G-Protein-Coupled Receptor Dimers Katharine
Herrick-Davis, Graeme Milligan, Giuseppe Di
Giovanni, 2017-08-31 G-protein-coupled receptors
(GPCRs) are believed to be the largest family of
membrane proteins involved in signal transduction
and cellular responses. They dimerize (form a pair
of macromolecules) with a wide variety of other
receptors. The proposed book will provide a
comprehensive overview of GPCR dimers, starting
with a historical perspective and including, basic
information about the different dimers, how they
synthesize, their signaling properties, and the
many diverse physiological processes in which they
are involved. In addition to presenting
information about healthy GPCR dimer activity, the
book will also include a section on their
pathology and therapeutic potentials.

The Kaleidoscope of Gender Joan Z.

Spade, Catherine G. Valentine, 2008 I have found
Spade and Valentine's *Kaleidoscope of Gender* to be
the most effective reader that I have used in my
undergraduate Sociology of Gender class, and I was
delighted to see what promises to be an even
better second edition that recently arrived. -
Linda Grant, University of Georgia In a
substantial theoretical introduction, Spade and
Valentine move their discussion forward by

introducing their kaleidoscope metaphor which is comprised of the prisms of culture...that intersect to produce patterns of difference and systems of privilege. Because it captures the fluidity and uniqueness of the intricate patterns, the kaleidoscope is a valuable analytical tool. Though it enters a terrain already littered with terminology, this prismatic understanding of gender has great potential for transforming current conceptualizations. -Jennifer Keys, North Central College Examining the elusive, evolving construct of gender in a unique text/ reader format An accessible, timely, and stimulating introduction to the sociology of gender, The Kaleidoscope of Gender: Prisms, Patterns, and Possibilities, Second Edition, provides a comprehensive analysis of key ideas, theories, and applications in this field as viewed through the metaphor of a kaleidoscope. This collection of creative articles by top scholars explains how the complex, evolving pattern of gender is constructed interpersonally, institutionally, and culturally and challenges students to question how gender shapes their daily lives. Like the prior edition, the Second Edition maintains a focus on contemporary contributions to the field while incorporating classical and theoretical arguments to provide a broad framework. Integrating a cross-cultural focus and intersectional inquiry, this unique text/reader

Developing Multi-Agent Systems with JADE Fabio Luigi Bellifemine, Giovanni Caire, Dominic Greenwood, 2007-03-13 Learn how to employ JADE to build multi-agent systems! JADE (Java Agent

DEvelopment framework) is a middleware for the development of applications, both in the mobile and fixed environment, based on the Peer-to-Peer intelligent autonomous agent approach. JADE enables developers to implement and deploy multi-agent systems, including agents running on wireless networks and limited-resource devices. Developing Multi-Agent Systems with JADE is a practical guide to using JADE. The text will give an introduction to agent technologies and the JADE Platform, before proceeding to give a comprehensive guide to programming with JADE. Basic features such as creating agents, agent tasks, agent communication, agent discovery and GUIs are covered, as well as more advanced features including ontologies and content languages, complex behaviours, interaction protocols, agent mobility, and the in-process interface. Issues such as JADE internals, running JADE agents on mobile devices, deploying a fault tolerant JADE platform, and main add-ons are also covered in depth. Developing Multi-Agent Systems with JADE: Comprehensive guide to using JADE to build multi-agent systems and agent orientated programming. Describes and explains ontologies and content language, interaction protocols and complex behaviour. Includes material on persistence, security and a semantics framework. Contains numerous examples, problems, and illustrations to enhance learning. Presents a case study demonstrating the use of JADE in practice. Offers an accompanying website with additional learning resources such as sample code, exercises and PPT-slides. This invaluable resource will

provide multi-agent systems practitioners, programmers working in the software industry with an interest on multi-agent systems as well as final year undergraduate and postgraduate students in CS and advanced networking and telecoms courses with a comprehensive guide to using JADE to employ multi agent systems. With contributions from experts in JADE and multi agent technology.

