**Tracking King Tiger** José Angel Gutiérrez, 2019-11-01 Reies López Tijerina, one of the Four Horsemen of the Chicano Movement, led the land grant struggle by Hispanos in the 1960s to recover the lands granted to their ancestors by Spain and Mexico and then guaranteed by the Treaty of Guadalupe Hidalgo. In his struggle, Tijerina became the target of local and state law enforcement officials in New Mexico and the FBI nationwide. José Angel Gutiérrez meticulously examines thousands of pages of FBI documents, interview transcripts, newspaper reports, and other written accounts on Tijerina and the Alianza Federal de Pueblos Libres, the organization of land grant claimants led by Tijerina in New Mexico. The primary source materials that document the U.S. government's attempts to destroy Tijerina, his family, and his followers complement the secondary literature on Tijerina and his efforts as the premier leader of the land grant recovery movement. Threaded through the volume are glimpses into the special personal relationship between Tijerina and the author.

**Indictment of Caste System through Indian fiction** Dr. Mamta Bagria, Dr. Sangeeta Jhajharia, 2019-03-07 The authors within the fringes of this book have tried to bring in the salient features of the philosophical and sociological foundation of caste. The objective of this book is to: i. Provide a brief historical survey of caste and the state of caste at the present time. ii. Outline the theoretical foundation of caste. iii. Illustrate different theoretical approaches through well-known works of Indian English fictions of Mulk Raj Anand, Bhabani Bhattacharya and Arundhati Roy. It appears that the well-read authors have their focus on the Indian background all through the book.

Tiger Bone & Rhino Horn Richard Ellis, 2013-02-22 In parts of Korea and China, moon bears, black but for the crescent-shaped patch of white on their chests, are captured in the wild and brought to bear farms where they are imprisoned in squeeze cages, and a steel catheter is inserted into their gall

bladders. The dripping bile is collected as a cure for ailments ranging from an upset stomach to skin burns. The bear may live as long as fifteen years in this state. Rhinos are being illegally poached for their horns, as are tigers for their bones, thought to improve virility. Booming economies and growing wealth in parts of Asia are increasing demand for these precious medicinals. Already endangered species are being sacrificed for temporary treatments for nausea and erectile dysfunction. Richard Ellis, one of the world's foremost experts in wildlife extinction, brings his alarm to the pages of *Tiger Bone & Rhino Horn*, in the hope that through an exposure of this drug trade, something can be done to save the animals most direly threatened. Trade in animal parts for traditional Chinese medicine is a leading cause of species endangerment in Asia, and poaching is increasing at an alarming rate. Most of traditional Chinese medicine relies on herbs and other plants, and is not a cause for concern. Ellis illuminates those aspects of traditional medicine, but as wildlife habitats are shrinking for the hunted large species, the situation is becoming ever more critical. One hundred years ago, there were probably 100,000 tigers in India, South China, Sumatra, Bali, Java, and the Russian Far East. The South Chinese, Caspian, Balinese, and Javan species are extinct. There are now fewer than 5,000 tigers in all of India, and the numbers are dropping fast. There are five species of rhinoceros--three in Asia and two in Africa--and all have been hunted to near extinction so their horns can be ground into powder, not for aphrodisiacs, as commonly thought, but for ailments ranging from arthritis to depression. In 1930, there were 80,000 black rhinos in Africa. Now there are fewer than 2,500. Tigers, bears, and rhinos are not the only animals pursued for the sake of alleviating human ills--the list includes musk deer, sharks, saiga antelope, seahorses, porcupines, monkeys, beavers, and sea lions--but the dwindling numbers of those rare species call us to attention. Ellis tells us what has been done successfully, and contemplates what can and must be done to save these animals or, sadly, our

children will witness the extinction of tigers, rhinos, and moon bears in their lifetime.

**Cricket: A Political History of the Global Game, 1945-2017** Stephen Wagg, 2017-11-14

Cricket is an enduring paradox. On the one hand, it symbolises much that is outmoded: imperialism; a leisured elite; a rural, aristocratic Englishness. On the other, it endures as a global game and does so by skilful adaptation, trading partly on its mythic past and partly on its capacity to repackage itself. This ambitious new history recounts the politics of cricket around the world since the Second World War, examining key cultural and political themes, including decolonisation, racism, gender, globalisation, corruption and commercialisation. Part One looks at the transformation of cricket cultures in the ten territories of the former British Empire in the years immediately after 1945, a time when decolonisation and the search for national identity touched every cricket playing region in the world. Part Two focuses on globalisation and the game's evolution as an international sport, analysing: social change and the Ashes; the campaigns for new cricket formats; the development of the women's game; the new breed of coach; the limits to the game's global expansion; and the rise of India as the world's leading cricket power. *Cricket: A Political History of the Global Game, 1945-2017* is fascinating reading for anybody interested in the contemporary history of sport.

