped with the ability for the elasticity of the speed in the time to be able to be controlled, being free by the individual level. Therefore, it is possible for night to rejuvenate the age if it takes medicine for the rejuvenation, Powers, by 1 tablet if it can be chosen, being free and wanting to return in the young period. Likewise, if swallowing Powers for aging if wanting to return to the elderly, it is possible to be transformed into the elderly. Saying that it prepares for the interior of the body in the associating time machine feature in the past, the future at present In Muses which the genetic engineering cleared up by developing exceedingly and multiplying 10 pieces of Mannen all of the mysteries of the life-phenomenon, it is the society which can control a life perfectly. The love is a free love and the concept, the marriage, doesn't exist. Its copy can be created by making cultivate it while being in home using the life hatch equipment, too. A born double is already transplanted in the experience and the memory like him. Because the speed in the time can be controlled, there are not concepts such as the productivity and the value, the efficiency, too, in Muses and the one which becomes the root of the various evils such as the money, too, doesn't exist. However, in Muses, the population increased explosively and reached 100 times the earth, too. It is in the water resources and the source of protein in the rich earth that they aimed secretly. The terrestrial kind immigrated to Muses and was immersed to the life of the paradise in Muses but it had begun to notice a sense of incongruity. There, it was dense or the god of the omniscient and almighty evil in the galactic system at the four dimensions space boiled and was making the holocaust plan of the earth people-out progress.

The Japanese Myths: A Guide to Gods, Heroes and Spirits (Myths) Joshua Frydman, 2022-07-05 An illustrated guide to the fantastic world of Japanese myths: retelling the stories and exploring how Japanese mythology has changed over time, as new gods, heroes, and spirits have entered the canon. While people around the world love Japan's cultural exports—from manga and anime to Zen—not everyone is familiar with Japan's unique mythology that shapes these interests, which is enriched by Shinto, Buddhism, and regional folklore. The Japanese Myths is a smart and succinct guide to the rich tradition of Japanese mythology, from the earliest recorded legends of Izanagi and Izanami with their divine offspring and the creation of Japan, to medieval tales of vengeful ghosts, through to the modern-day reincarnation of ancient deities as the heroes of mecha anime. Mythology remains a living, evolving part of Japanese society. The ways in which the people of Japan understand their myths are very different today even from a century ago, let alone over a millennium into the past. This volume not only retells these ancient stories but also considers their place within the patterns of Japanese religions, culture, and history, helping readers understand the deep links between past and present in Japan, and the ways these myths live and grow. Author Joshua Frydman takes the very earliest written myths in the Kojiki and the Nihon Shoki as his starting point, and from there traces Japan's mythology through to post-war State Shinto, the rise of the manga industry in the 1960s, J-horror, and modern-day myths. Frydman ties in reinventions and retellings of myths that are present across all genres of contemporary Japanese culture, from its auteur cinema to renowned video games such as Okami. This book is for anyone interested in Japan and Japanese exports, as knowing its myths allows readers to understand and appreciate its culture in a new light.

Eccentric Spaces, Hidden Histories David Bialock, 2007-02-01 After The Tale of Genji (c. 1000), the greatest work of classical Japanese literature is the historical narrative The Tale of the Heike (13th-14th centuries). In addition to opening up fresh perspectives on the Heike narratives, this study also draws attention to a range of problems centered on the interrelationship between narrative, ritual space, and Japan's changing views of China as they bear on depictions of the emperor's authority, warriors, and marginal population going all the way back to the Nara period. By situating the Heike in this long temporal framework, the author sheds light on a hidden history of royal authority that was entangled in Daoist and yin-yang ideas in the Nara period, practices centered on defilement in the Heian period, and Buddhist doctrines pertaining to original enlightenment in the medieval period, all of which resurface and combine in Heike's narrative world. In introducing for the first time the full range of Heike narrative to students

and scholars of Japanese literature, the author argues that we must also reexamine our understanding of the literature, ritual, and culture of the Heian and Nara periods.

World Mythology Roy G. Willis,1993 The great myths of the world create meaning out of the fundamental events of human existence: birth, death, conflict, loss, reconciliation, the cycle of the seasons. They speak to us of life itself in voices still intelligible, yet compellingly strange and distant. World Mythology offers readers an authoritative and wide-ranging guide to these enduring mythological traditions, combining the pure narrative of the myths themselves with the background necessary for more complete understanding. Here, noted mythology expert Roy Willis, brings together a team of nineteen leading scholars navigate a clear path through the complexities of myth as they distill the essence of each regional tradition and focus on the most significant figures and the most enthralling stories. All aspects of the world's key mythologies are covered, from tales of warring deities and demons to stories of revenge and metamorphosis; from accounts of lustful gods and star-crossed human lovers to journeys in the underworld. All are told at length and are accompanied by illuminating and readable introductory text. Also included are summaries of important theories about the origins and meaning of myth, and an examination of themes that recur across a range of civilizations. Beautifully illustrated with more than 500 color photographs, works of art, charts, and maps, World Mythology offers readers the most accessible guide yet to the heritage of the world's imagination.

A Waka Anthology Edwin A. Cranston,1998-03-01 The Gem-Glistening Cup is the second volume of Edwin Cranston's monumental Waka Anthology which carries the story of waka, the classical tradition of Japanese poetry, from its beginnings in ancient song to the sixteenth century. The present volume, which contains almost 1,600 songs and poems, covers the period from the earliest times to 784, and includes many of the finest works in the literatures as well as providing evocative glimpses of the spirit and folkways of early Japanese civilization. The texts drawn upon for the poems are the ancient chronicles Kojiki, Nihonshoki, and Shoku Nihongi; the fudoki, a set of eighth-century local gazetteers; Man'yoshu, the massive eighth-century compendium of early poetry (about one fourth of that work is included); and the Bussokuseki poems carved on a stone tablet at a temple in Nara. All poems are presented in facing romanization and translation.

Men in Metal Sven Saaler,2020-10-12 In his pioneering study, Men in Metal, Sven Saaler examines Japanese public statuary as a central site of historical memory from its beginnings in the Meiji period through the twenty-first century. Saaler shows how the elites of the modern Japanese nation-state went about constructing an iconography of national heroes to serve their agenda of instilling national (and nationalist) thinking into the masses. Based on a wide range of hitherto untapped primary sources, Saaler combines data-driven quantitative analysis and in-depth case studies to identify the categories and historical figures that dominated public space. Men in Metal also explores the agents behind this visualized form of the politics of memory and introduces historiographical controversies surrounding statue-building in modern Japan.
