Volume II: U.S. Navy, U.S. Marine Corps and U.S. Coast Guard Aircraft Lost During World War II -

Listed by Squadron Campbell, Ph. D. Douglas E.

Campbell, 2011-07 During World War II, the U.S. military lost some 35,000 aircraft to enemy action, training incidents, typhoons, aircraft carrier deck mishaps, mechanical failures or just normal wear-and-tear where aircraft were scrapped and used for parts to keep others flying. Many just failed to return from their missions. To date, the 15,069 aircraft represented in this 3-volume set is information initially transferred from hand-written Aircraft History Cards and are the total number of U.S. Navy, Marine Corps and Coast Guard aircraft lost between 7 December 1941 and 15 August 1945, and lost outside the continental United States (CONUS). Volume II represents the information on any aircraft lost that was attached to any of the 713 squadrons listed in the database. Given the thousands of hours that went into this effort, the author hopes that, as a 3-volume set of reference books, it provides assistance to others who are researching ship, squadron and aircraft histories.

The Historic Aircraft and Spacecraft in the Cradle of Aviation Museum Joshua Stoff, 2001-01-01

Excellent pictorial history of famed aircraft and aviation memorabilia depicted in 90 rare photos and illustrations: replica of Lilienthal Glider (1894), the Curtiss JN-4 Jenny, America's most famous WW I airplane; Republic's P-47 Thunderbolt (1945), Grumman's Mobile Lunar Laboratory (Molab, 1964), and many other planes, spacecraft, rockets and missiles. Extensive captions.

US Marine Corps Fighter Squadrons of World War II Barrett Tillman,2014-05-20 The US Marine Corps has a long heritage of aviation excellence, a reputation that was largely built on the impact and performance of the “flying leathernecks” in the bitter fighting in the Pacific during World War II. As the US island-hopping campaign against Japan gathered pace, US Marine Corps fighter squadrons operating legendary Grumman and Vought aircraft became instrumental in the success of amphibious assaults and in breaking fierce enemy resistance, engaging Japanese attack aircraft in the skies and ground-based targets while supporting and protecting US ground forces. The flying

legends Marion Carl, Greg “Pappy” Boyington, Joe Foss and others were all World War II Marine fighter pilots, taking to the skies in Corsairs, Wildcats, Venturas and Hellcats. Aviation historian Barrett Tillman's comprehensive account US Marine Corps Fighter Squadrons of World War II pays homage to these individuals and their mounts, and is packed with historic and organizational details of the squadrons who took to the skies above the Pacific.

California Warbird Survivors 2002 Harold A.

Skaarup,2002-07-18 During the twentieth century, civil and military aviation has played a prominent role in the history and development of California. Commercial operators have exploited the advantages offered by aircraft to overcome its unique challenges of geography and climate. By virtue of California's comparative size and strategic importance on the West Coast of the continental USA, a wide variety of military aircraft have been based there through the years. The list of military aircraft types that made up the tapestry of California aviation is as extensive as the list of legendary figures who have contributed to its amazing history. While most of the military aircraft types no longer grace the airspace over California, many can be viewed in their former splendor as they stand as gate guards or museum exhibits. This booklet provides a comprehensive guide to where these restored aircraft can be found. Complementing the details concerning aircraft specifications and roles, the author has included many facts. Finally, the descriptions of the

recovery, restoration and preservation efforts stand as a tribute to the many volunteers who have devoted time, energy and financial support to ensure this rich heritage is preserved.

U.S. Navy, U.S. Marine Corps and MATS Aircraft Lost During the Korean War: 2017 Edition Douglas E. Campbell, 2016-10-19 The Korean War was the first war in which jet aircraft played a central role. For the initial months of the war, the F9F Panther and other jets dominated North Korea's prop-driven air force and later held their own against the MiGs. Within these pages are listed more than 1,140 U.S. Navy, U.S. Marine Corps and Military Air Transport Service (MATS) aircraft lost during the Korean War. These aircraft were spread across 19 different ships, 126 different squadrons, by 12 aircraft manufacturers building nearly 60 different types and variants to fly into war. The information on dates lost, aircraft type and manufacturer, Bureau Numbers, ship or base assigned, squadron attached, and fate of the pilot and crew, are here. In this 2017 Edition, an alphabetized index of nearly 1,300 names of pilots and crewmembers listed in the book has been added.

