Becoming Terran Mark Roth-Whitworth,2023-09-29 The tools of the ultra-wealthy turn... In the riveting landscape of 2077, the world is under the grip of ultra-powerful trillionaires, their wealth and influence transcending boundaries. Amidst this chaos, two unsuspecting sisters from Niger, working in a North African hotel, become pawns in the grandiose schemes of the notorious trillionaire, Tolliver. He not only snatches away their freedom but also their identities, rechristening them as Francoise and Amelie. In a macabre twist, they undergo surgical and genetic modifications, designed to serve Tolliver's intricate proxy wars against his trillionaire adversaries. Francoise's trajectory sees her morph from an unsuspecting spy to a pivotal figure within Tolliver's empire, managing crises and plots. Parallely, Amelie's life takes a different turn. Guided by Tolliver's designs, she ventures into the realm of genetic engineering, her studies taking her from an elite boarding school to a renowned college near London. As fate would have it, her association with Tollipharm, Tolliver's pharmaceutical empire in London, leads her to a horrifying discovery: a lethal virus, responsible for countless deaths, originating from the dark recesses of the company. While Francoise awakens to the grim reality of her existence, becoming disillusioned with her role, the world outside is changing rapidly. The face-off between trillionaires and nations intensifies, culminating in the evolution of the Terran Confederation. With the stakes higher than ever, and the battle shifting to the stars, the sisters must navigate treacherous waters. Join them on this galactic adventure as they grapple with questions of morality, loyalty, and the sheer will to survive in *Becoming Terran*.

The Terran Consensus Scott Washburn,2015-12-23 On a lovely summer evening, naval officer Robert Hancock and his daughter, Melissa, look up to see a space battle between alien spaceships taking place in orbit above Earth. Astronaut Kay Youngs and engineer Usha Vasthare have a much closer view from the International Space Station. When one of the alien ships crash lands near an American city, the main characters find themselves drawn into an ancient interstellar war. As evidence mounts that one side in the war has been manipulating humanity for decades in hopes of turning them into unwitting allies in their conflict, the humans are faced with the fact that the other side is preparing an attack to make sure there are no Earthlings left to become allies to anyone. With time running out, the humans must decide who—if anyone—they can trust and how they can best survive the coming storm. If you enjoy David Weber's military science fiction, you'll enjoy Scott Washburn's, *The Terran Consensus* - Eric Flint

Terran Command John Daniel Pontius,2020-12-21 An ordinary family steps up to do the extraordinary, digs deep into their character, finds unprecedented courage, and summons unwavering faith to see them and their friends through the dangers and trials ahead. King Toburg of the planet Cassaria dispatches his four adult children on a vital diplomatic mission. Gamoran pirates seize their spaceship, capturing the royal siblings, and murdering all but one of the crew. The Cassarian spaceship flounders to Earth, but not unnoticed. John Braxton, with his sons, battles the alien pirates, rescues the Cassarian siblings, and discovers a violent conspiracy to conquer several planets, including Earth. Who's the sinister force masterminding this conquest? Government agents foreign spies, Gamoran pirates, and sinister forces seek to stop the Braxtons and their brave band of heroes. To expose the conspiracy requires capturing the invincible pirate flagship, Holcron Star. The simple act of being good Samaritans plunges the Braxtons into a flight for survival and a Quest for Freedom.

Rise of the Terran Empire Poul Anderson, 2009-06-01 Nicholas van Rijn, the most flamboyant member of the Polesotechnic League of star traders, could see dark times ahead. Fellow league members were using tactics verging on outright piracy, and others were all too eager to sell starships and high-tech weapons to alien barbarians. A planet not previously known for interstellar commerce suddenly revealed a secret fleet of armed starships, and started building an empire. Even if Van Rijn and his right-hand man David Falkayn could find a way to stop this blatant aggression, the glory days of the League were over. Hereafter, for its own protection against well-armed alien marauders the Earth must maintain a strong military fleet, and one charismatic man would found an empire that would learn nothing of the lessons history taught about the fates of other empires as it began annexing other star systems, whether they wanted to join the Terran Empire or not . . . This is the third volume in the first complete edition of Poul Anderson's Technic Civilization saga, and it includes a classic novella which appears here in book form for the first time. And the next volume begins the adventures of Poul Anderson's other legendary character, Captain Sir Dominic Flandry. At the publisher's request, this title is sold without DRM (Digital Rights Management).

Fall of the Terran Empire Brian Jeffreys, 2010-11-01

A Voyager in Chronospace Lisa Kirkwood, 2017-05-10 In the 21st century, by the old chronology, planet Terra went through radical changes that caused the landmass and the oceans to merge and realign into a new geography. Before that started, over half of the global population was rescued by an alien fleet sent by the Ashtar Space Command of the Galactic Council of the Milky Way. This event is known in the history of New Terra as The Ascension". Many people didn't live through it. Others were taken by spaceships of Repton - a political and military alliance of Reptilians and humans under the rule of the Draconian Empire. Repton captured the survivors left on this Earth and displaced them to distant planets that would serve as hard labor colonies. The enslaved people are called Thsch-ows - 'those-who-were-taken'... Now we're in the year 64 NCPA - New Chronology in the Post-Ascension Era. Terra has joined the Galactic Council as an equal member and Terrans are a starfaring civilization. Not all Terrans. The former citizens, the Thsch-ows, seem to have been forsaken by their fellow humans, until the day when the first ex-Terran Thsch-ows, a miner named Vis N 91, 077 escapes slavery and returns to his planet of origin. He goes beyond frontiers, crosses the galaxy and meets new friends - Terrans and aliens; aboard their ships, he tours worlds. Spacetime traveling is now available to Vis and he becomes a well-trained chronotraveler. From the Moon to the Earth, from the future to the past and back again, Vis discovers his native world anew. When he realizes that, in order to save his own future he has to change everyone's past, he sets out on a personal journey in an attempt to alter the course of history. Will he succeed? Or will he make the same mistake that others made before?

Though they brought a limited quantity of the vaccine against the deadly spore cloud, there was no way to make enough to vaccinate more than a few dozen. The Earth scientists, and surviving diplomats, fled back to Earth. But once home, after the twenty-eight-year gap caused by the space ship transit, they find an Earth changed almost beyond recognition. In the aftermath of the spore cloud plague, the human race has been reduced to only a few million isolated survivors. The knowledge brought back by Marianne Jenner and her staff may not be enough to turn the tide of ongoing biological warfare.
