**How to Build a Universe** Brian Cox, Alexandra Feachem, Robin Ince, 2017 From the hosts of the legendary BBC Radio 4 program 'The Infinite Monkey Cage' comes this irreverent celebration of scientific marvels - a hectic leap through the grand and bizarre ideas conjured up by human imagination, from dark matter to consciousness via neutrinos and earthworms.

*Rutherford and Fry's Complete Guide to Absolutely Everything (Abridged)* Adam Rutherford, Hannah Fry, 2022-10-13 In Rutherford and Fry's comprehensive guidebook, they tell the complete story of the universe and absolutely everything in it - skipping over some of the boring parts. This is a celebration of the weirdness of the cosmos, the strangeness of humans and the fact that amid all the mess, we can somehow make sense of life. Our brains have evolved to tell us all sorts of things that feel intuitively right but just aren't true- the world looks flat, the stars seem fixed in the heavenly firmament, a day is 24 hours... This book is crammed full of tales of how stuff really works. With the power of science, Rutherford and Fry show us how to bypass our monkey-brains, taking us on a journey from the origin of time and space, via planets, galaxies, evolution, the dinosaurs, all the way into our minds, and wrestling with some truly head-scratching questions that only

science can answer- What is time, and where does it come from? Why are animals the size and shape they are? What is a thought? How horoscopes work (Spoiler- they don't, but you think they do) Does my dog love me? Why nothing is truly round Do you need your eyes to see?

The Universe: The book of the BBC TV series presented by Professor Brian Cox Andrew Cohen, 2021-10-14 Every night, above our heads, a drama of epic proportions is playing out. Diamond planets, zombie stars, black holes heavier than a billion Suns. The cast of characters is extraordinary, and each one has its own incredible story to tell.

**Burn** Herman Pontzer, 2022 Why do so many diets lead to more weight gain? Do more active people have faster metabolisms? Is exercise essential for weight loss? Over the past twenty years, evolutionary biologist Herman Pontzer has conducted ground-breaking studies across a range of settings, including pioneering fieldwork and Hadza hunter-gatherers in northern Tanzania. This book draws on his eye-opening research to show how, contrary to received wisdom, exercise does not increase our metabolism. Instead, we burn calories within a very narrow range- nearly 3,000 calories per day, no matter our activity level. By taking a closer look at what happens to the energy we consume, Pontzer explores the ways in which metabolism controls every aspect of our health - from fertility to immune function - and reveals the truth about the dynamic systems that sustains us. Filled with facts and memorable anecdotes, Burn will change the way you think about food, exercise and life.

*The Quantum Universe* Brian Cox, Jeff Forshaw, 2012-01-31 In *The Quantum Universe*, Brian Cox and Jeff Forshaw approach the world of quantum mechanics in the same way they did in *Why Does E=mc<sup>2</sup>?* and make fundamental scientific principles accessible-and fascinating-to everyone. The subatomic realm has a

reputation for weirdness, spawning any number of profound misunderstandings, journeys into Eastern mysticism, and woolly pronouncements on the interconnectedness of all things. Cox and Forshaw's contention? There is no need for quantum mechanics to be viewed this way. There is a lot of mileage in the "weirdness" of the quantum world, and it often leads to confusion and, frankly, bad science. The Quantum Universe cuts through the Wu Li and asks what observations of the natural world made it necessary, how it was constructed, and why we are confident that, for all its apparent strangeness, it is a good theory. The quantum mechanics of The Quantum Universe provide a concrete model of nature that is comparable in its essence to Newton's laws of motion, Maxwell's theory of electricity and magnetism, and Einstein's theory of relativity.

*I'm a Joke and So are You* Robin Ince, Stewart Lee, 2018-10-04 The popular comedian and science presenter blends memoir, wit, and popular science to examine the human condition.

*Mack The Life* Lee Mack, 2012-09-27 'His book is a joy to read, full of homespun wisdom and hilarious asides' Independent \_\_\_\_\_ Where do comedians come from? Why is it that one person is a funny bloke down the pub while another actually makes a living by standing up in front of an audience telling jokes? And where does all that material come from? Well, young Lee McKillop used to wonder that too. \_\_\_\_\_ Growing up in his parents' pub, small and wiry in a world of bigger and chunkier specimens, Lee quickly learned that cracking jokes was a way to get attention. After a somewhat random series of jobs, which included being Red Rum's stableboy and a bingo hall barman, it was as a Great Yarmouth holiday camp entertainer that he had his first crack at telling jokes on stage. It got him some laughs, the sack and a punch in the face.\* Now, as Lee Mack, he's one of our best loved and most successful comedians, both as a live stand-up and on television. In *Mack the Life*, Lee tells the story of how he got there and gives

extraordinary insight into what really makes comics tick. Hilarious and brilliant, it's the kind of book which reminds you why you learned to read in the first place. \*Nearly.

