Drone Age Cinema Steen Ledet Christiansen,2016-11-29 At a time when technological advances are transforming cultures and supporting new automated military operations, action films engage the senses and, in doing so, allow viewers to embody combat roles. This book argues that through film the viewer adapts to an ecology of fear, one that reflects global panic at the near-constant threat of conflict and violence. Often overwhelming in its audiovisual assault, action cinema attempts to overpower our bodies with its own through force and intensity. In this book, Steen Ledet Christiansen identifies five aspects central to how action films produce such physical movements and responses through vectors, droning, kinetics, telesomatics and volatility and in so doing unveils new modes of perception that acclimatise us for warfare. Drawing on theories from film-philosophy and a consideration of the aesthetics and phenomenology of war, this is an innovative study of the evolving action movie and its role in the targeted address of battle. Chapters investigate new modes of cinematic experience through in-depth case studies of *Iron Man*, *Avatar* and the *Jason Bourne* trilogy, through to *The Hurt Locker*

and Mad Max: Fury Road.

A Companion to Australian Cinema Felicity Collins, Jane Landman, Susan Bye, 2019-06-05 The first comprehensive volume of original essays on Australian screen culture in the twenty-first century. A Companion to Australian Cinema is an anthology of original essays by new and established authors on the contemporary state and future directions of a well-established national cinema. A timely intervention that challenges and expands the idea of cinema, this book brings into sharp focus those facets of Australian cinema that have endured, evolved and emerged in the twenty-first century. The essays address six thematically-organized propositions – that Australian cinema is an Indigenous screen culture, an international cinema, a minor transnational imaginary, an enduring auteur-genre-landscape tradition, a televisual industry and a multiplatform ecology. Offering fresh critical perspectives and extending previous scholarship, case studies range from The Lego Movie, Mad Max, and Australian stars in Hollywood, to transnational co-productions, YouTube channels, transmedia and nature-cam documentaries. New research on trends – such as the convergence of television and film, digital transformations of screen production and the shifting roles of women on and off-screen – highlight how established precedents have been influenced by new realities beyond both cinema and the national. Written in an accessible style that does not require knowledge of cinema studies or Australian studies Presents original research on Australian actors, such as Cate Blanchett and Chris Hemsworth, their training, branding, and path from Australia to Hollywood Explores the films and filmmakers of the Blak Wave and their challenge to Australian settler-colonial history and white identity Expands the critical definition of cinema to include YouTube channels, transmedia documentaries,

multiplatform changescapes and cinematic remix Introduces readers to founding texts in Australian screen studies A Companion to Australian Cinema is an ideal introductory text for teachers and students in areas including film and media studies, cultural and gender studies, and Australian history and politics, as well as a valuable resource for educators and other professionals in the humanities and creative arts.

Apocalypse and Heroism in Popular Culture Katherine E. Sugg, 2022-03-01 Stories of world-ending catastrophe have featured prominently in film and television. Zombie apocalypses, climate disasters, alien invasions, global pandemics and dystopian world orders fill our screens--typically with a singular figure or tenacious group tasked with saving or salvaging the world. Why are stories of End Times crisis so popular with audiences? And why is the hero so often a white man who overcomes personal struggles and major obstacles to lead humanity toward a restored future? This book examines the familiar trope of the hero and the recasting of contemporary anxieties in films like *The Walking Dead*, *Snowpiercer* and *Mad Max: Fury Road*. Some have familiar roots in Western cultural traditions yet many question popular assumptions about heroes and heroism to tell new and fascinating stories about race, gender and society and the power of individuals to change the world.

Blood, Sweat & Chrome Kyle Buchanan, 2022-02-22 One of Entertainment Weekly's Best Books of 2022! New York Times journalist Kyle Buchanan details the bonkers construction of director George Miller's long-awaited and often seemingly-doomed fourth Mad Max movie via testimony from the filmmaker, Charlize Theron, Tom Hardy, and a host of others. The result is an epic and – when it comes to the Theron-Hardy on-set relationship – acrimonious tale no less jaw-dropping than the movie itself. – Entertainment Weekly A full-speed-ahead oral history of the nearly two-decade making of the cultural phenomenon *Mad Max: Fury Road*—with more than 130 new interviews with key members of the cast and crew, including Charlize Theron, Tom Hardy, and director George Miller, from the pop culture reporter for The New York Times, Kyle Buchanan. It won six Oscars and has been hailed as the greatest action film ever, but it is a miracle *Mad Max: Fury Road* ever made it to the screen... or that anybody survived the production. The story of this modern classic spanned nearly two decades of

wild obstacles as visionary director George Miller tried to mount one of the most difficult shoots in Hollywood history. Production stalled several times, stars Tom Hardy and Charlize Theron clashed repeatedly in the brutal Namib Desert, and Miller's crew engineered death-defying action scenes that were among the most dangerous ever committed to film. Even accomplished Hollywood figures are flummoxed by the accomplishment: As the director Steven Soderbergh has said, "I don't understand how they're not still shooting that film, and I don't understand how hundreds of people aren't dead." Kyle Buchanan takes readers through every step of that moviemaking experience in vivid detail, from *Fury Road*'s unexpected origins through its outlandish casting process to the big-studio battles that nearly mutilated a masterpiece. But he takes the deepest dive in reporting the astonishing facts behind a shoot so unconventional that the film's fantasy world began to bleed into the real lives of its cast and crew. As they fought and endured in a wasteland of their own, the only way forward was to have faith in their director's mad vision. But how could Miller persevere when almost everything seemed to be stacked against him? With hundreds of exclusive interviews and details about the making of *Fury Road*, readers will be left with one undeniable conclusion: There has never been a movie so drenched in sweat, so forged by fire, and so epic in scope.

