*The Routledge Companion to Media and Tourism* Maria Månsson,Annæ Buchmann,Cecilia

Cassinger,Lena Eskilsson,2020-07-07 The Routledge Companion to Media and Tourism provides a comprehensive overview of the research into the convergence of media and tourism and specifically investigates the concept of mediatized tourism. This Companion offers a holistic look at the relationship between media and tourism by drawing from a global range of contributions by scholars from disciplines across the humanities and social sciences. The book is divided into five parts, covering diverse aspects of mediatization of tourism including place and space, representation, cultural production, and transmedia. It features a comprehensive theoretical introduction and an afterword by leading scholars in this emerging field, delving into the ways in which different forms of media content and consumption converge, and the consequential effects on tourism and tourists. The collection is an invaluable resource for students and scholars of tourism studies, cultural studies, and media and communication, as well as those with a particular interest in mediatization, convergence culture, and

contemporary culture.

**Advances in Human Factors in Wearable Technologies and Game Design Tareq Z.**

Ahram,2018-06-23 This book focuses on the human aspects of wearable technologies and game design, which are often neglected. It shows how user centered practices can optimize wearable experience, thus improving user acceptance, satisfaction and engagement towards novel wearable gadgets. It describes both research and best practices in the applications of human factors and ergonomics to sensors, wearable technologies and game design innovations, as well as results obtained upon integration of the wearability principles identified by various researchers for aesthetics, affordance, comfort, contextual-awareness, customization, ease of use, ergonomics, intuitiveness, obtrusiveness, information overload, privacy, reliability, responsiveness, satisfaction, subtlety, user friendliness and wearability. The book is based on the AHFE 2018 Conference on Human Factors and Wearable Technologies and the AHFE 2018 Conference on Human Factors in Game Design and Virtual Environments , held on July 21–25, 2018 in Orlando, Florida, and addresses professionals,

researchers, and students dealing with the human aspects of wearable, smart and/or interactive technologies and game design research.

Idology in Transcultural Perspective Aoyagi Hiroshi, Patrick W. Galbraith, Mateja

Kovacic, 2021-12-10 This edited volume expands on what Aoyagi Hiroshi intended in the first decade of the new millennium to establish as a subfield of symbolic anthropology called “idology.” It brings together case studies of popular idolatry in Japan, but goes further to provide a transcultural perspective to guide anthropological investigations in different places and times. In proposing an integrated paradigm for the growing body of literature on idols, the volume redirects recurrent questions to more fundamental points of sociocultural inquiry. Contributions from scholars conducting

ethnographic fieldwork, as well as those engaged in theoretical and historical analyses, facilitate comparative reading and critical thought. Exceeding a narrow focus on human idols, the chapters shed new light on virtual idols and YouTubers, cartoon characters and voices, robot idols and cybernetic systems. Science and technology studies thus comes together with theories of animation and anthropological work on life in more-than-human worlds.

**Networked Digital Technologies, Part I** Filip Zavoral, Jakub Yaghob, Pit Pichappan, Eyas El-Qawasmeh, 2010-06-29 On behalf of the NDT 2010 conference, the Program Committee and Charles University in Prague, Czech Republic, we welcome you to the proceedings of the Second International Conference on ‘Networked Digital Technologies’ (NDT 2010). The NDT 2010 conference explored new advances in digital and Web technology applications. It brought together researchers from various areas of computer and information sciences who addressed both theoretical and applied aspects of

Web technology and Internet applications. We hope that the discussions and exchange of ideas that took place will contribute to advancements in the technology in the near future. The conference received 216 papers, out of which 85 were accepted, resulting in an acceptance rate of 39%. These accepted papers are authored by researchers from 34 countries covering many significant areas of Web applications. Each paper was evaluated by a minimum of two reviewers. Finally, we believe that the proceedings document the best research in the studied areas. We express our thanks to the Charles University in Prague, Springer, the authors and the organizers of the conference.

**The Routledge Companion to Cyberpunk Culture** Anna McFarlane, Lars Schmeink, Graham Murphy, 2019-11-28 In this companion, an international range of contributors examine the cultural formation of cyberpunk from micro-level analyses of example texts to macro-level debates of

movements, providing readers with snapshots of cyberpunk culture and also cyberpunk as culture. With technology seamlessly integrated into our lives and our selves, and social systems veering towards globalization and corporatization, cyberpunk has become a ubiquitous cultural formation that dominates our twenty-first century techno-digital landscapes. The Routledge Companion to Cyberpunk Culture traces cyberpunk through its historical developments as a literary science fiction form to its spread into other media such as comics, film, television, and video games. Moreover, seeing cyberpunk as a general cultural practice, the Companion provides insights into photography, music, fashion, and activism. Cyberpunk, as the chapters presented here argue, is integrated with other critical theoretical tenets of our times, such as posthumanism, the Anthropocene, animality, and empire. And lastly, cyberpunk is a vehicle that lends itself to the rise of new futurisms, occupying a variety of positions in our regionally diverse reality and thus linking, as much as differentiating, our perspectives on a globalized technoscientific world. With original entries that engage cyberpunk's diverse 'angles' and its proliferation in our life worlds, this critical reference will be of significant interest

Japanese Robot Culture Yuji Sone, 2016-12-17 Japanese Robot Culture examines social robots in Japan, those in public, domestic, and artistic contexts. Unlike other studies, this book sees the robot in relation to Japanese popular culture, and argues that the Japanese 'affinity' for robots is the outcome of a complex loop of representation and social expectation in the context of Japan's continuing struggle with modernity. Considering Japanese robot culture from the critical perspectives afforded by

theatre and performance studies, this book is concerned with representations of robots and their inclusion in social and cultural contexts, which science and engineering studies do not address. The robot as a performing object generates meaning in staged events and situations that make sense for its Japanese observers and participants. This book examines how specific modes of encounter with robots in carefully constructed mises en scène can trigger reflexive, culturally specific, and often ideologically-inflected responses.
