Telpher Steven Eckroad, 2022-12-20 Two women... Two accidents... Two aftermaths... Time heals. Can it heal them? On the planet Verde two scientists develop the Telpher, a machine that will make possible instant communication across lightyears of space. Neither of them knows it has other uses. One of scientists uses the Telpher to get even with the other and learns an unfortunate truth with no apparent remedy. A hidden flaw in the Telpher's human interface might be responsible for entangling the fates of two women who live in different times: an astrobiologist and a starship navigator. Jana Anders, a 24th century starship navigator copes with her ship's warp drive failure that sends it into the distant past, to an unknown region of the galaxy. A woman she may never know might be able to help, but time is running out for the two to meet. 21st century astrobiologist Sonja Bellesario uses telepathy and radio telescopes to listen for messages from outer space that might help her pursue her destiny in the stars. When a message comes she's not prepared for its consequences. The two women have one thing in common. For one it's a blessing in disguise; for the other a painful disaster. A hidden flaw in the Telpher's human interface might be responsible for entangling these two women's lives. Will the link be discovered in time? Time travel may have unexpected twists. Telpher is the first book in a series. The second novel is Copernicium-296. A third novel, Archoi, is in the works. Reviews of Telpher _____ As the first novel from this author I cannot wait to see more. The opening chapter dramatically sets the stage for the unfolding creative and intriguing experience. The characters have a richness and depth and the challenges they face are so gripping it is difficult to put the book down. Eckroad's engineering and scientific background enhances and brings credibility to the space and time transformation aspects underlying the narrative and to the unexpected conclusion. - Alan Lauder, Ph.D., BMA, Executive Director, Coalition for the Commercial Application of Superconductors. In the middle of the last century, physicists Albert Einstein and Neils Bohr debated the premise that quantum theory could predict action at a distance. Einstein labelled the whole idea spooky. Read Steve Eckroad's Telpher and the interstellar/time-dilated dialogs between Jana, James, Sonja and Sergei, then decide for yourself whether Neils or Albert were right! - Dr. Paul M. Grant, IBM Research Manager and EPRI Science Fellow, Emeriti. Reviews of Copernicium-296: _____ This second book in a series by Steven Eckroad tells about a conceptual future that is different from other science fiction projections. He introduces some novel concepts. Most importantly is the one that telepathy is related to teleportation. The methodology of the Telpher process is nicely woven into a story of politics, greed, and love. The book is an easy read and the story is intriguing. - William V.

Hassenzahl, PhD, President Advanced Energy Analysis A great sequel to Telpher. Steven has a unique way of integrating just enough astrophysics that makes you pay attention to the science while still weaving an engaging tale. I thoroughly enjoyed the transport. - Chris Valentino, MSPH, COO of Pacific Inpatient Medical Group (Retired) Author's Note: Telpher: Telepathic Travels in Time was first published in 2018 with a different subtitle (Telpher: a novel of parallel destinies). The new edition has been edited to support its sequel, Copernicium-296. There are no consequential changes to the plot. Both books are stand-alone reads.

Telpher Steven Eckroad, 2018-01-31 Two women... Two accidents... Two aftermaths... It is said that time heals. Can it heal them? Errant technology and unchecked ambition in the quest for interstellar travel combine to entangle the fates of two women centuries apart who have one thing in common: time travel. For one it's a blessing in disguise; for the other a painful disaster. Jana Anders, a 24th century starship navigator tries to get her passengers home after the ship's warp drive fails and sends them into the distant past, to an unknown region of the galaxy. Another time traveler she's never met might be able to help her but time is running out for the two to meet. 21st century astrobiologist Sonja Bellesario uses her telepathic power to listen for messages from outer space that might help her pursue her destiny in the stars. When a message comes she's not prepared for its consequences. The path forward has unexpected twists. Time isn't always transparent. On the planet Verde two scientists develop a machine with capabilities far beyond what they intend. One of them tries to use the machine to get even with the other. He learns an unfortunate truth with no apparent remedy. There might be a link between use of the machine and the warp drive accident that sends Jana Anders into the past. Will the link be discovered in time? Telpher is the first book in a series. The second novel is Copernicium-296. A third novel is in the works. Reviews of Telpher

Telpher Steven Eckroad,2018-02-26 In the 24th century, interstellar travel has been achieved through application of principles described by 20th-century physicist Miguel Alcubierre. The starship ISS Exeter is making her maiden voyage with a modified navigation module on a standard run from Earth to the planet Verde, 400 light years distant. When the starship suffers an unexplained tremor during the warp portion of the journey, her captain orders a drop into normal space. Jana Anders, the starship navigator, then discovers a baffling space-time paradox for which there is no apparent answer.

She yearns for help from her twin brother Jame on the planet Verde. On Earth in the 21st century, astrobiologist Sonja Bellesario nurses a youthful passion for travel to the stars while conducting research at the Center for Extra Terrestrial Life at the University of North America in Kansas City. She hopes that receiving messages from an advanced civilization light years from Earth might change humanity's forlorn prospects. She has not imagined how her own prospects might be changed. Telpher is the story of how the 21st-century development of an interstellar hyper-drive engine and its modification in the 24th century twists the fates of these two women centuries apart.
