*Japan Sinks* Sakyo Komatsu,2016-02-17 A chillingly realistic work of science fiction. – The New York Times. After dropping anchor for the night near a small island to the south of Japan, a crew of fishermen awaken to find that the island has vanished without a trace. An investigating scientist theorizes that the tiny island has succumbed to the same force that divided the Japanese archipelago from the mainland – and that the disastrous shifting of a fault in the Japan Trench has placed the entire country in danger of being swallowed by the sea. Based on rigorous scientific speculation, *Japan Sinks* recounts a completely credible series of geological events. The story unfolds from multiple points of view, offering fascinating perspectives on the catastrophe's political, social, and psychological effects. Winner of the Mystery Writers of Japan Award and the Seiun Award, this prescient 1973 science-fiction novel foreshadowed the consequences of the 1995 Osaka-Kobe earthquake and the 2011 Tohoku earthquake and tsunami.

**Architects of Buddhist Leisure** Justin Thomas McDaniel,2018-04-30 Buddhism, often described as an austere religion that condemns desire, promotes denial, and idealizes the contemplative life, actually has a thriving leisure culture in Asia. Creative religious improvisations designed by Buddhists have been produced both within and outside of monasteries across the region—in Nepal, Japan, Korea, Macau, Hong Kong, Singapore, Laos, Thailand, and Vietnam. Justin McDaniel looks at the growth of Asia's culture of Buddhist leisure—what he calls “socially disengaged Buddhism”—through a study of architects responsible for monuments, museums, amusement parks, and other sites. In conversation with noted theorists of material and visual culture and anthropologists of art, McDaniel argues that such sites highlight the importance of public, leisure, and spectacle culture from a Buddhist perspective and illustrate how “secular” and “religious,” “public” and “private,” are in many ways false binaries. Moreover, places like Lek Wiriyaphan's Sanctuary of Truth in Thailand, Suối Tiên Amusement Park in Saigon, and Shi Fa Zhao's multilevel museum/ritual space/tea house in Singapore reflect a growing Buddhist ecumenism built through repetitive affective encounters instead of didactic sermons and sectarian developments. They present different Buddhist traditions, images, and aesthetic expressions as united but not uniform, collected but not concise: Together they form a gathering, not a movement. Despite the ingenuity of lay and ordained visionaries like Wiriyaphan and Zhao and their colleagues Kenzo Tange, Chan-soo Park, Tadao Ando, and others discussed in this book, creators of Buddhist leisure sites often face problems along the way. Parks and museums are complex adaptive systems that are changed and influenced by budgets, available materials, local and global economic conditions, and visitors. Architects must often compromise and settle at local optima, and no matter what they intend, their buildings will develop lives of their own. Provocative and theoretically innovative, *Architects of Buddhist Leisure* asks readers to question the very category of “religious” architecture. It challenges current methodological approaches in religious studies and speaks to a broad audience interested in modern art, architecture, religion, anthropology, and material culture.

Napier,2001-05-03 With the popularity of *Pokemon* still far from waning, Japanese animation, known as anime to its fans, has a firm hold on American pop culture. However, anime is much more than children's cartoons. It runs the gamut from historical epics to sci-fi sexual thrillers. *The Making of Planet of the Apes* J. W. Rinzler, 2018-10-23 FOREWORD BY FRASER HESTON In celebration of the fiftieth anniversary of Planet of the Apes, the classic science-fiction film from 1968, The Making of Planet of the Apes tells the film and offers exclusive, never-before-seen photographs and concept art. Based on Pierre Boulle's novel La Planète de singes, the original Planet of the Apes was one of the most celebrated films of the 1960s and beyond. Starring Hollywood icons Charlton Heston and Roddy McDowall, the movie struck a chord with the world and sparked a franchise that included eight sequels, two television series, and a long-running comic book. Now, five decades after its theatrical release, New York Times bestselling author J. W. Rinzler tells the thrilling story of this legendary Hollywood production—a film even Boulle thought would be impossible to make. With a foreword by Fraser Heston, Charlton Heston's son, The Making of Planet of the Apes is an entertaining, informative experience that will transport readers back to the strange alternate Earth ruled by apes, and bring to life memorable characters such as Cornelius, Dr. Zira, Dr. Zaius, and Taylor, the human astronaut whose time-traveling sparks an incredible adventure. Meticulously researched and designed to capture the look and atmosphere of the film, The Making of Planet of the Apes is also packed with a wealth of concept paintings, storyboards, and never-before-seen imagery—including rare journal pages and sketches from Charlton Heston's private collection—as well as color and black-and-white unit photography, posters, and more unique ephemera. Comprehensive in scope, The Making of Planet of the Apes is the definitive look at the original blockbuster film, a must-have for fans, film buffs, and collectors alike.

**Stop-Motion Filming and Performance** Tom Brierton, 2011-10-27 Stop-motion animation has long been perceived as a technical practice rather than a creative, demanding art. Though stop-motion requires considerable technical knowledge, it also involves aesthetics and artistry that go beyond the technician's realm. Just as important as puppet mechanics are lighting, filters, lenses, camera angle and placement, and dramatic pose and movement. This manual is a complete guide to the aesthetics of stop-motion animation. Information is organized in an intuitive, easy-to-use structure, following the order an animator uses in setting up and then executing a scene. The first half concentrates on the aesthetics of lighting and cameras, a primary concern in any shot, with details of camera placement, various lenses and myriad lighting techniques. The second half deals with the process of performance art, an oft-overlooked aspect of stop-motion animation. Included is a commentary on body

language, facial expression, gesture, movement and emotion—key concepts that are exemplified through the acting process. The work also offers an introduction to narrative form and a glossary of related terms.
