TGV Handbook Brian Perren,1998 Vgl. 3.50 482 (1. Auflage von 1993).

On the Fast Track Jacob Meunier,2002 For much of the postwar era, French society had a contradictory view of passenger trains, scorning them as quaint anachronisms on the one hand, yet also fearing their economic and social impact. All this changed with the introduction of the famed Train á Grande Vitesse (TGV) between Paris and Lyon in the early 1980s. In vivid detail, Meunier describes the political, economic, and social factors that both helped and hindered the development of the world's fastest, most technologically advanced train. The present-day enthusiasm in France for high-speed rail travel dates only to the successful launch of the now-famous TGV in 1981. Until now, most published accounts of French high-speed rail have been of a technical nature and have ignored or minimized the historical, political, economic, and social context. Historians have been left with detailed descriptions of locomotives and experimental test runs, but there has been scant information concerning why the machines were built and why the tests were carried out in the first place. This book is the first full-length treatment of high-speed rail travel and the bibliography is one of the most complete on the subject.

TGV: Trains, Terrorists, Trust Beth Ann Erickson,2010-06 When Jennifer Thompson won an all expenses paid, vacation touring Europe on the TGV, high speed train, she thought she hit the jackpot. With dreams of visiting the 'Old World's' finest tourist destinations, she never dreamed she was embarking on an adventure that would rock the foundations of everything she believed true. Her nightmare begins with the brutal murder of every passenger on the TGV... except her. In a world where the lines of good and evil, terrorism and freedom fighter are blurred, Jennifer must reconcile her newfound nightmare reality with everything she once considered 'real.' Beth Ann Erickson is the author of two other novels, *The Almach* and *Heartsongs*, as well as six nonfiction titles. Readers call her novels, '... hauntingly beautiful...' '... intriguing and sensual...' and 'fun.' She lives in Minnesota with her husband, son, and two rescue pups, all of whom she adores.

The French Train À Grande Vitesse Walter C. Streeter,1992

Semantic Web Services Brian Blake,Liliana Cabral,Birgitta König-Ries,Ulrich Küster,David Martin,2012-06-28 Over the last decade, a great amount of effort and resources have been invested in the development of Semantic Web Service (SWS) frameworks. Numerous description languages, frameworks, tools, and matchmaking and composition algorithms have been proposed. Nevertheless, when faced with a real-world problem, it is still very hard to decide which of these different approaches to use. In this book, the editors present an overall overview and comparison of the main current evaluation initiatives for SWS. The presentation is divided into four parts, each referring to one of the evaluation initiatives. Part I covers the long-established first two tracks of the Semantic Service Selection (S3) Contest – the OWL-S matchmaker evaluation and the SAWSDL matchmaker evaluation. Part II introduces the new S3 Jena Geography Dataset (JGD) cross evaluation contest. Part III presents the Semantic Web Service Challenge. Lastly, Part IV reports on the semantic aspects of the Web Service Challenge. The introduction to each part provides an overview of the evaluation initiative and overall results for its latest evaluation workshops. The following chapters in each part, written by the participants, detail their approaches, solutions and lessons learned. This book is aimed at two different types of readers. Researchers on SWS technology receive an overview of existing approaches in SWS with a particular focus on evaluation approaches; potential users of SWS technologies receive a comprehensive summary of the respective strengths and weaknesses of current systems and thus guidance on factors that play a role in evaluation.

Introduction to High-Speed Railway Linya Liu,Zifeng Zhong,2023-09-28 This book provides a comprehensive overview of various aspects of high-speed railways, such as infrastructure, communication signals, traction power supply, trainsets, and transportation organization. It delves into the basic concepts, fundamental theories, and the latest technological achievements in these areas, equipping readers with a strong foundation in the subject matter. The content is organized into eight chapters: Introduction, High-Speed Railway Lines and Infrastructure, Power Supply Systems, High-Speed Railway Trainsets, Signal and Communication Systems, Transportation Organization, Passenger Services, and Maglev Railways. Each chapter explores different facets of high-speed railway systems, focusing on the unique characteristics, design principles, and operational methodologies that set them apart from traditional railway

systems. The book also highlights recent breakthroughs and innovations in the field, giving readers a glimpse of the future potential of high-speed railways. The book is tailored to meet the needs of undergraduate and graduate students pursuing degrees in railway transportation, railway engineering, locomotive vehicles, electrical traction, signal communication, and related fields. It offers a systematic and in-depth understanding of high-speed railway systems, enabling students to grasp the subject matter and apply their knowledge to real-world situations. It can also be a training material for railway professionals looking to expand their knowledge and skills in high-speed railway systems. Furthermore, the book can be a useful reference for postgraduate students engaged in research in relevant fields. It offers a wealth of information and insights, assisting researchers in understanding the intricacies of high-speed railway systems, and exploring new avenues for innovation and improvement.

Tobacco BY-2 Cells Toshiyuki Nagata, Seiichiro Hasezawa, Dirk Inzé, 2013-03-09 The first compilation of a wealth of knowledge on tobacco BY-2 cells, often cited as the HeLa cell line of higher plants. Basic issues of cell cycle progression, cytokinesis, cell organization and factors that are involved in these processes are covered in detail. Since the tobacco cell line is used as a tool for research in molecular and cellular biology, several chapters on such studies are also included. Further, changes of primary and secondary metabolites during culture and factors that affect these processes are treated. Last but not least, the so far unpublished historical background of the BY-2 cell line is described. This volume is a must for any scientist working in the field of plant biology.

High Speed Trains 2015 - Europe and North America John Mckey, 2015-11-28 Welcome to the world of true high speed train or Europe and North America! In this book you will find most important high speed train families, both newest and some classics. Of many subjects by this version the information available has become quite extensive.
