China-Focused Cases CEIBS Case Center,2019-03-01 This book is the first anthology compiled in English by the CEIBS Case Center to promote China-focused cases worldwide. Included are ten of twenty six award-winning cases from the Global Contest for the Best China-Focused Cases during 2015 to 2017: these works exemplify the quality of effective business cases and share stories of China to the world. Each of the ten cases has a defining feature. Some cases, with a focus on user demand, analyze how companies build their core competence (e.g., Haidilao Hot-Pot and OnePlus Mobile Phone), while others present an array of business innovations in the era of new retail, e-commerce, and the sharing economy (e.g., SF Express, Jinhubao, ofo, FamilyMart, and Handu Apparel). Some describe Chinese companies' operations in the overseas market (e.g., Huawei and TECNO), and others depict how foreign companies adapt to the Chinese market in a unique way (e.g., Starbucks). These cases were drawn from Chinese and overseas business schools. The book helps bridge the gap between the world management community's interest in China and the limited availability of China-focused management cases. We hope this collection of select cases will prove valuable and informative for our readers.

NEBULAR 7: Los Tecno-Clérigos Thomas Rabenstein,2024-01-15 Es el año 2113. Eskorzo ha llegado al sistema de Epsilon Indi con el YAX-KUK-MO. Junto con Toiber Arkroid, Vasina y Lai Pi, Shvaken sigue pistas imprecisas y busca el mundo natal de una antigua civilización robótica. El comerciante está obligado por una promesa que hizo a 40028, un robot de este pueblo que recuperó de un asteroide en un viaje comercial. Eskorzo sigue las escasas pistas y escanea el supuesto sistema objetivo. A pesar de una búsqueda exhaustiva, el mundo central sigue ilocalizable. El hogar de 40028 parece haber desaparecido, al igual que los constructores de los robots esféricos, que anclaron una elevada norma moral cósmica en la programación básica de sus criaturas artificiales. ¿Dónde han ido a parar los hermanos del robot esférico? Eskorzo no se rinde y persiste. Investiga cada satélite de Epsilon Indi y espera descubrir pronto un rastro de los Tecno-Clérigos.

Revisión del desempeño tecno-económico de las principales flotas pesqueras del mundo Van Anrooy, R., Carvalho, N., Kitts, A., Mukherjee, R., Van Eijs, S., Japp, D., Ndao, S.,2022-02-02 Esta revisión del desempeño tecno-económico de las principales flotas pesqueras del mundo analiza los resultados de 20 estudios a nivel de país de las flotas pesqueras de África, Asia, Europa, Américas del Norte y del Sur. Incluye información financiera, socioeconómica y técnica de 103 principales segmentos de la flota pesquera (semi) industrial, que son responsables de aproximadamente, el 39 por ciento de la producción de la pesca de captura marina en todo el mundo. El análisis de las características de los buques revela diferencias sustanciales en la capacidad pesquera (en términos de eslora, tonelaje y potencia del motor) entre los segmentos de la flota. Se observó un aumento en el tonelaje bruto de los buques promedio en los segmentos de la flota que también fueron examinados en revisiones anteriores. En varias flotas pesqueras asiáticas se observaron aumentos sustanciales de la eslora media total y de la potencia del motor. La composición por edad de las flotas pesqueras en la mayoría de las regiones, excepto Asia, muestra una tendencia al alza. Un análisis de los datos de costos y beneficios mostró que

los costos laborales y de explotación eran los dos componentes principales de costos para la mayoría de los segmentos de la flota. De los 97 segmentos de las flotas, en su mayoría (semi) industriales, un 92 por ciento obtuvo un flujo neto de caja positivo en el año de la encuesta (en el período 2016-2019). Los buques de pesca promedio obtuvieron márgenes de beneficio neto del 10 por ciento o más en el 73 por ciento de los segmentos de la flota. El 61 por ciento de los segmentos de la flota obtuvo un rendimiento de la inversión del 10 por ciento, o más. La revisión también analiza los avances en las tecnologías pesqueras. Estas –junto con un aumento de los precios de los productos alimenticios marinos, la ordenación exitosa de la pesca en algunas zonas y la mejora de la gestión de la capacidad de la flota en Europa y América del Norte– han contribuido a los resultados económicos y financieros positivos en curso de las principales flotas pesqueras del mundo en los últimos años.

