Thor Read-Along Storybook Marvel Press Book Group,2016-10-04 As the son of Odin, king of the Norse gods, Thor will soon inherit the throne of Asgard from his aging father. However, on the day that he is to be crowned, Thor reacts with brutality when the gods' enemies, the Frost Giants, enter the palace in violation of their treaty. As punishment, Odin banishes Thor to Earth. While Loki, Thor's brother, plots mischief in Asgard, Thor, now stripped of his powers, faces his greatest threat. Action-packed narration and thrilling sound effects add to the magic in this exciting storybook.

Aeronautics and Space Report of the President: 1972 Activities United States. National Aeronautics and Space Council,1972

The Shock and Vibration Bulletin ,1964

Spacecraft Technology Mark Williamson,2006-02-23 This book covers the development of space technology in the late 1950s and 1960s from the launch of Sputnik 1 in October 1957 to the landing of men on the moon in 1969. The text begins by looking at the challenge of getting into space and the development of the launch of the space launch vehicle, and moves on to discussion of unmanned satellites and spaceprobes, and the first capsules deployed in Earth orbit and the Apollo missions to the moon.

To Reach the High Frontier Roger D. Launius,Dennis R. Jenkins,2014-07-11 Access -- no single word better describes the primary concern of the exploration and development of space. Every participant in space activities - civil, military, scientific, or commercial -- needs affordable, reliable, frequent, and flexible access to space. To Reach the High Frontier details the histories of the various space access vehicles developed in the United States since the birth of the space age in 1957. Each case study has been written by a specialist knowledgeable about the vehicle described and places each system in the larger context of the history of spaceflight. The technical challenge of reaching space with chemical rockets, the high costs associated with space launch, the long lead times necessary for scheduling flights, and the poor reliability of the rockets themselves show launch vehicles to be the space program's most difficult challenge.
