The Silent Dead Tetsuya Honda,2016-05-17 When a body wrapped in a blue plastic tarp and tied up with twine is discovered near the bushes near a quiet suburban Tokyo neighborhood, Lt. Reiko Himekawa and her squad take the case. The victim was slaughtered brutally---his wounds are bizarre, and no one can figure out the what or the why of this crime. At age twenty-nine, Reiko Himekawa of the Tokyo Metropolitan Police's Homicide Division is young to have been made lieutenant, particularly because she lacks any kind of political or family connections. Despite barriers created by age, gender, and lack of connections, she is mentally tough, oblivious to danger, and

has an impressive ability to solve crimes. Reiko makes a discovery that leads the police to uncover eleven other bodies, all wrapped in the same sort of plastic. Few of the bodies are identifiable, but the ones that are have no connection to each other. The only possible clue is a long shot lead to a website spoken only in whispers on the Internet, something on the dark web known as Strawberry Night. But while she is hunting the killer, the killer is hunting her... and she may very well have been marked as the next victim.

Soul Cage Tetsuya Honda,2017-07-18 A severed hand, a missing body, and a victim who was living under a false identity all add up to the most complex and challenging case yet for Homicide Detective Reiko Himekawa - in Tetsuya Honda's Soul Cage. A worker reports his boss missing, and a large amount of blood is found in the rented garage he used. At the same time, a severed left hand is found in a minivan abandoned in the outskirts of Tokyo, which is quickly identified as belonging to this missing man, Kenichi Takaoka. Lt. Reiko Himekawa of the Homicide Division of the Tokyo Metropolitan Police Department is assigned to the investigation, along with her squad and several other units. From the amount of blood spilled in the

van and at the crime scene, it's clear to the team that the missing contractor Keninichi Takaoka is dead and presumably murdered. But searches of the area around the abandoned van and the river itself fail to turn up the rest of the body. The mystery surrounding the murder takes a sharp turn when a childhood friend of the presumed victim is shown a recent photo and definitively declares that the missing man is not Takaoka. With every line of investigation leading to a confusing dead end, Himekawa and her team uncover a trail leading to a long-running yakuza scheme of forced suicide for profit, a complex history of victims, and a case of past transgressions coming back to destroy the present. As time runs out, Himekawa must unravel the mystery surrounding the severed hand if she's to protect and rescue the next victim.

state of change, and that eagerly discards old values in exchange for new ones. A world that hasn't really felt like it was his for a long time. Things were easier when Tetsuya was young, but then his life changed one fateful morning, long ago. Nothing would be the same. Everything was lost. Eternity was gained. But at what price? Keiko is a young Japanese woman who has just finished her shift at a fashion boutique. She gets on the train and thinks of her apartment in Ozuka, where a warm shower and bed are waiting for her. She barely takes notice of the strange man who sits just a few feet from her. Why does he carry an ice box? She doesn't know. Yet. The train speeds on, bringing Tetsuya and his prey closer to their final destination.

Multi-Scale Modeling of Structural Concrete Koichi

Maekawa, Tetsuya Ishida, Toshiharu Kishi, 2008-11-28 Increases in computer power have now enabled engineers to combine materials science with structural mechanics in the design and the assessment of

concrete structures. The techniques developed have become especially useful for the performance assessment of such structures under coupled mechanistic and environmental actions. This allows effective management of infrastructure over a much longer life cycle, thus satisfying the requirements for durability and sustainability. This ground-breaking new book draws on the fields of materials and structural mechanics in an integrated way to address the questions of management and maintenance. It proposes a realistic way of simulating both constituent materials and structural responses under external loading and under ambient conditions. Where the research literature discusses component or element technology related to performance assessment, this book uniquely covers the subject at the level of the whole system including soil foundation, showing engineers how to model changes in concrete structures over time and how to use this for decision making in infrastructure maintenance and asset management.
