Environmental Impact C. A. Brebbia,Tae Soo Chon,2012 The interdisciplinary conference addressed some of the most serious problems affecting sustainable development, issues that must be considered by development projects in order to provide complete solutions. A major motivation for the meeting was to learn from past failures and avoid repeating similar mistakes while attempting to prevent emerging threats to the environmental and ecological systems by developing more constructive and progressive approaches to ensure sustainability--Publisher information.

A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant,2014-06-03 First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

Saivism and the Tantric Traditions ,2020-08-03 Academic study of the tantric traditions has blossomed in recent decades, in no small measure thanks to the magisterial contributions of Alexis G. J. S. Sanderson, until 2015 Spalding Professor of Eastern Religions and Ethics at Oxford University. This collection of essays honours him and touches several fields of Indology that he has helped to shape (or, in the case of the Śaiva religions, revolutionised): the history, ritual, and philosophies of tantric Buddhism, Śaivism and Vaiṣṇavism; religious art and architecture; and Sanskrit belles lettres. Grateful former students, joined by other experts influenced by his scholarship, here offer papers that make significant contributions to our understanding of the cultural, religious, political, and intellectual histories of premodern South and Southeast Asia. Contributors are: Peter Bisschop, Judit Törzsök, Alex Watson, Isabelle Ratié, Christopher Wallis, Péter-Dániel Szántó, Srilata Raman, Csaba Dezső, Gergely Hidas, Nina Mirnig, John Nemec, Bihani Sarkar, Jürgen Hanneder, Diwakar Acharya, James Mallinson, Csaba Kiss, Jason Birch, Elizabeth Mills, Ryugen Tanemura, Anthony Tribe, and Parul Dave-Mukherji.

Center Truck Performance on Low-floor Light Rail Vehicles Trevor Griffin,Transit Cooperative Research Program,2006 TRB's Transit Cooperative Research Program (TCRP) Report 114: Center Truck Performance on Low-Floor Light Rail Vehicles examines performance issues observed in the operation of low-floor light rail vehicle (LFLRV) center trucks (focusing on 70-percent low-floor vehicles), such as excessive wheel wear and noise and occasional derailments, and provides proposed guidance on how to minimize or avoid these issues. The report also includes

suggestions on LFLRV specifications, maintenance, and design, as well as on related infrastructure design and maintenance, to maximize performance of these LFLRV center trucks--Publisher's description.

Kriyāsaṃgrahapañjikā Ryugen Tanemura,2004 A critical edition and annotated translations of selected sections.

Transportation-Network Maps Jack Gillett,Meg Gillett,2012-08-15 Each title in the series addresses an environmental topic and illustrated its aspects with the help of maps. An introductory spread presents the topic and explains key ideas, concepts and vocabulary. Twelve spreads each introduce an area of the world, including a map locating relevant sites, graphs offering comparative data and photography. A spread at the back of the book provides further study and comparison exercises

Trams and Buses on Stamps Howard Piltz,2021-07-28 In this, the fourth edition of the Transport Philately series the author looks at the treatment of transport using roads rather than rail or air. There have been some particularly attractive and colorful issues of stamps over the years ranging from a trio of beautifully presented illustrations of Israel's early buses to the well-known issue of double-deck buses produced by the Royal Mail in 2001, and who incidentally have seen the commercial opportunity by accompanying many issues with other paraphernalia, including a gentleman's tie featuring many of the bus illustrations. A well-known colleague in the Public Transport world still wears his! Buses certainly are not as popular in the world of stamps as possibly aviation or wild-life, and trolleybuses even less so but the author has succeeded in finding a few, some of which are illustrated. Tramways, on the other hand, are a blessing to any collector with selections many and varied, some featuring trams from the beginning of the 20th century for their heritage interest to others providing an outlet of national or local pride at the inauguration of today's systems in developed and developing countries across the world. Never a year goes by without a new issue appearing somewhere in the world and the author likes to keep an eye on several sources of information including regular publications from the renowned Stanley Gibbons organisation, the fount of all knowledge concerning philately, as well as other equally valuable contemporary publishers. Then there are regular stamp fairs held throughout the UK and the world where dealers compete for your business, and at some of the bigger occasions – the postal authorities themselves. On your computer are the various internet sites and auction platforms where there can often be some real surprises and bargains to be found.

Air Pollution Nineteen C. A. Brebbia,2011 Air Pollution is widespread and a growing challenge to the international community, with clear known impacts on local and global health and the environment. Governments face a need to balance concern over these impacts with maintaining or improving economic development. Science is the key to identifying the nature and scale of air pollution impacts and is essential in the formulation of effective policies and regulations. Our knowledge of the fundamental science of air pollution and its application continurd to improve, enabling us to better predict, assess and mitigate the air pollution implications to local, regional, national and international economic systems. This book contains papers presented at the nineteenth in the successful series of annual International Conferences dealing with Modelling, Monitoring and Management of Air

Pollution. The papers deal with advances in a wide variety of topics, including: Air Pollution Modelling; Air Quality Management; Emission Studies; Monitoring and Measuring; Aerosols and Particles; Atmospheric Chemistry; Indoor Air Pollution; Policy Studies; Climate Change and Air Pollution; Regional and Global Studies; Exposure and Health Effects; Rural Pollution Studies; Air Pollution Effects on Ecosystems; Air Pollution Mitigation; Case Studies.

Palaeomagnetism in Fold and Thrust Belts: New Perspectives E.L. Pueyo,F. Cifelli,A.J. Sussman ,B. Oliva-Urcia ,2016-08-23 Palaeomagnetism is a technique used to understand complex deformation patterns in fold-and-thrust belts; it can be used to characterize the distribution, magnitude and timing of vertical axis rotations, an elusive variable using other methods. A combination of palaeomagnetic and structural geology analyses has helped to unravel the geometry and kinematics of fold-and-thrust belts around the world and of different geological ages for more than 50 years. This volume comprises three sections: the first shows thorough overviews of western Mediterranean arcs and the western Carpathians; the second depicts several examples from the Andes, the Alps, Anatolia, Pyrenees, Iberian Ranges and the Atlas; and the third shows the latest research on the use of palaeomagnetism to understand fold-and-thrust belts in 3D and 4D in a more quantitative way and it also includes some methodological proposals to avoid common errors. In the papers of the first two sections, the combination of palaeomagnetic analyses with structural data, AMS or magnetostratigraphic analyses demonstrate the usefulness of palaeomagnetism in deciphering complex deformation patterns in fold-and-thrust belts.

The Quartet of Causeries Vara-ruchi,Shyamilaka,Vararuci,Shudraka,Īśvaradatta,Ishvara-datta,2009-08 The Four Soliloquies have been handed down as a collection of the most ancient monologue farces in classical Sanskrit.

Czech and Slovak Railways Ketih Fender,2022-08-31 The Czech Republic and Slovakia emerged as independent countries in 1993, as joint successors of the former Czechoslovakia. Having once been a single country, with a single national railway operator, the change was significant, although both countries, and their railways, still have a lot in common. Loco types have changed through modernization and rebuilding, and both countries have retained very different narrow-gauge systems that are still in daily operation. Both countries have invested in modern fleets, and rail freight has boomed thanks to globalization and EU membership, resulting in a wide variety of trains. Spanning three decades, this book explores the history of both countries and their railways, and features over 140 pictures, most of which have never been published before. The book concludes by looking at the ambitious plans for new high-speed networks, connecting both countries, and most of their neighbors by the late 2030s.
