A young dinosaur emerges to a world he does not recognize He meets Arctic Fox, who has never seen anyone like him. Where are all the dinosaurs? Where is his mother? As Arctic Fox directs him to the warmer South, Dinosaur begins a long journey to answer his questions. His journey takes him through Yellowstone, Yosemite and Grand Canyon National Parks, where he seeks the help of animals in finding his answers. Does he ever find his home and family?

The Last Dinosaur - Mystery in Egypt Maahi Matai,2023-05-02 “Every now and then he would fumble around in his backpack, and take out an old, torn, browning parchment and inspect it.” When 11-year-old Linda goes for finding ancient remains and fossils with her father, she discovers an enormous dinosaur egg. The dinosaur soon becomes a part of their life... and a cause for adventure! When they go to Egypt to sight-see and gaze at the magnificent pyramids, they discover that someone was out to steal a scientist’s discovery about an ancient civilization! With the help of her family, and a purple Apatosaurus dinosaur, will she be able to solve the mystery?

Voyage of the Turtle Carl Safina,2007-04-01 The story of an ancient sea turtle and what its survival says about our future, from the award-winning writer and naturalist Though nature is indifferent to the struggles of her creatures, the human effect on them is often premeditated. The distressing decline of sea turtles in Pacific waters and their surprising recovery in the Atlantic illuminate what can go both wrong and right from our interventions, and teach us the lessons that can be applied to restore health to the world's oceans and its creatures. As Voyage of the Turtle, Carl Safina's compelling natural history adventure makes clear, the fate of the astonishing leatherback turtle, whose ancestry can be traced back 125 million years, is in our hands. Writing with verve and color, Safina describes how he and his colleagues track giant pelagic turtles across the world's oceans and onto remote beaches of every continent. As scientists apply lessons learned in the Atlantic and Caribbean to other endangered seas, Safina follows leatherback migrations, including a thrilling journey from Monterey, California, to nesting grounds on the most remote beaches of Papua, New Guinea. The only surviving species of its genus, family, and suborder, the leatherback is an evolutionary marvel: a reptile that behaves like a warm-blooded dinosaur, an ocean animal able to withstand colder water than most fishes and dive deeper than any whale. In his peerless prose, Safina captures the delicate interaction between these gentle giants and the humans who are finally playing a significant role in their survival. Magnificent . . . A joyful, hopeful book. Safina gives us ample reasons to be enthralled by this astonishing ancient animal—and ample reasons to care. -- The Los Angeles Times

What the Dinosaurs Did Last Night Refe Tuma,Susan Tuma,2015-10-20 From the creative parents who brought the world the web sensation Dinovember comes photographic proof of what toys get up to when the rest of the house is asleep. You might have noticed weird things happening in your house. Unexplainable messes. Food all over the kitchen floor. Who could the culprits be? Dinosaurs! Boasting bright and hilarious photographs, along with a story written from the point of view of an older, wiser sibling, Refe and Susan Tuma's picture book documents a very messy adventure that shows just what the dinosaurs did last night.

Styracosaurus and Other Last Dinosaurs Dougal Dixon,2006 Some of the most interesting-looking dinosaurs arrived late in the dinosaur age. These dinosaurs used their armor and horns to survive. Find out what else they did to become the last ones standing--P. [4] of cover.

The Last Surviving Dinosaur Steven Joseph,2019-04-02 Many people grew up thinking that dinosaurs became extinct when the Dark Ages arrived. That is only partly true. Yes, the Dark Ages did come, but the tiniest dinosaur survived, and believe it or not, humans descended from this very special dinosaur: the TyrantoCrankaTsuris.

The Art of the Good Dinosaur ,2015-11-10 What if the asteroid that forever changed life on Earth missed the planet completely and dinosaurs never became extinct? The Good Dinosaur expands on that premise in a humorous and exciting original story about Arlo, a lively Apatosaurus with a big heart. Showcasing the stunning artwork from the film's creation—including sketches, storyboards, maquette sculpts, colorscripts, and much more—The Art of The Good Dinosaur offers the ultimate behind-the-scenes look at the research and design that went into the making of this innovative film. The Lost Dinosaurs of Egypt William Nothdurft,Josh Smith,2002-09-24 The date is January 11, 1911. A young German paleontologist, accompanied only by a guide, a cook, four camels, and a couple of camel drivers, reaches the lip of the vast Bahariya Depression after a long trek across the bleak plateau of the western desert of Egypt. The scientist, Ernst Freiherr Stromer von Reichenbach, hopes to find fossil evidence of early mammals. In this, he will be disappointed, for the rocks here will prove to be much older than he thinks. They are nearly a hundred million years old. Stromer is about to learn that he has walked into the age of the dinosaurs. At the bottom of the Bahariya Depression, Stromer will find the remains of four immense and entirely new dinosaurs, along with dozens of other unique specimens. But there will be reversals—shipments delayed for years by war, fossils shattered in transit, stunning personal and professional setbacks. Then, in a single cataclysmic night, all of his work will be destroyed and Ernst Stromer will slip into history and be forgotten. The date is January 11, 2000—eighty-nine years to the day after Stromer descended into Bahariya. Another young paleontologist, Ameri-can graduate student Josh Smith, has brought a team of fellow scientists to Egypt to find Stromer’s dinosaur graveyard and resurrect the German pioneer’s legacy. After weeks of digging, often under appalling conditions, they fail utterly at rediscovering any of Stromer’s dinosaur species. Then, just when they are about to declare defeat, Smith’s team discovers a dinosaur of such staggering immensity that it will stun the world of paleontology and make headlines around the globe. Masterfully weaving together history, science, and human drama, The Lost Dinosaurs of Egypt is the gripping account of not one but two of the twentieth century’s great expeditions of discovery.