**Exile Armies** M. Bennett, P. Latawski, 2004-11-30 Operating from outside their homelands, exile armies have been an understudied phenomenon in history and international politics. From avoiding the fate of being a mere tool for a patron power to facing issues regarding their military efficacy and political legitimacy, exiled armies have found their journey home a tortuous one. This collection of essays covers the experience of exiled forces in the Second World War, principally in Europe, and also covers their activities around the globe during the Cold War and beyond.

*Felines of the World* Giovanni G. Bellani, 2019-09-19 *Felines of the World: Discoveries in*

Taxonomic Classification and History provides the most recent taxonomic, paleontological, phylogenetic and DNA advances of wild felid and domestic cat species following guidelines dictated by the IUCN SSC Cat Specialist Group. It highlights the importance of felines and their role as predators in maintaining the ecological biome balance in which they have evolved. The book delves into the anatomical, evolutionary and zoogeographic features of fossil and current felid species. Each species is described in detail, detailing its classification, habitat and biological habits. This book also presents the most updated threat and conservation status of each species. This book is an ideal resource for zoologists and paleontologists, primarily those interested in the evolution and features of extinct and extant felines. Details the lineage, features and habits of over 40 felid species Covers all species within the Felidae family, including lions, lynxes, pumas and domestic cats Features detailed and colorful illustrations, diagrams and species location maps Informs readers on endangered species, current threats and conservation efforts

*End of empire and the English novel since 1945* Rachael Gilmour, Bill Schwarz, 2015-07-01  
Available in paperback for the first time, this first book-length study explores the history of postwar England during the end of empire through a reading of novels which appeared at the time, moving from George Orwell and William Golding to Penelope Lively, Alan Hollinghurst and Ian McEwan. Particular genres are also discussed, including the family saga, travel writing, detective fiction and popular romances. All included reflect on the predicament of an England which no longer lies at the centre of imperial power, arriving at a fascinating diversity of conclusions about the meaning and consequences of the end of empire and the privileged location of the novel for discussing what decolonization meant for the domestic English population of the metropole. The book is written in an easy style, unburdened by large sections of abstract reflection. It endeavours to bring alive in a new

way the traditions of the English novel.

**The Domino's Story** Marcia Layton Turner, 2020-10-27 Imagine if you were there, taking notes, as a small pizza joint became one of the most successful restaurants in the world. The Domino's Story will help you understand and adopt the competitive strategies, workplace culture, and business practices that made the iconic pizza chain the innovative restaurant and e-commerce leader it is today. As one of the most technologically advanced fast-food chains in the market, Domino's has cemented their reputation for innovation, paved in industry-leading profits. In February 2018, according to Ad Age, Domino's unseated Pizza Hut to become the largest pizza seller worldwide in terms of sales. Rather than just tampering with a recipe that was working, they decided to think outside of the pizza box by creating digital tools that emphasized convenience and put the customer first. For the first time, the adaptable strategies behind the rise and dominance of Domino's are outlined in these pages. Through the story of the Domino's, you'll learn: How to create meaningful innovation without changing the core of the product that people already love. How to recognize and take advantage of unique opportunities to alleviate your customers' pain points. How to grow a company by taking a holistic approach to the business. And, the importance of delivering a quality experience that will keep customers calling for more.

**Hitler's Tanks** Chris McNab, 2020-02-20 The Panzers that rolled over Europe were Germany's most famous fighting force, and are some of the most enduring symbols of World War II. However, at the start of the war, Germany's tanks were nothing extraordinary and it was operational encounters such as facing the Soviet T-34 during Operation Barbarossa which prompted their intensive development. Tactical innovation gave them an edge where technological development had not, making Hitler's tanks a formidable enemy. Hitler's Tanks details the development and operational

history of the light Panzer I and II, developed in the 1930s, the medium tanks that were the backbone of the Panzer Divisions, the Tiger, and the formidable King Tiger, the heaviest tank to see combat in World War II. Drawing on Osprey's unique and extensive armour archive, Chris McNab skilfully weaves together the story of the fearsome tanks that transformed armoured warfare and revolutionised land warfare forever.