El por venir del homo tecno Diego Carlos Romero, 2020-11-20 ¿El ser tecno será capaz de encontrar porvenir en un encuentro con el otro? Lo único que hay de ser fijo y estable en el ser libre es la constitutiva inestabilidad. El porvenir del homo tecno es la del ser efímero que ante la búsqueda de respuestas tal vez necesite replantearse el yo y las circunstancias. Analizar a Foucault, Nietzsche, Ortega y Gasset, Levinas y Kierkegaard. Volver a las estructuras del pensar. El amor como voluntad de poder. Una idea que conecte lo finito con lo infinito. La ética del otro que irrumpe. El abuso del celular, internet, exitismo, máquina, hace que nuestro cerebro carezca de sensibilidad y conciencia. En este libro se vuelve al análisis de la realidad actual. A lo que vivimos, pensamos, sentimos, cuando la angustia, preocupación, incertidumbre, nos hunden en el abismo de la locura y la desesperación. El ser de las promesas vacías, tecno, vacilante, tan preocupado por lanzarse a la conquista de los multifacéticos espacios, medios, universo, terminó desconociéndose a sí mismo. El ser de las promesas vacías que promete mucho, pero que repite las mismas ideas para el actuar, es la antesala perfecta para el resurgir del homo tecno sin límites. El ser mitad hombre, mitad máquina, de película, en un futuro próximo: La persona, debería revalorizar la simple, pero tamaño estructura actual de ser cada vez más humana, para no dejarse aniquilar por la misma máquina.

El gran sueño de China. Tecno-Socialismo y capitalismo de estado Claudio F. González, 2021-03-25 China tiene un plan: una combinación de contrato social para proveer de seguridad económica y física a los ciudadanos con un mandato celestial para volver a ser el país más relevante del mundo. Un plan que utiliza la tecnología para el desarrollo industrial, para dotar de confianza a la sociedad, y para ofrecer a los ciudadanos soluciones con una mezcla inseparable de conveniencia y control. Su mensaje de fondo nos hace preguntarnos: ¿es que no queremos convertirnos en mejores ciudadanos, disfrutar de un entorno más seguro, vivir en un mundo feliz? Nos asusta -y mucho- que una autocracia demuestre ser mejor que nuestras democracias y nuestro respeto por la sociedad civil y los derechos humanos. Sin embargo, la creciente presencia de China debería servir para que mejoremos y avancemos. Precisamente, esta monografía intenta explicar desde dentro -desde China- este nuevo plan, el tecno-socialismo combinado con el capitalismo de estado. El análisis se pretende lo más objetivo posible cuando uno se halla inmerso en un país y una cultura apasionantes, donde la tradición y la modernidad se cruzan a cada instante en contradicciones manifiestas, y cuando existe igualmente una compleja lucha de narrativas, las que explican las ventajas de su sistema y su buena voluntad global, y las que aseguran que China es un peligro internacional y ha desatado la carrera armamentística de las nuevas tecnologías. La realidad es bastante más compleja, con objetivos sociales y políticos muy alejados de los que estamos habituados. De hecho, esta es la mayor contribución de la China actual: el país, su sistema y sus experimentos están en algún lugar de un futuro posible y deberían servir de punto de referencia para una reflexión sobre

el triángulo tecnología, economía y sociedad que conduzca a un verdadero beneficio para todos.

El zar del amor y el tecno Anthony Marra, 2021-08-22 Este impactante y exquisito tour de force, a medio camino entre novela coral y colección de relatos, se extiende a través de un siglo, un continente y un reparto de personajes extraordinarios cuyas vidas se entrecruzan de manera en ocasiones cómica y desgarradora. Un censor soviético de los años treinta corrige meticulosamente fotografías oficiales en los búnkeres de Leningrado, perseguido por la imagen de una prima ballerina caída en desgracia. Un coro de mujeres cuenta sus historias y las de sus abuelas, antiguas prisioneras de un gulag, que fundaron su propio pueblo en Siberia. Dos hermanos comparten un amor feroz y protector en pleno derrumbamiento de la URSS; y un mercenario es hecho prisionero en un pozo de Chechenia junto con una casete de mezclas que podría contener el último mensaje de su familia. Con una prosa deslumbrante, un finísimo sentido del humor, ricos retratos de personajes y un sentido de la Historia que encuentra ecos en el presente, *El zar del amor y el tecno* es una obra cautivadora de uno de los mejores nuevos talentos americanos.

