

Taurus Aldebaran

Nick Addey

Taurus Joanna Martine Woolfolk, 2011-11-16 Your Sun sign (often referred to simply as your sign) is the zodiac sign the Sun was traveling through at the time of your birth. Your Sun sign is the most important and pervasive influence in your horoscope and in many ways determines how others see you. It governs your individuality, your distinctive style, and your drive to fulfill your goals. It symbolizes the role you are given to play in this life. It's as if at the moment of your birth you were pushed onstage into a drama called This Is My Life. In this drama, you are the starring actor—and your sign is the character you play. This elegant little volume is packed with what your Sun sign tells you about you. You'll read about your many positive qualities as well as your negative issues and inclinations. You'll find insights into your power, potentials, and pitfalls; advice about relationships, love, and sex; clarification on erogenous zones and how you combine romantically with other signs; guidance regarding career, health, and diet; and information about myriads of objects, places, concepts, and things to which you're attached. You'll also find topics not usually included in other astrology books—such as how you fit in with Chinese astrology and with numerology.

Three Hundred and Sixty Five Starry Nights Chet Raymo, 1990-01-30 AN INTRODUCTION TO ASTRONOMY FOR EVERY NIGHT OF THE YEAR.

A Year of the Stars Fred Schaaf, 2010-08-25 ...an essential addition to every astronomy enthusiast's library...a book that can be used many years hence and remain as timeless as the science it glorifies. -Eyepiece Fred Schaaf is one of the most experienced astronomical observers of our time. For more than two decades his view of the sky - what will be visible, when it will be visible, and what it will look like - has encouraged tens of thousands of people to turn their eyes skyward. Now Fred's knowledge and enthusiasm paints the sky into a single book, which will be a wonderful resource. - David H. Levy, Science Editor, Parade Magazine, discoverer of 21 comets, and author of *Starry Night* and *Cosmic Discoveries* Fred Schaaf is a poet of the stars. He brings the sky into people's lives in a way that is compelling and his descriptions have all the impact of witnessing the stars on a crystal clear dark night. - William Sheehan, author of *Mars: The Lure of the Red Planet* and *The Transits of Venus* The ideal book for the amateur astronomer or anyone curious about our place in the universe, *A Year of the Stars* takes the reader on a fascinating journey of discovery through the seasons of the starry night sky. Acclaimed popular science writer Fred Schaaf, who has written the monthly stars and planets columns for *Sky & Telescope* magazine for over ten years, has created this eloquent guide that both beginners and veteran skywatchers will find rewarding. Schaaf leads off with an introductory section that provides fundamental knowledge about astronomy, so that even the complete novice can plunge into the book at any month and follow the discussion. The section starts with naked-eye astronomy, describing how the starry heavens are mapped and organized. It then delves into telescopic astronomy, explaining the basic structure of the universe (including the various kinds of stars, star clusters, nebulae, and galaxies) and offering advice about selecting and using telescopes and binoculars. The rest of the book uses a month-by-month organization, highlighting the constellations, stars, deep-sky objects, meteor showers, and other special phenomena visible each month, with many fascinating insights into the science, history, and lore of each month's sights. Schaaf's many years of monthly columns in *Sky & Telescope* and similar writing he has done for many publications (the *Old Farmer's Almanac*, *Mother Earth News*, and others) make him the world's leading expert in the monthly format of astronomy sights. Complete with beautiful maps, drawings, photos, and a very useful glossary, this is the perfect book for savoring the

experience of skywatching the whole year through. Fred Schaaf (Millville, NJ), a contributing editor and columnist for Sky & Telescope and writer of a weekly astronomy newspaper column for more than a quarter-century, is the author of ten books on popular astronomy, including 40 Nights to Knowing the Sky and Comet of the Century.