*The Porsche Tiger and Ferdinand Tank Destroyer* Michael öhlich, 2022-06-28 A detailed, technical history of the WWII tank and tank destroyer designs of automotive icon Ferdinand Porsche.

**1932** David Pietrusza, 2015-10-20 Two Depression-battered nations confronted destiny in 1932, going to the polls in their own way to anoint new leaders, to rescue their people from starvation and hopelessness. America would elect a Congress and a president—ebullient aristocrat Franklin Roosevelt or tarnished “Wonder Boy” Herbert Hoover. Decadent, divided Weimar Germany faced two rounds of bloody Reichstag elections and two presidential contests—doddering reactionary Paul von Hindenburg against rising radical hate-monger Adolf Hitler. The outcome seemed foreordained—unstoppable forces advancing upon crumbled, disoriented societies. A merciless Great Depression brought greater—perhaps hopeful, perhaps deadly—transformation: FDR’s New Deal and Hitler’s Third Reich. But neither outcome was inevitable. Readers enter the fray through David Pietrusza’s page-turning account: Roosevelt’s fellow Democrats may yet halt him at a deadlocked convention. 1928’s Democratic nominee, Al Smith, harbors a grudge against his one-time protege. Press baron William Randolph Hearst lays his own plans to block Roosevelt’s ascent to the White House. FDR’s politically-inspired juggling of a New York City scandal threatens his juggernaut. In Germany, the Nazis surge at the polls but twice fall short of Reichstag majorities. Hitler, tasting power after a lifetime of failure and obscurity, falls to Hindenburg for the presidency—also twice within the

year. Cabals and counter-cabals plot. Secrets of love and suicide haunt Hitler. Yet guile and ambition may yet still prevail. 1932's breathtaking narrative covers two epic stories that possess haunting parallels to today's crisis-filled vortex. It is an all-too-human tale of scapegoats and panaceas, class warfare and racial politics, of a seemingly bottomless depression, of massive unemployment and hardship, of unprecedented public works/infrastructure programs, of business stimulus programs and damaging allegations of political cronyism, of waves of bank failures and of mortgages foreclosed, of Washington bonus marches and Berlin street fights, of once-solid financial empires collapsing seemingly overnight, of rapidly shifting social mores, and of mountains of irresponsible international debt threatening to crash not just mere nations but the entire global economy. It is the tale of spell-binding leaders versus bland businessmen and out-of-touch upper-class elites and of two nations inching to safety but lurching toward disaster. It is 1932's nightmare—with lessons for today.

Wild Cats of the World Luke Hunter, 2015-09-24 Ranging from largest – the Tiger, to the smallest – Rusty-spotted Cat, the world's wild cats are some of the most beautiful, ferocious and feared carnivores in the world. *Wild Cats of the World* provides a detailed account of each species of wild cat, examining their importance throughout history and the future of some of the most endangered breeds. Using magnificent colour plates by top wildlife artist Priscilla Barrett to depict each cat in detail *Wild Cats of the World* examines the characteristics of all 38 species as well as their history and current status. Luke Hunter's informative text combines with Barrett's beautiful drawings to create a must-have ebook for any cat enthusiast.

*Dodging Extinction* Anthony D. Barnosky, 2016-08-16 Paleobiologist Anthony D. Barnosky weaves together evidence from the deep past and the present to alert us to the looming Sixth Mass Extinction and to offer a practical, hopeful plan for avoiding it. Writing from the front lines of extinction research,

Barnosky tells the overarching story of geologic and evolutionary history and how it informs the way humans inhabit, exploit, and impact Earth today. He presents compelling evidence that unless we rethink how we generate the power we use to run our global ecosystem, where we get our food, and how we make our money, we will trigger what would be the sixth great extinction on Earth, with dire consequences. Optimistic that we can change this ominous forecast if we act now, Barnosky provides clear-cut strategies to guide the planet away from global catastrophe. In many instances the necessary technology and know-how already exist and are being applied to crucial issues around human-caused climate change, feeding the world's growing population, and exploiting natural resources. Deeply informed yet accessibly written, *Dodging Extinction* is nothing short of a guidebook for saving the planet.

**Franchising in America** Thomas S. Dicke, 1992 Using a series of case studies from five industries, Dicke analyzes franchising, a marketing system that combines large and small firms into a single administrative unit, strengthening both in the process. He studies the franchise industry from the 1840s to the 1980s, closely examining the rights and obligations of both the parent company and the franchise owner. A UNC Press Enduring Edition -- UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print. These editions are published unaltered from the original, and are presented in affordable paperback formats, bringing readers both historical and cultural value.

