Toluene Diisocyanate from Toluene - Cost Analysis - TDI E21A Intratec,2019-09-17 This report presents a cost analysis of Toluene Diisocyanate (TDI) production from toluene. The process examined is a typical reductive carbonylation process. In this process, toluene is dinitrated to dinitrotoluene (DNT). Next, DNT undergoes reductive carbonylation to form toluene dimethylcarbamate, and then the carbamate is thermally decomposed to produce TDI. TDI Downdraft Kiln Conversion Sm Boris Robinson,2020-02-02 The purpose of this book is to explain the conversion of a typical 23 or 28 electric kiln to a TDI propane gas fueled downdraft kiln. The book provides a detailed description of the theory, construction process, parts required with sources, and the basic tools needed. The idea is to promote at-home or small studio reduction firings that can produce very reliable and repeatable results. For those who want to continue exploring and learning in an environment of less certainty, reduction firing can be a fun path. Reduction firing requires gaining experience with firing schedules, reduction techniques, and glazes - commercially available or your own mixing.

Toluene Diisocyanate from Toluene - Cost Analysis - TDI E22A Intratec,2019-09-17 This report presents a cost analysis of Toluene Diisocyanate (TDI) production from toluene. The process examined is similar to Enichem's oxidative carbonylation process. In this process, toluene is dinitrated to dinitrotoluene (DNT), which is hydrogenated to toluenediamine (TDA). TDA reacts with DMC to produce a urethane intermediate that is then cracked to produce TDI. The DMC used is generated from methanol and carbon monoxide in an on-site unit. This report was developed based essentially on the following reference(s): (1) EP Patent 0685453, issued to Enichem Synthesis in 1995 (2) Isocyanates, Organic, Ullmann's Encyclopedia of Industrial Chemistry, 7th edition Keywords: Non-Phosgene Process, Enichem, Eni, Dow, Oxidative Carbonylation

Defying the Odds David V. Day,2015-08-10 The true story of one Engineer's battle with one of the most powerful state agencies in Texas. David V. Day, P.E., takes on the Texas Department of Insurance (TDI) in a battle that has lasted nearly half a decade, and is still ongoing as of this print. Day exposes the lengths that TDI Engineers, inspectors, and legal staff will go to punish any Engineer or contractor who disagrees with them; including punishing, silencing or terminating their own employees who are sympathetic to TDI's targets. It is a story filled with so many twists, larger-than-life characters, intrigue, and shady government officials; you will believe you are reading an espionage thriller. It is a remarkable story of defying the odds, something Day has done all his life. From the circumstances of his birth, to the chance meeting of his wife, to taking on the largest state agency in Texas, and even miraculously surviving a vehicle rollover with his family; an event that inspired him to tell his story. Day takes on real life villains, exposing incompetence and corruption at the highest levels of the state government and courts. He does this with the help of two experienced attorneys and numerous engineers who have faced similar persecution from TDI. A must read for anyone who has ever struggled against corruption or had a bad experience with their insurance company, permit office or any unaccountable bureaucrat. All licensed professionals need to read this.