STARGAZERS' ALMANAC: NAVIGATING THE NIGHT SKY YAMINI MALHOTRA / SR SINGARASUBRAMANIAN, 2023-09-11 Navigating the Night Sky with Stargazers' Almanac In the wide tapestry of the universe, our Earth is but a tiny speck of dust. Yet, every night, as we turn our gazes skyward, we are transported into the boundless expanse of the cosmos. The night sky, adorned with its shimmering stars, holds stories that have captivated humanity for millennia. It's a celestial theatre, where constellations are the actors, and each star, a character in a timeless narrative. Welcome to the Stargazers' Almanac, your celestial companion for the journey through the inky depths of space. In the pages that follow, we will embark on a voyage through the night sky, guided by the brilliance of stars that have inspired countless dreamers, scientists, and storytellers. These stars, each with its unique story and significance, will be our celestial landmarks. Our first stop on this cosmic odyssey is Pollux, the celestial twin of Castor, found in the constellation Gemini. As we gaze upon Pollux, we'll delve into the myths and science surrounding this luminous gem and its celestial sibling. Next, we'll set our course for Arcturus, the Bear Guardian, a brilliant star in the constellation Boötes. Arcturus, like a cosmic lighthouse, has guided travellers for centuries and beckons us to explore its stellar neighbourhood. The fiery and unpredictable Betelgeuse in Orion will capture our attention next. As one of the brightest and most variable stars in the night sky, Betelgeuse has mystified and intrigued stargazers throughout history. Rigel, Orion's Left Foot, will be our fourth stop. This dazzling blue star stands in stark contrast to Betelgeuse and holds its own unique allure. Then, we'll navigate to Sirius, the Dog Star, in the constellation Canis Major. Brighter than any other star, Sirius has been revered by various cultures and holds a special place in the history of astronomy. As we venture into the cosmic ocean, we will also encounter other celestial wonders like Antares, the heart of Scorpius, and Regulus, the regal star in Leo. Each of these stars has its own tale to tell, and in these pages, we will uncover their secrets. But this almanac is not just about stargazing; it's about understanding the cosmos, embracing the stories woven into the night sky, and kindling the flames of curiosity. It's about exploring the science, mythology, and wonder that surround these celestial beacons. With this almanac in hand, you will embark on a journey of discovery, whether you are a seasoned astronomer or a novice stargazer. Together, we will navigate the night sky, uncovering the mysteries of the stars, and forging a deeper connection with the cosmos. So, dear readers and fellow stargazers, let us embark on this celestial adventure, guided by the stars that have ignited the human imagination for eons. The universe awaits, and the Stargazers' Almanac will be your trusted map to the wonders of the night sky.

VOL.1. MARIA ORSIC, THE WOMAN WHO ORIGINATED AND CREATED EARTH'S FIRST UFOS Maximilien De Lafayette, 2013-01-04

VOL.1. MARIA ORSIC, THE WOMAN WHO ORIGINATED AND CREATED EARTH'S FIRST UFOS Published by Art, UFOs & Supernatural Magazine. New York. Maria Orsic, the most important personality in ufology's history. Everything began with Maria Orsic's metaphysical (Occult, channeling and mediumship) movement. The UFO phenomenon and saga, the first contacts with aliens from extraordinarily advanced civilizations beyond our solar system, and extraterrestrials' messages, all started with an occult-metaphysical-mysticism-psychical movement created by Maria Orsic, a medium and founder of the Vrilerinnen (The Vriler Society), and based upon messages she claimed she received from extraterrestrials from Aldebaran (Alpha Tauri), which contained technical data and precise instructions on

how to build a super Out of this World flying machine (UFO). Author's website: www.maximilliendelafoyettebibliography.com

The Power of Stars Bryan E. Penprase, 2017-05-05 Completely revised and updated, this new edition provides a readable, beautifully illustrated journey through world cultures and the vibrant array of sky mythology, creation stories, models of the universe, temples and skyscrapers that each culture has created to celebrate and respond to the power of the night sky. Sections on the archaeoastronomy of South Asia and South East Asia have been expanded, with original photography and new research on temple alignments in Southern India, and new material describing the astronomical practices of Indonesia, Malaysia and other Southeast Asian countries. Beautiful photographs of temples in India and Asia have been added, as well as new diagrams explaining the alignment of these structures and the astronomical underpinnings of temples within the Pallava and Chola cultures. From new fieldwork in the Four Corners region of North America, Dr. Penprase has included accounts of Pueblo skywatching and photographs of ceremonial kivas that help elucidate the rich astronomical knowledge of the Pueblo people. The popular "Archaeoastronomy of Skyscrapers" section of the book has been updated as well, with new interpretations of skyscrapers in Indonesia, Taiwan and China. With the rapid pace of discovery in astronomy and astrophysics, entirely new perspectives are emerging about dark matter, inflation and the future of the universe. The Power of Stars puts these discoveries in context and describes how they fit into the modern perspective of cosmology, which has arisen from the universal human response to the sky that has inspired both ancient and modern cultures.