Dinosaurs: New Visions of a Lost World Michael J. Benton,2021-11-23 The world’s leading paleontologist takes us on a visual tour of the latest dinosaur science, illustrated with accurate and stunning paleoart. Dinosaurs are not what you thought they were—or at least, they didn’t look like you thought they did. Here, world-leading paleontologist Michael J. Benton brings us a new visual guide to the world of the dinosaurs, showing how rapid advances in technology and amazing new fossil finds have changed the way we see these extinct beasts forever. Stunning, brand-new illustrations by paleoartist Bob Nicholls display the latest and most exciting scientific discoveries in vibrant color. From Sinosauropteryx, the first dinosaur to have its color patterns identified—a ginger-and-white striped tail and a “bandit mask”—by Benton’s team at the University of Bristol to recent research on the surprising mixed feathers and scales of Kulindadromeus, this is one of the first books to include cutting-edge scientific research in paleontology. Each chapter focuses on a particular extinct species, featuring a specially commissioned illustration by Bob Nicholls that brings to life the latest scientific breakthroughs, with accompanying text exploring how paleontologists have determined new details, such as the patterns on skin and the colors of feathers of animals that lived millions of years ago. This visual compendium surprises and challenges everything you thought you knew about what dinosaurs looked like and how they lived.

Triceratops Elizabeth J. Sandell,1988 Presents presently-known information on the plant-eating dinosaur that looked like a rhinoceros.

The Last Dinosaur Manuel Tristante,2017-06-19 From the author of Harlequin and Beneath the Rainbow comes a magical story about the extinction of the dinosaurs! Author's note: The dinosaurs weren't extinguished by a meteorite. A new theory suggests that everything was caused by earthquakes. Synopsis: Dinosaurs were not extinguished by a meteorite. What Emilius did not know when he read the news in the newspaper was that his life would turn a hundred and eighty degrees. Refusing to accept the new scientific theory that blames earthquakes for the extinction of dinosaurs, he will be involved in a great adventure. While it began as a terrific day of digging with the DFSC (Dinosaur Fossil Search Company) will end in punishment that will have him fleeing in the middle of the night, seeing the new theory differently, and running to protect a surprising discovery. He will have the help of his teacher Conchi, his friends and his own father to get involved in a media world with scientists and the press. What will you find between its pages? 1 Paleontology, archeology and dinosaurs. 2 Strong values such as the importance of family, love, friendship or fear itself. 3 Past and present. 4 A story of overcoming, familiar and close, and new theories. The Last Days of the Dinosaurs Riley Black,2022-04-26 Some 66 million years ago, an asteroid some seven miles across slammed into the Earth, leaving a geologic wound over 50 miles in diameter. In the terrible mass extinction that followed, more than half of known species vanish seemingly overnight. But this worst single day in the history of life of Earth was as critical for us as it was for the dinosaurs, as it allowed for evolutionary opportunities that were closed for the previous 100 million years. In The Last Days of the Dinosaurs, Riley Black walks readers through what happened in the days, the years, the centuries and the million years after the impact. Life's losses were sharp and deeply felt, but the hope carried by the beings that survived sets the stage for the world as we know it now.

The Last Dinosaur Sandy Dengler,1994 The tyrannosaurus that stopped Melissa Baugh dead in its tracks may not have been the real McCoy, but it was lethal nonetheless. Now the assistant director is not-so-ancient history, and the film crew in town from hollywood is feeling mroe than desert heat. Phoenix homicide detectives Jor Rodriguez and Tommy Flaherty are embroiled in yet another sticky murder mystery as they contend with a woolly assortment of kooks, inflated egos, and the 'star' of the show, a two-story-tall lifelike dinosaur that apparently still has a nose for blood. -- back cover.