Canadian Warplanes Harold A. Skaarup, 2009-11-16 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been flown by members of the Canadian Air Force, Royal Canadian Air Force, Royal Canadian Navy, Canadian Army and the present-day Canadian Forces. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active Canadian squadrons both at home and overseas. 100 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to Canadian service aircraft. For

those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museums current inventory or on display as gate guardians throughout Canada and overseas. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Canadas heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view Canadas Warplane survivors.

US Navy Carrier Aircraft vs IJN Yamato Class Battleships Mark Stille,2015-09-20 As the Pacific War approached a crescendo, the clashes between swarming US Navy carrier aircraft, and the gigantic Imperial Japanese Navy (IJN) Yamato-class battleships became symbolic of the fortunes of the two nations. They also served as a metaphor for the profound changes in naval technology and doctrine that the war had brought about. The two opposing forces were the most powerful of their kind - the Japanese Yamato and Musashi were the biggest most heavily armored and armed battleships ever built, while US carrier aviation had evolved into a well-oiled, war-winning machine. With detailed analysis of the technical features of the opposing war machines and a gripping account of the fighting itself, this vividly illustrated work presents views from the cockpits of US Navy Divebombers, and down the sights of IJN anti-aircraft guns, during two of the most dramatic naval engagements ever fought.

Florida Warplanes Harold A. Skaarup,2010-11-01 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have

been restored and preserved in the state of Florida. The aircraft include those flown by members of the United States Air Force, the United States Navy, the United States Army, the United States Marine Corps, the United States Coast Guard, the Air and Army National Guard, and by various NATO and allied nations as well as a number previously operated by opposition forces in peace and war. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active flying squadrons both at home and overseas. 160 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to American military aircraft. For those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museum's current inventory or on display as gate guardians throughout the State of Florida. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Florida's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view Florida's Warplane survivors.

Naval Air Station Atlantic City Richard V. Porcelli, 2012 Few would guess Atlantic City has a rich aviation history, being instrumental in many technical advances and playing a key role in the defense of the nation. The wartime role of Naval Air Station Atlantic City, commissioned in 1943, was training naval fighter pilots as

well as developing technology and procedures for ground controlled interception of enemy aircraft. After the war, Atlantic City was the site of testing new Navy aircraft as well as the development of all-weather, night-fighting, and attack capabilities. After the Navy left in 1958, the airfield became home to the Federal Aviation Administration's premier research center, a New Jersey Air National Guard jet fighter base, a US Coast Guard air station, and Atlantic City International Airport.

Volume III: U.S. Navy, U.S. Marine Corps and U.S. Coast Guard Aircraft Lost During World War II - Listed by Aircraft Type Campbell, Ph. D. Douglas E.

Volume III represents the total number of aircraft lost by their 176 different types and variants and represents the entire database to date. Given the thousands of hours that went into this effort, the author hopes that, as a 3-volume set of reference books, it provides assistance to others who are researching ship, squadron and aircraft histories.

Canadian Warbird Survivors 2002 Harold A Skaarup, 2001-11-29 The purpose of this handbook is to provide aviation enthusiasts with a simple checklist on where to find the surviving retired military aircraft that are

preserved in Canada. The majority of the Canadian Warbird Survivors are on display within a great number of well maintained aviation museums, many others are displayed as i°gate guardsi± near or in a number of Canadian Forces Bases, and a good number are in the hands of private collectors. Many are not listed in any catalogue, but have been found by i°word of mouth,i± or personal observation. The museum staffs and volunteer organizations throughout Canada have done a particularly good job of preserving the great variety of Canadian military aircraft, illustrated here. Hopefully, as more aircraft are recovered from their crash sites in the bush and restored, traded or brought back from private owners, they too will be added to the record. The book lists the aircraft alphabetically by manufacturer, number and type. This list is also appended with a brief summary of the aircraft presently on display within the nation and a bit of its history within the Canadian Forces. Canadian Warbirds books are available through the iUniverse.com or the Amazon.com online bookstores.
