Hergé (Georges Remi) was born in Brussels in 1907. Over the course of 54 years he completed over 20 titles in The Adventures of Tintin series, which is now considered to be one of the greatest, if not the greatest, comics series of all time.

Tintin in the Land of the Soviets Hergé,2017-01-11 First published in 1929, Tintin in the Land of the Soviets did not again become available to the general public until 1973. This first great Tintin adventure introduced the brave reporter and his dog, and set the stage for the rest of Hergé's career as a master comic strip author. The colour in the new version of the story has the effect of increasing legibility, as it underscores the clarity of the drawings. The new version was created by Moulinsart with great attention to the restored original plates; the result is surprisingly modern, like a new adventure. The official return of Tintin in the Land of the Soviets will happen the day after the reporter's 88th birthday and also during the centenary of the October Revolution.

We Are All Astronauts Marc Blancher,Marc Bonner,Colleen Boyle,Martin Butler,Jörg Hartmann,Alexander Hauk,Sophia Hauk,Thomas Hensel,Matthew H. Hersch,Ansgar Oswald,Nils Daniel Peiler,Umberto Rossi,2019-06-21 We are all astronauts, the American architect and thinker Richard Buckminster Fuller wrote in 1968 in his book Operating Manual for Spaceship Earth, where he compared Earth to a spaceship, provided only with exhaustible resources while flying through space. These words show the presence the phenomenon of the astronaut and the cosmonaut had in the public mind from the second half of the twentieth century on: Buckminster Fuller was able to drive his point home by asking his audience to identify with one of the most prominent figures in the public sphere then: the space traveler. At the same time, Buckminster Fuller's words themselves seem to have played a significant role in further shaping the space-exploring human as a symbol and an image of humankind in general. The twelve contributions in this book by authors from the fields of literature, music, politics, history, the visual arts, film, computer games, comics, social sciences, and media theory track the development, changes and dynamics of this symbol by analyzing the various images of the astronaut and the cosmonaut as constructed throughout the different decades of space exploration, from its beginning to the present day.