Camps, Retreats, Missions, and Service Ideas Youth Specialties, 1997 This collection from The Ideas Library has youth ministry ideas that contains how-tos for youth camps, fun retreats, at-home missionary work, and service projects.

Astrogeographia Robert Powell, David Bowden, 2012-10-01 There are many books on the sacredness and the spirituality of our Earth. Few books, however, deal with the relationship between the Earth and the cosmos, which is the central theme for the research presented in this book. Its point of departure is the one-to-one correspondence between the encircling starry heavens—the celestial sphere—and the sphere of the earthly globe. David Bowden has not only worked out the mathematics of this one-to-one correspondence, but has also written a computer program that applies it in practice. Thus, a new science has been born—Astrogeographia—concerning the one-to-one correspondence between the earthly sphere and the celestial sphere.

The Death of Gods in Ancient Egypt Jane Sellers, 2007 Originally published by Penguin Ltd., this revised edition features unusual Egyptian artwork, striking pictures of eclipse phenomena, numerous sky-charts, and computer printouts.

Stars and Planets Ian Ridpath, 2022-09-06 The clearest, most accessible guide to observing the night sky. Introducing the Handbook of Stars and Planets - the perfect beginner's guide to the night sky! With a highly visual introduction that explains the basic concepts of astronomy and gives advice on the best methods and equipment for observation, including binoculars and telescopes, exploring the cosmos and more has never been easier or more accessible. Each of the planets in the Solar System is described and illustrated in detail, with images taken from space probes as well as from the ground, showing them as you can expect to see them. More than 160 star charts were made especially for this book by the Royal Greenwich Observatory. There is a separate detailed chart for each of the 88 constellations, adding up to a complete atlas of the sky. The text for each constellation reveals its history and mythology and lists notable stars, galaxies, nebulae, and other objects. Alongside the constellation profiles is a month-by-month guide, including a set of charts and a user-friendly text guide that picks out the highlights above your head each month. Journal for Star Wisdom 2016 Robert Powell,2015-10-01 Journal for Star Wisdom 2016 includes articles of interest concerning star wisdom (Astrosophy), as well as a guide to the correspondences between stellar configurations during the life of Christ and those of today. This guide comprises a complete sidereal ephemeris and aspectarian, geocentric and heliocentric, for each day throughout the year. Published yearly, new editions are available beginning in October or November for the coming new year. According to Rudolf Steiner, every step taken by Christ during his ministry between the baptism in the Jordan and the resurrection was in harmony with—and an expression of—the cosmos. Journal for Star Wisdom is concerned with these heavenly correspondences during the life of Christ. It is intended to help provide a foundation for cosmic Christianity, the cosmic dimension of Christianity. It is this dimension that has been missing from Christianity in its two-thousand-year history. Readers can begin on this path by contemplating the movements of the Sun, Moon, and planets against the background of the zodiacal constellations (sidereal signs) today in relation to corresponding stellar events during the life of Christ. In this way, the possibility is opened for attuning, in a living way, to the life of Christ in the etheric cosmos. This year's journal begins with an article by Robert Powell on the relationship between the galactic center and Christ's miracle of the healing of the man born blind, followed by an article by Estelle Isaacson about the life of the man born blind, whose name was Celidonius. She has also written on the "star of Lazarus and reading the starry script." Claudia McLaren Lainson's article "The Towers We Build" relates to the planet Uranus and events of our time against the background of the position of Uranus—in 2016, the same as

shortly after Christ's Ascension. She also honors psychologist and astrophysicist William Bento, who died on June 5, 2015, with her "In Memoriam." David Tresemer's article, written with Robert Schiappacasse, expands on a short contribution from William Bento. Brian Gray's article focuses upon the birth of Jesus—in terms of a stellar imagination—in relation to the three kings on the one hand and the shepherds on the other. Nicholas Kollerstrom contributed "Position of the Ancient Star Zodiac," presenting his research into the original scientific definition of the zodiac. The article "Specters" by Kevin Dann takes a unique approach to "The Fall of the Spirits of Darkness," the subject of David Tresemer's article. The monthly commentaries for 2016 by Claudia McLaren Lainson are supported by monthly astronomical previews by Sally Nurney, offering opportunities to observe and experience physically the stellar configurations during 2016. This direct interaction between the human being on Earth and the heavenly beings of the stars develops the capacity to receive their wisdom-filled teachings.
