Ancient Egypt in the Popular Imagination David Huckvale,2014-01-10 Ancient Egypt has long been a source of fascination in Western popular culture. Movies such as The Mummy

(1932, 1959), Biblical epics like *The Ten Commandments* (1923, 1956), and pharaonic films like *Cleopatra* (1934, 1963) and *The Egyptian* (1954) have all recreated the glamour and allure of Egyptian art and civilization for Western audiences. This work traces how these and other films were inspired by writers like Bram Stoker and Sir Arthur Conan Doyle and by the art of Victorian painters. Similarly, it shows how the soundtracks to such films belong to a Romantic musical tradition stretching back beyond Verdi and Mozart. Exploring these artistic endeavors addresses the question of whether the fantasy of ancient Egypt represents racist misunderstandings of a far more significant reality, or a way for Western culture to understand itself.

Teranesia Greg Egan, 1999-07-12 Welcome to Teranesia, the island of butterflies, where evolution has stopped making sense. Prabir Suresh lives in paradise, a nine-year-old boy with an island all his own: to name, to explore, and to populate with imaginary creatures stranger than any exotic tropical wildlife. Teranesia is his kingdom, shared only with his biologist parents and baby sister Madhusree. The evolutionary puzzle of the island's butterflies that brought his family to the remote South Moluccas barely touches Prabir; his own life revolves around the beaches, the jungle, and the schooling and friendships made possible by the net. When civil war breaks out

across Indonesia, this paradise comes to a violent end. The mystery of the butterflies remains unsolved, but nearly twenty years later reports begin to appear of strange new species of plants and animals being found throughout the region — species separated from their known cousins by recent, dramatic mutations that seem far too useful to have arisen by chance from pollution, disease, or any other random catastrophe. Madhusree is now a biology student, proud of her parents' unacknowledged work, and with no memories of the trauma of the war to discourage her, she decides to join a multinational expedition being mounted to investigate the new phenomenon. Unable to cast off his fears for her safety, Prabir reluctantly follows her. But travel between the scattered islands is difficult, and Madhusree has covered her tracks. In the hope of finding her, Prabir joins up with an independent scientist, Martha Grant, who has come to search for both clues to the mystery and whatever commercial benefits it might bring to her sponsor. As Prabir and Martha begin to untangle the secret of Teranesia, Prabir is forced to confront his past, and to face the painful realities that have shaped his life.

Terawatt Solar Photovoltaics Meng Tao, 2014-04-07 Solar energy will undoubtedly become a main source of energy in our life by the end of this century, but how big of a role will photovoltaics play in this new energy infrastructure? Besides cost and efficiency, there are other barriers for current solar cell technologies to become a noticeable source of energy in the future. Availability of raw materials, energy input, storage of solar electricity, and recycling of dead modules can all prevent or hinder a tangible impact by solar photovoltaics. This book is intended for readers with minimal technical background and aims to explore not only the fundamentals but also major issues in large-scale deployment of solar photovoltaics. Thought-provoking ideas to

overcoming some of the barriers are discussed.

Teratologies Jackie Stacey, 2013-07-23 Stories of cancer are full of monster and marvels; the monstrosity of the disease and the treatments, the marvels of the cures and the saved lives. Still one of the most dreaded diseases to haunt our imaginations, cancer is more than an illness - it is a cultural phenomenon. People who have cancer are bombarded with competing explanations of their conditions: it is genetically inherited; it is environmentally produced; it is the result of their personality. *Teratologies - A Cultural Study of Cancer* investigates how this disease is perceived, experienced and theorised in contemporary society. It explores changing beliefs about the causes of, and the cures for, cancer in both biomedicine and its increasingly popular alternative counterparts. Analysing conventional and alternative medical accounts, self-help manuals and patients' personal stories, Jackie Stacey takes a critical look at the place of heroes, metaphors, the self and the body in these competing bids to produce the authoritative definition of the meaning of cancer today. Interspersed with these detailed textual investigations are discussions of broader issues such as the feminist debates about the history of science, the place of consumer culture in health practices and the status of patients and of health professionals in postmodern society. Combining autobiographical narratives with contemporary theoretical debates, the author carves out a specifically feminist analysis of the cultural dimensions of cancer. She brings accounts of her own illness under the critical lens of academic scrutiny and situates these personal stories within a discussion of contemporary cultural change.

Before The Dawn J.L. McNaughton, 2014-11-26 *Before the Dawn* is an epic adventure about James, a shy teenage misfit who one day is pulled from his world, where he's ignored, bullied and forgotten, into another world where he's needed, celebrated and respected. Set in Terrain, a fantasy world similar to Earth but populated with mythical creatures and human-like Terrainians, *Before the Dawn* is part fantasy-adventure and part coming-of-age story – with great descriptive elements, original characters and a well-developed narrative – that follows James as he attains magical powers and combats the horrible menace of the Overseers. Along the way he meets wonderful new friends and quickly grows up to be a Master in his own right. The first novel in a trilogy, *Before the Dawn* is an original young adult fiction novel that will be thoroughly enjoyed by anyone who loves the fantasy or science fiction genre.

The Voyages And Adventures Of Captain Hatteras Jules Verne, 2021-01-01 *The Adventures of Captain Hatteras* (French: *Voyages et aventures du capitaine Hatteras*) is an adventure novel by Jules Verne in two parts: *The English at the North Pole* (French: *Les Anglais au pôle nord*) and *The desert of ice* (French: *Le Désert de glace*). The novel was published for the first time in 1864. The definitive version from 1866 was included into *Voyages Extraordinaires* series (*The Extraordinary Voyages*). Although it was the first book of the series it was labeled as number two. Three of Verne's books from 1863-65 (*Five Weeks in a Balloon*, *Journey to the Center of the Earth*, and *From the Earth to the Moon*) were added into the series retroactively. Captain Hatteras shows many similarities with British explorer John Franklin. The novel, set in 1861, described adventures of British expedition led by Captain John Hatteras to the North Pole. Hatteras is convinced that the sea around the pole is not

frozen and his obsession is to reach the place no matter what. Mutiny by the crew results in destruction of their ship but Hatteras, with a few men, continues on the expedition. On the shore of the island of New America he discovers the remains of a ship used by the previous expedition from the United States. Doctor Clawbonny recalls in mind the plan of the real Ice palace, constructed completely from ice in Russia in 1740 to build a snow-house, where they should spend a winter. The travellers winter on the island and survive mainly due to the ingenuity of Doctor Clawbonny (who is able to make fire with an ice lens, make bullets from frozen mercury and repel attacks by polar bears with remotely controlled explosions of black powder). When the winter ends the sea becomes ice-free. The travellers build a boat from the shipwreck and head towards the pole. Here they discover an island, an active volcano, and name it after Hatteras. With difficulty a fjord is found and the group get ashore. After three hours climbing they reach the mouth of the volcano. The exact location of the pole is in the crater and Hatteras jumps into it. As the sequence was originally written, Hatteras perishes in the crater; Verne's editor, Jules Hetzel, suggested or rather required that Verne do a rewrite so that Hatteras survives but is driven insane by the intensity of the experience, and after return to England he is put into an asylum for the insane. Losing his soul in the cavern of the North Pole, Hatteras never speaks another word. He spends the remainder of his days walking the streets surrounding the asylum with his faithful dog Duke. While mute and deaf to the world, Hatteras' walks are not without a direction. As indicated by the last line Captain Hatteras forever marches northward.