Billionaires Darryl Cunningham, 2021-05-20 An informative and funny deconstruction of how the giants of American capitalism shape our world In Billionaires, Darryl Cunningham offers an illuminating analysis of the origins and ideological evolutions of four key players in the American private sector—Amazon founder and CEO Jeff Bezos, media mogul Rupert Murdoch, and oil and gas tycoons Charles and David Koch. What emerges is a vital critique of American capitalism and the power these individuals have to assert a corrupting influence on policy-making, political campaigns, and society writ large. Cunningham focuses on a central question: Can the world afford to have a tiny global elite squander resources and hold unprecedented political influence over the rest of us? The answer is detailed through hearty research, common sense reasoning, and astute comedic timing. Billionaires reveals how the fetishized free market operates in direct opposition with the health of our planet and needs of the most vulnerable -- how Murdoch's media mergers facilitated his war-mongering, how Amazon's litigiousness and predatory acquisitions made them "The Everything Store," and how the Kochs' father's refineries literally fueled Nazi Germany. In criticizing the uncontrolled reach of power by Rupert Murdoch (in fueling the far right), the Koch Brothers (in advocating for climate change denial), and Jeff Bezos (in creating unsafe working conditions), Cunningham speaks truth to power. Billionaires ends by suggesting alternatives for a safer and more just society.

The Ministry of Ungentlemanly Warfare Damien Lewis, 2015-09-08 From the award-winning historian, war reporter, and author Damien Lewis (Zero Six Bravo, Judy) comes the incredible true story of the top-secret butcher-and-bolt black ops units Prime Minister Winston Churchill assigned the task of stopping the unstoppable German war machine. Criminals, rogues, and survivalists, the brutal tactics and grit of these deniables would define a military unit the likes of which the world had never seen. When France fell to the Nazis in spring 1940, Churchill declared that Britain would resist the advance of the German army--alone if necessary. Churchill commanded the Special Operations Executive to secretly develop of a very special kind of military unit that would operate on their own initiative deep behind enemy lines. The units would be licensed to kill, fully deniable by the British government, and a ruthless force to meet the advancing Germans. The very first of these butcher-and-bolt units--the innocuously named Maid Honour Force--was led by Gus March-Phillips, a wild British eccentric of high birth, and an aristocratic, handsome, and bloodthirsty young Danish warrior, Anders Lassen. Amped up on amphetamines, these assorted renegades and sociopaths undertook the very first of Churchill's special operations--a top-secret, high-stakes mission to seize Nazi shipping in the far-distant port of Fernando Po, in West Africa. Though few of these early desperadoes survived WWII, they took part in a series of fascinating, daring missions that changed the course of the war. It was the first stirrings of the modern special-ops team, and all of the men involved would be declared war heroes when it was all over. The Ministry of Ungentlemanly Warfare focuses on a dozen of these

extraordinary men, weaving their stories of brotherhood, comradeship, and elite soldiering into a gripping narrative yarn, from the earliest missions to Anders Lassen's tragic death, just weeks before the end of the war.

**Putting the Rabbit in the Hat** Brian Cox, 2022-01-18 NAMED A BEST BOOK OF 2022 BY THE NEW YORKER The incredible rags-to-riches story of acclaimed actor Brian Cox, best known as Succession's Logan Roy, from a troubled, working-class upbringing in Scotland to a prolific career across theatre, film and television. From Hannibal Lecter in Manhunter to media magnate Logan Roy in HBO's Succession, Brian Cox has made his name as an actor of unparalleled distinction and versatility. We are familiar with him on screen, but few know of his extraordinary life story. Growing up in Dundee, Scotland, Cox lost his father when he was just eight years old and was brought up by his three elder sisters in the aftermath of his mother's nervous breakdowns and ultimate hospitalization. After joining the Dundee Repertory Theatre at the age of fifteen, you could say the rest is history – but that is to overlook the enormous effort that has gone into the making of the legend we know today. Rich in emotion and meaning, with plenty of laughs along the way, this seminal autobiography captures both Cox's distinctive voice and his very soul.

**Universal** Brian Cox, Jeff Forshaw, 2017-03-28 An awe-inspiring, unforgettable journey of scientific exploration from Brian Cox and Jeff Forshaw, the international bestselling authors of Why Does  $E=MC^2$ ? and The Quantum Universe, with 55 black-&-white and 45 full-color pages featuring photographs, diagrams, maps, tables, and graphs We dare to imagine a time before the Big Bang, when the entire universe was compressed into a space smaller than an atom. And now, as Brian Cox and Jeff Forshaw show, we can do more than imagine: we can understand. Universal takes us on an epic journey of scientific exploration. It reveals how we can all come to grips with some of the most fundamental questions about our Earth, Sun, and solar system--and the star-filled galaxies beyond. How big is our solar system? How quickly is space expanding? How big is the universe? What is it made of? Some of these questions can be answered on the basis of observations you can make in your

own backyard. Other answers draw on the astonishing information now being gathered by teams of astronomers operating at the frontiers of the known universe. At the heart of all this lies the scientific method. Science reveals a deeper beauty and connects us to each other, to our world, and to our universe. Science reaches out into the unknown. As Universal demonstrates, if we dare to imagine, we can do the same.
