Galveston's the Elissa Kurt D. Voss, 2009 For nearly three decades, the 1877 sailing ship Elissa has been widely recognized as one of the finest maritime preservation projects in the world. Unlike some tall ships of today, the Elissa is not a replica but a survivor. Over her century-long commercial history, she carried cargoes to ports around the world for a succession of owners. Her working life as a freighter came to an end in Piraeus, Greece, where she was rescued from the salvage yard by a variety of ship preservationists who refused to let her die. The story of Elissa's discovery and restoration by the Galveston Historical Foundation is nothing short of miraculous.

Tall Ship Sailor Dan Hayden, 2021-07-14 To a regular passerby, the ship seemed as if it was a lonesome thing, abandoned and forgotten. The disarray of normally taut lines and sheets that hung loosely from their

spars suggested the ship had been inactive and somewhat neglected. A traditionally active sailing vessel, normally full of human activity, was now quiet and dormant, aching for action and people to occupy her decks. The wind from the busy harbor whistled by her wooden masts and through her hundreds of lines making an eerie sound. The gentle rocking of the ship creaked in unison as the waves lapped against the wharf's old wooden piers. The Defiant waited. Soon there would be an opportunity.

Fair Wind and Plenty of It Rigel Crockett, 2010-07-23 In the tradition of *Godforsaken Sea* and *In the Heart of the Sea*, *Fair Wind and Plenty of It* is a virtuoso debut by a sailor turned scribe -- a must-read for lovers of nautical adventure. On November 25th, 1997, the barque *Picton Castle*, a three-masted, square-rigged tall ship, headed out from Lunenburg, Nova Scotia on a voyage around the world. Aboard ship a shifting crew of thirty, a combination of professional sailors and paying crew who were out \$32,500 for the privilege of working "crew before the mast," would travel for over a year and half, calling in at ports as exotic and varied as Aruba, Samoa, Bali and Zanzibar. *Fair Wind and Plenty of It* tells the story of an obsession, as Captain Dan Moreland, driven by a desire to make his mark in the world of traditional sail, rallies forces to convert a sixty-nine-year-old North Sea trawler into a seaworthy tall ship, and then assembles the crew to sail it. It's the story of the uneasy balance that is achieved on board, where insubordination and rancor must be kept in line among a crew whose only connection is their common desire to be part of this journey. And it is Rigel's story: a man who was conceived the day his father laid the keel for his first boat, whose mother was a sailmaker, and who has to reconcile his family legacy with his own need to understand why he must take part in the voyage of the barque *Picton Castle*. In *Fair*

Wind and Plenty of It, Rigel Crockett tells a tale of shipboard camaraderie, gut-wrenching struggles and the near-mutinies that marked the year-and-a half journey -- where fellow shipmates proved to be as perilous as the ever-present sea.

U.S.C.G. Barque Eagle : America's Tall Ship ,1989

Tall Ships Down Daniel S. Parrott,2004 Technologically outmoded and once nearly swept from the seas, tall ships have experienced a fifty-year renaissance as sail training and passenger vessels, and we are the richer for it. After all, what sight has more power to stir the soul than a tall ship under sail with its acres of canvas and miles of rigging? But that resurgence has had a tragic side, and professional mariner and maritime scholar Dan Parrott explores it in Tall Ships Down, a groundbreaking reconstruction of the losses of the 316-foot barque Pamir in 1957; the 117-foot brigantine Albatross in 1961; the 117-foot barque Marques in 1984; the 137-foot Pride of Baltimore in 1986; and the 125-foot brig Maria Asumpta in 1995. Together, these disasters claimed 112 lives. The stories of these majestic ships have been subject to mystery and distortion. In some instances even the survivors could not explain what went wrong, and in others the

official inquiries failed to articulate the most critical lessons hidden in the sudden, terrible catastrophes - until now. Parrott traces the history of each ship from its building and early career through subsequent owners' modifications. His vivid re-creations of each final voyage dissect the circumstances of loss from forensic evidence, expert testimony, survivors' memories, and his own considerable experience. Carefully examined, the evidence shows that, contrary to some official findings, ignorance of and disregard for age-old practices of seamanship were at least as responsible for the tragedies as acts of God. In some instances the seeds of a ship's ultimate undoing were planted years before, as ill-considered structural changes, rig modifications, and mission creep eroded its stability and seaworthiness. Cargo loose in holds, hatches unsecured at sea, freeing ports timbered shut, failure to preserve proper sea room - these and other factors emerge from Parrott's analysis as contributing factors. --Book Jacket.

Sailing to the Far Horizon Pamela Sisman Bitterman, 2012-08-04 The tall ship Sofia sank off New Zealand's North Island in February 1982, stranding its crew on disabled life rafts for five days. They struggled to survive as any realistic hope of rescue dwindled. Just a few years earlier, Pamela Sisman Bitterman was a naïve swabbie looking for adventure, signing on with a sailing co-operative taking this sixty-year-old, 123-foot, three-masted gaff-topsail schooner around the globe. The aged Baltic trader had been rescued from a wooden boat graveyard in Sweden and reincarnated as a floating commune in the 1960s. By the time Sofia went down, Bitterman had become an able seaman, promoted first to bos'un and then acting first mate, immersing herself in this life of a tall ship sailor, world traveler, and survivor.

The Gathering Wind Gregory A. Freeman, 2013-10-29 October 2012. A replica of the famous HMS *Bounty*, an eighteenth-century tall sailing ship, set a collision course with a storm that became the largest hurricane ever recorded in the Atlantic—a clash that proved to be one of the most unforgettable stories of Superstorm Sandy. The *Bounty*, crewed by an eclectic team of seafarers and led by highly respected captain Robin Walbridge, departed from Connecticut as Sandy raced north. Walbridge, whose decisions decided the fate of his ship and crew, attempted to outmaneuver the storm by heading southeast. As violent gusts tossed the wooden vessel, the crew fought to save their ship—and themselves. When the storm finally overtook the ship, the crew was tossed into the churning sea. The men and women of a Coast

Guard station in North Carolina courageously flew into hundred-mile-per-hour winds to rescue the survivors of the *Bounty*. After hours of white-knuckle flying, they accomplished one of their most memorable rescues ever. Based on interviews with *Bounty* survivors and unfettered access to Coast Guard rescue team members, *The Gathering Wind* is the most complete account of this heartbreaking, thrilling, and inspirational story.