Cumbia! Héctor Fernández L'Hoeste, Pablo Vila, 2013-05-08 Cumbia is a musical form that originated in northern Colombia and then spread throughout Latin America and wherever Latin Americans travel and settle. It has become one of the most popular musical genre in the Americas. Its popularity is largely due to its stylistic flexibility. Cumbia absorbs and mixes with the local musical styles it encounters. Known for its appeal to workers, the music takes on different styles and meanings from place to place, and even, as the contributors to this collection show, from person to person. Cumbia is a different music among the working classes of northern Mexico, Latin American immigrants in New York City, Andean migrants to Lima, and upper-class Colombians, who now see the music that they once disdained as a source of national prestige. The contributors to this collection look at particular manifestations of cumbia through their disciplinary lenses of musicology, sociology, history, anthropology, linguistics, and literary criticism. Taken together, their essays highlight how intersecting forms of identity—such as nation, region, class, race, ethnicity, and gender—are negotiated through interaction with the music. Contributors. Cristian Alarcón, Jorge Arévalo Mateus, Leonardo D'Amico, Héctor Fernández L'Hoeste, Alejandro L. Madrid, Kathryn Metz, José Juan Olvera Gudiño, Cathy Ragland, Pablo Semán, Joshua Tucker, Matthew J. Van Hoose, Pablo Vila

Tecno Giampiero Bosoni, 2012 The planning, production and cultural development of a company that has been one of the keystones of Italian design for almost sixty years. Writing the history of Tecno, a company founded in 1953 by the Borsani brothers, does not mean just investigating the evolution of a significant player in the industrial production of furniture, but also tracing out a fundamental chapter in interior design at a global level. Many Tecno projects have been designed by some of the most prominent international architects and designers, including Vico Magistretti, Roberto Mango, Robin Day, Gio Ponti, Mario Bellini, Norman Foster, Ricardo Bofill, Jean-Michel Wilmotte, Emilio Ambasz, Giorgetto Giugiaro, Gae Aulenti, and Piero Lissoni. Not to mention Tecno has always had a strong bond with the world of art, which has found material form in a specific collection of furnishings designed by noted artists like Man Ray, Bruno Munari, François and Frédéric Morellet, and Luigi Veronesi. Today many Tecno products are exhibited in leading museums of the world: at MoMA, New York and San Francisco, the Victoria and Albert Museum, London, the Georges Pompidou Centre, Paris, the Neue Sammlung, Munich, the Museum of Decorative Arts, Montreal and the Triennale in Milan.

Education and Development in Central America and the Latin Caribbean D. Brent Edwards Jr., Mauro C. Moschetti, Pauline Martin, Ricardo Morales-Ulloa, 2024-02-08 Rooted in an international political economy theoretical framework, this book provides unique insights into the global forces and local responses that are shaping education systems in Central America and the Latin Caribbean (CALC). The book covers all Spanish-speaking countries of the CALC region and examines the effects of macro-economic pressures, geopolitical intervention, neo-colonial relationships, global pandemics, transnational gang networks, and the influence of international organizations. Chapters analyse the challenges and opportunities these global forces present to education systems in the region as well as highlighting the local efforts to address, mitigate, and counteract them. In doing so, the book illuminates how education can contribute to either maintaining or challenging inequalities and exclusion in the face of pressures from the global to local levels.

La condizione tecno-umana Paolo Benanti, 2017-01-10 T15:55:00+01:00 Che cosa significa essere umani in un'epoca di complessità e cambiamento? Come si può gestire lo sviluppo tecnologico? E quali sono i limiti da non superare nel momento in cui la tecnica non viene più solo utilizzata per interventi esterni, ma interni all'uomo? Il libro si propone di fornire una comprensione filosofica e teologica della tecnologia mettendo in luce le dimensioni etiche e interrogandosi sulla possibilità di liberarsi dalle categorie tradizionali di «umano». «tecnologico» e «naturale» per abbracciare una nuova relazione al mondo che si potrebbe definire «tecno-umana».

Review of the Specifications and Features of Different Smartphones Models Dr. Hidaia Mahmood Alassouli, 2021-10-13 A smartphone is a portable device that combines mobile telephone and computing functions into one unit. It is a cellular telephone with an integrated computer and other features not originally associated with telephones such as an operating system, web browsing, multimedia functionality, the ability to run software applications, along with core phone functions such as voice calls and text messaging. Smartphones typically contain a number of metal-oxide-semiconductor (MOS) integrated circuit (IC) chips, include various sensors that can be leveraged by pre-included and third-party software (such as a magnetometer, proximity sensors, barometer, gyroscope, accelerometer and more), and support wireless communications protocols (such as Bluetooth, Wi-Fi, or satellite navigation). The best phones offer you everything you want from a mobile device. They deliver great cameras, the performance you need to multitask and enough battery life.
