The Routledge Companion to Media and Tourism Maria Månsson, Annæ Buchmann, Cecilia Cassinger, Lena Eskilsson, 2020-07-07 The Routledge Companion to Media and Tourism provides a comprehensive overview of the research into the convergence of media and tourism and specifically investigates the concept of mediatized tourism. This Companion offers a holistic look at the relationship between media and tourism by drawing from a global range of contributions by scholars from disciplines across the humanities and social sciences. The book is divided into five parts, covering diverse aspects of mediatization of tourism including place and space, representation, cultural production, and transmedia. It features a comprehensive theoretical introduction and an afterword by leading scholars in this emerging field, delving into the ways in which different forms of media content and consumption converge, and the consequential effects on tourism and tourists. The collection is an invaluable resource for students and scholars of tourism studies, cultural studies, and media and

communication, as well as those with a particular interest in mediatization, convergence culture, and contemporary culture.

Anime's Identity Stevie Suan, 2021-11-09 A formal approach to anime rethinks globalization and transnationality under neoliberalism Anime has become synonymous with Japanese culture, but its global reach raises a perplexing question—what happens when anime is produced outside of Japan? Who actually makes anime, and how can this help us rethink notions of cultural production? In *Anime's Identity*, Stevie Suan examines how anime's recognizable media-form—no matter where it is produced—reflects the problematics of globalization. The result is an incisive look at not only anime but also the tensions of transnationality. Far from valorizing the individualistic “originality” so often touted in national creative industries, anime reveals an alternate type of creativity based in repetition and variation. In exploring this alternative creativity and its accompanying aesthetics, Suan examines anime from fresh angles, including considerations of how anime operates like a brand of media, the intricacies of anime production occurring across national borders, inquiries into the selfhood involved in

anime's character acting, and analyses of various anime works that present differing modes of transnationality. *Anime's Identity* deftly merges theories from media studies and performance studies, introducing innovative formal concepts that connect anime to questions of dislocation on a global scale, creating a transformative new lens for analyzing popular media.

Anime Jonathan Clements, 2023-08-24 Japanese animation is at the nexus of an international multimedia industry worth over \$23.6 billion a year, linked to everything from manga to computer games, Pokémon and plushies. In this comprehensive guide, Jonathan Clements chronicles the production and reception history of the entire medium, from a handful of hobbyists in the 1910s to the Oscar-winning *Spirited Away* and beyond. Exploring the cultural and technological developments of the past century, Clements addresses how anime's history has been written by Japanese scholars, and covers previously neglected topics such as wartime instructional animation and work-for-hire for American clients. Founded on the testimonies of industry professionals, and drawing on a myriad of Japanese-language documents, memoirs and books, *Anime: A History* illuminates the anime business

from the inside – investigating its innovators, its unsung heroes and its controversies. This new edition has been updated and revised throughout, with full colour illustrations and three new chapters on anime's fortunes among Chinese audiences and subcontractors, 21st century trends in 'otaku economics', and the huge transformations brought about by the rise of global streaming technology.

En el jardín de lirios. El amor entre mujeres en la cultura pop asiática Alexandra Arana Blas,María

Alexandra Arana Blas, 2022-01-15 Desde la apertura de Japón en 1858, y con la llegada de un pensamiento occidental que influyó en el sistema médico, familiar, político y educativo japonés, vemos una mayor participación de la mujer en la esfera pública, en especial en espacios como la escuela, el arte y la literatura. De estos, la educación es una de las más importantes, pues permitió a las jóvenes aplazar el matrimonio y, a través de los dormitorios femeninos y las revistas para chicas (shōjo zasshi), encontraron un lugar donde expresarse con libertad y descubrir su sexualidad. Esto, sumado a los procesos de industrialización y dinamización de la economía, permitió a inicios del siglo XX el surgimiento de una cultura de chicas (shōjo bunka), donde nace la literatura de Clase S, un género melodramático que presenta los matices que tienen las amistades femeninas: desde la nostalgia y la admiración, hasta el amor platónico y la atracción sexual. De dicha tradición nace el manga shōjo, el cual se escinde en el siglo XXI y crea el manga yuri. Muchos fueron los países que se vieron influenciados por esta presentación del lesbianismo y la atracción entre mujeres, entre ellos China, Corea e incluso el Perú. Esto, gracias a la exportación de anime, los procesos de globalización y el