*Riding the Tiger* John Seidensticker, Peter Jackson, Sarah Christie, 1999-02-08 Beauty, grace and power make the tiger one of the world's most loved animals, yet it is precisely these qualities that have been its downfall. Poaching for skins and body parts, loss of habitat and prey and conflicts between people and wild tigers have caused catastrophic declines in tiger numbers throughout their

range. If wild tigers are to survive through the next century, we must act now. *Riding the Tiger* is a comprehensive, scientific and eminently readable account of the problems and possible solutions of securing a future for wild tigers. Lavishly illustrated in full colour, it is written by leading conservationists working throughout Asia. It is a vital information resource for tiger conservationists in the field, necessary reading for serious students of carnivore conservation and conservation biologists in general, and an accessible overview of tiger conservation for general readers.

**The Tiger and the Pangolin** Christopher Reed Coggins, 2002-09-30 This original and wide-ranging work examines historical perceptions of nature in China and the relationship between insider and outsider, state and village, top-down conservation policy and community autonomy. After an introduction to the history of wildlife conservation and nature reserve management in China, the book places recent tiger conservation efforts in the context of a two-thousand-year gazetteer of tiger attacks--the longest running documentation of human-wildlife encounters for any region in the world. This record offers a unique perspective on the history of the tiger as a dynamic force in the political culture of China. While the tiger has long been identified with political authority, the Chinese pangolin and its earthly magic have exerted a powerful influence in the everyday lives of those working and living in the fields and forests. Today the tiger and the pangolin, government officials and village communities, must work together closely if wildlife habitat conservation programs are to succeed. Extensive fieldwork in the Meihuashan Nature Reserve and other protected areas of western Fujian have led the author to advocate a landscape ecological approach to habitat conservation. By linking economic development to land use practices, he makes a strong case for integrating nature conservation efforts with land tenure and other socio-ecological issues in China and beyond.

Traditionalism Mark J. Sedgwick, 2023 From a leading expert comes an intellectual history and

analysis of Traditionalism, one of the least known and most influential philosophies that continues to impact politics today Traditionalism is a shadowy philosophy that has influenced much of the twentieth century and beyond: from the far-right to the environmental movement, from Sufi shaykhs and their followers to Trump advisor and right-wing provocateur Steve Bannon. It is a worldview that rejects modernity and instead turns to mystical truth and tradition as its guide. Mark Sedgwick, one of the world's leading scholars of Traditionalism, presents a major new analysis, pulling back the curtain on the foundations of Traditionalist philosophy, its major proponents--René Guénon, Julius Evola, and Frithjof Schuon--and their thought. One of Traditionalism's fundamental pillars is perennialism, the idea that beneath all the different forms of religion there lies one single timeless and esoteric tradition. A second is the view that everything is getting worse, rather than better, over time, leading to the Traditionalist critique of modernity. Sedgwick details Traditionalism's unique ideas about self-realization, religion, politics, and many other spheres. Traditionalism provides an expansive guide to this important school of thought--one that is little-known and even less understood--and shows how pervasive these ideas have become.

**The Last Valley** Martin Windrow, 2011-12-01 Stalingrad in the jungle: the battle that doomed the French Empire and led America into Vietnam In winter 1953-54 the French army in Vietnam challenged its elusive enemy, General Giap's Viet Minh, to pitched battle. Ten thousand French paras and legionnaires, with artillery and tanks, were flown to the remote valley of Dien Bien Phu to build a fortress upon which Giap could smash his inexperienced regiments. The siege which followed became a Stalingrad in the jungle, and its outcome shocked the world.

**Showcasing Globalisation?** Nicola Jo-Anne Smith, 2005 This book examines in-depth what is perhaps the test case for globalization: the Irish Republic. Not only is Ireland hailed as the most

globalized economy in the world, but its transformation into the Celtic Tiger in the 1990s is seen to demonstrate how nations can flourish in the new global economy. By implication, if other countries are to emulate Ireland's success they too must submit to the exogenous forces of globalization.

**The Panzerjäger Tiger(p) (Sd.Kfz. 184) Ferdinand** Slawomir Zajackowski, 2022-01-31 The German heavy tank destroyer Panzerjäger Tiger (P) (Sd.Kfz. 184) Ferdinand was based on the chassis of the Tiger (P) tank designed by Ferdinand Porsche. The vehicle was not accepted by army, but because 90 chassis have already been produced at the Nibelungenwerke plant, it was decided that they could be usefully developed. This is how the tank destroyer based on the Tiger (P) chassis was born.
