The Little Paper Esther Griffin White, 1915

The Paper Zoo Charlotte Sleight, 2016 The Paper Zoo traces the varied and vital role of natural history illustration in science and art since the fifteenth century. Sumptuous images from giants of the genre - such as the birds of John J. Audubon, or the insects of Maria Sybilla Merian - accompany less familiar but equally intriguing illustrations from manuscripts, journals, and rare printed books. Together, these works represent a collection of nature's wonders. Birds, butterflies, insects, mammals, reptiles, and fish were immortalised in print; pests and curiosities were wondered at; microorganisms made monsters. Travellers brought home, on paper, exotic creatures. Scholars and hobbyists insisted upon the beauty and significance of native creatures, both wild and domesticated - even cows and clothes moths. Charlotte Sleight shows how the styles and purposes of natural history illustration evolved, from animal alphabets to the extraordinary productions of eighteenth- and nineteenth-century naturalists and explorers recording and classifying the living world. She pays tribute to the achievements of little-known, unsung painters and colourists, alongside famous artists, in this mighty endeavour of collecting, defining and exhibiting animal life on the page. Here, too,

were ironies and contradictions: many naturalists were also hunters, and the dodo and the great auk survive only in paper zoos.--Publisher's description.

Complete all the pictures to make an animal procession travelling to the last page, where there's a group photo session at the zoo with a final collage to complete.

Origami Safari Anne Passchier,2020-10-14 Clear, full-color instructions for 21 models explain how to create lions, giraffes, elephants, and other creatures. Get started right away with the book's 24 pages of colorful origami paper.

The Paper Zoo Charlotte Sleight,2017-03-08 For many, their first experience of the natural world is in the pages of books and in library collections--a Paper Zoo. This stunning book gathers together a wide range of beautiful nature illustrations from the British Library's collections, including manuscripts, prints and drawings, and rare printed books, and featuring items from all around the world. With striking images of butterflies, beetles, spiders, animals, shells, fish and birds, the pages bring readers into contact with some of the world's most renowned natural history illustrators, such as Audubon and Catesby, and on expeditions to discover the lesser known rare finds as well. The text traces the story of the art of natural history from the Renaissance through the great age of exploration to the 19th century, to demonstrate how the collaboration between the fields of art and science has rendered such exquisite forms. The plates, all taken from books, are organized into several themed sections, though not on strict taxonomic grounds, but rather on broader themes of exotic, native, domestic, and paradoxical (with reference to what the species were at that time--for what is native now may well once have been exotic).