acceso al Internet. «En el jardín de lirios. El amor entre mujeres en la cultura pop asiática» recopila diversos trabajos de Alexandra Arana que abordan este tema en el anime, manga, videojuegos, manhwa, manhwa y manga peruano. Con ellos no solo nos presenta el contexto en el que nacieron dichas obras, sino también los múltiples usos y formas de representar el deseo entre mujeres a nivel narrativo.

Two Japanese Christian Heroes Johannes Laures, Ph.D.,2009-11-10 This true story of Christian martyrdom takes place in feudal Japan. The Christian world will always marvel how in less than two generations the Gospel seed struck such deep roots in Japan that thousands of converts were ready to lay down their lives for Christ. True it is that many Japanese martyrs died for their faith are now canonized and beatified. Among many who did not obtain the crown of martyrdom there are not a few, both men and women, who, by their heroic virtue, were an inspiration to their contemporaries. Among the most outstanding are Justo Takayama Ukon and Gracia Hosokawa Tamako, to whom these pages are devoted. Father Laures describes vividly and accurately in these stories of Two Japanese Christian

Heroes the trials and hardships of the early Catholic fathers and of their converts, their deep faith and the great spiritual strength that fortified their amazing endurance. In addition, he depicts with great insight the background of the old feudal days, the personal relationship of samurai to their lords, to their wives and to their families, as well as the political and social conditions of those days.

100 Animated Feature Films Andrew Osmond, 2019-07-25 Twenty years ago, animated features were widely perceived as cartoons for children. Today, though, they encompass an astonishing range of films, styles and techniques. There is the powerful adult drama of *Waltz with Bashir*; the Gallic sophistication of *Belleville Rendez-Vous*; the eye-popping violence of Japan's *Akira*; and the stop-motion whimsy of *Wallace & Gromit in The Curse of the Were-Rabbit*. Andrew Osmond provides an entertaining and illuminating guide to the endlessly diverse world of animated features, with entries on 100 of the most interesting and important animated films from around the world, from the 1920s to the present day. There are key studio brands such as Disney, Pixar and Dreamworks, but there are also recognised auteur directors such as America's Brad Bird (*The Incredibles*) and Japan's Hayao

Miyazaki (Spirited Away). Technologies such as motion-capture, used in films such as Avatar, blur the distinctions between live-action and animation. Meanwhile, lone artists such as Nina Paley (Sita Sings the Blues) and Bill Plympton (Idiots and Angels) make entire films by themselves. Blending in-depth history and criticism, 100 Animated Feature Films balances the blockbusters with local success stories from Eastern Europe to Hong Kong. There are entries on Dreamworks' Shrek, Pixar's Toy Story, and Disney's The Jungle Book, but you will also find pieces on Germany's silhouette-based The Adventures of Prince Achmed, the oldest surviving animated feature; on the thirty year production of Richard Williams' legendary opus, The Thief and the Cobbler; and on the lost work of Argentina's Quirino Cristiani, who reputedly made the first animated feature in 1917.

It may end with a creative investment funding strategy. But at its heart, its very core, a business plan must address the fundamental operating principles of management accounting from a pragmatic nuts and bolts perspective. This book will focus on the fundamental steps of business planning within a managerial accounting framework, those being: (a) the business model, (b) volume and process flow, (c) product

and service costing, (d) revenue and pricing, and (e) investment value. It will also use the core principles of risk management to address challenges that inevitably arise whenever situations fail to unfold according to plan.