Geek Heroines Karen M. Walsh, 2019-10-11 *Geek Heroines* not only tells the stories of fictional and real women, but also explores how they represent changes in societal views of women, including women of color and the LGBTQ community. Geek culture stems from science and technology and so is frequently associated with science fiction. In the beginnings of science fiction, the genre was tied to magic and dystopic outcomes; however, as technology turned geek into chic, geek culture extended to include comics, video games, board games, movie, books, and television. Geek culture now revolves around fictional characters about whom people are passionate. *Geek Heroines* seeks to encourage women and young girls in pursuing their passions by providing them with female role models in the form of diverse heroines within geek culture. Carefully curated to incorporate LGBTQ+ identities as well as racial diversity, the book defines geek culture, explains geek culture's sometimes problematic nature, and provides detailed fiction and nonfiction biographies that highlight women in this area. Entries include writers and directors as well as characters from comic books, science fiction, speculative fiction, television, movies, and video games.

The Apocalyptic Dimensions of Climate Change Jan Alber, 2021-09-07 Climate change and the apocalypse are frequently associated in the popular imagination of the twenty-first century. This collection of essays brings together climatologists, theologians, historians, literary scholars, and

philosophers to address and critically assess this association. The contributing authors are concerned, among other things, with the relation between cultural and scientific discourses on climate change; the role of apocalyptic images and narratives in representing environmental issues; and the tension between reality and fiction in apocalyptic representations of catastrophes. By focusing on how figures in fictional texts interact with their environment and deal with the consequences of climate change, this volume foregrounds the broader social and cultural function of apocalyptic narratives of climate change. By evoking a sense of collective human destiny in the face of the ultimate catastrophe, apocalyptic narratives have both cautionary and inspirational functions. Determining the extent to which such narratives square with scientific knowledge of climate change is one of the main aims of this book.

Indian Woman, Feminism and Women's Liberation Saji Narayanan CK, 2022-12-05 Capitalism and Communism, the progenies of the semitic culture, have given birth to two different streams of women's Liberation. These streams, which have stormed western society and communist groups, have now actively intruded into the Indian socio-political milieu. The moment these concepts encounter with Indian realities, they display their inherent contradictions and limitations. But seldom an Indian alternative to such views is discussed. This book is an attempt to understand the Indian approach through a comparative study aimed at addressing the issues related to the future women

Critical Criminology and Literary Criticism McGregor, Rafe, 2021-11-08 There is increasing pressure on the humanities to justify their value and on criminology to undertake interdisciplinary research. In this book, Rafe McGregor establishes a new interdisciplinary methodology, 'criminological criticism', harnessing the synergy between literary studies and critical criminology to produce genuine interventions in social reality. McGregor practices criminological criticism on George Miller's 'Mad Max: Fury Road', Prime Video's 'Carnival Row' and J.K. Rowling's 'The Cuckoo's Calling', demonstrating how these popular allegories provide insights into the harms of sexism, racism and class prejudice. This book proposes a model for collaboration between literary studies and critical criminology that is beneficial to the humanities, the social sciences and society.

Summary of Kyle Buchanan's Blood, Sweat & Chrome Everest Media,2022-03-27T22:59:00Z
Please note: This is a companion version & not the original book. Sample Book Insights: #1 In September 2012, the movie Mad Max: Fury Road was filming in the Namib Desert. It was behind schedule and over budget, and its lead, Tom Hardy, often failed to show up to set. Warner Bros. head Jeff Robinov threatened to shut down the film early, and eventually Miller was forced to choose between the chase scene or the beginning and end of the film. #2 Miller's film is a masterpiece, and it is subversive in the way it tackles up-to-date issues like environmental collapse, female empowerment, and resource hoarding by the rich. #3 Mad Max: Fury Road is a movie that should not exist. It's the fourth film in a long-running franchise, yet it was hailed by critics as one of the most original movies ever made. It's a big-studio action movie, yet it was nominated for Best Picture and won several Oscars. #4 Miller's film is a engine of pure cinema. It is surreal, over-the-top, and full of action. It makes you feel more alive just watching it, and it has never gone away as I've watched it over and over again.

Ecological Film Theory and Psychoanalysis Robert Geal,2021-07-12 This book applies ecolinguistics and psychoanalysis to explore how films fictionalising environmental disasters provide spectacular warnings against the dangers of environmental apocalypse, while highlighting that even these apparently environmentally friendly films can still facilitate problematic real-world changes in how people treat the environment. Ecological Film Theory and Psychoanalysis argues that these films exploit cinema's inherent Cartesian grammar to construct texts in which not only small groups of protagonist survivors, but also vicarious spectators, pleasurably transcend the fictionalised destruction. The ideological nature of the 'lifeboats' on which these survivors escape, moreover, is accompanied by additional elements that constitute contemporary Cartesian subjectivity, such as class and gender binaries, restored nuclear families, individual as opposed to social responsibilities for disasters, and so on. The book conducts extensive analyses of these processes, before considering alternative forms of filmmaking that might avoid the dangers of this existing form of storytelling. The book's new ecosophy and film theory establishes that Cartesian subjectivity is an environmentally destructive 'symptom' that

everyday linguistic activities like watching films reinforce. This book will be of great interest to students and scholars of film studies, literary studies (specifically ecocriticism), cultural studies, ecolinguistics, and ecosophy.

Ecomobilities Michael W. Pesses,2021-10-19 Ecomobilities examines the American cultural attachment to automobility. By analyzing the role of machines and transportation in apocalyptic films, Michael W. Pesses reveals the ideological connections between automobiles, the environment, and the end of the world.