Metal and Nutrient Transporters in Abiotic Stress Aryadeep Roychoudhury, Durgesh Kumar Tripathi, Rupesh Deshmukh, 2021-04-08 Metal and Nutrient Transporters in Abiotic Stress focuses on the different forms of environmental stress related to heavy metal, metalloid and nutrient deficiency that have the potential to inflict major damages to crop plants, leading to a massive decrease in crop yield and productivity. The book presents the current state of knowledge of the biochemical and molecular regulation of several classes of membrane transporters related to the uptake of metals/metalloids and nutrient elements during different stresses and their probable mechanisms of operation in plant stress tolerance. Metal and Nutrient Transporters in Abiotic Stress provides a comprehensive discussion that will help in mitigating multiple forms of stresses utilizing transporter proteins. Edited by leading experts and written by a global team of knowledgeable contributors, this book will further stimulate research in the field of transporter proteins and will foster further interests for researchers, academicians and scientists worldwide. It is complimented by its companion book titled

Transporters and Plant Osmotic Stress. Focuses exclusively on metal and nutrient transporters involved in multiple environmental stresses in plants Explains exploiting transporters in crop improvement programs through transgenic technology against different stresses such as heavy metal, metalloid and nutrient deficiency Serves as an important source of information in the field of abiotic stress

Nonlinear Theory of Electroelastic and Magnetoelastic Interactions Luis Dorfmann, Ray W. Ogden, 2014-02-06 This book provides a unified theory on nonlinear electro-magnetomechanical interactions of soft materials capable of large elastic deformations. The authors include an overview of the basic principles of the classic theory of electromagnetism from the fundamental notions of point charges and magnetic dipoles through to distributions of charge and current in a non-deformable continuum, time-dependent electromagnetic fields and Maxwell's equations. They summarize relevant theories of continuum mechanics, required to account for the deformability of material and present a constitutive framework for the nonlinear magneto- and electroelastic interactions in a highly deformable material. The equations contained in the book formulate and solve a variety of representative boundary-value problems for both nonlinear magnetoelasticity and electroelasticity.

GaAs Devices and Circuits Michael S. Shur, 2013-11-21 GaAs devices and integrated circuits have emerged as leading contenders for ultra-high-speed applications. This book is

intended to be a reference for a rapidly growing GaAs community of researchers and graduate students. It was written over several years and parts of it were used for courses on GaAs devices and integrated circuits and on heterojunction GaAs devices developed and taught at the University of Minnesota. Many people helped me in writing this book. I would like to express my deep gratitude to Professor Lester Eastman of Cornell University, whose ideas and thoughts inspired me and helped to determine the direction of my research work for many years. I also benefited from numerous discussions with his students and associates and from the very atmosphere of the pursuit of excellence which exists in his group. I would like to thank my former and present co-workers and colleagues-Drs. Levinstein and Gelmont of the A. F. Ioffe Institute of Physics and Technology, Professor Melvin Shaw of Wayne State University, Dr. Kastalsky of Bell Communications, Professor Gary Robinson of Colorado State University, Professor Tony Valois, and Dr. Tim Drummond of Sandia Labs-for their contributions to our joint research and for valuable discussions. My special thanks to Professor Morko., for his help, his ideas, and the example set by his pioneering work. Since 1978 I have been working with engineers from Honeywell, Inc.-Drs.

Control of Structures U. Leipholz, M. Abdel-Rohman, 2012-12-06 This book is an outgrowth of several years of teaching and research of the two authors in the field of structural dynamics and control. The content of the book is based on structural dynamics, classical and modern control

theory and involves also recent developments that took place with respect to the control of systems with distributed masses. It is hoped that the book will serve the researcher and the practicing engineer in the areas of civil, mechanical and aeronautical engineering. It may also be of interest to applied mathematicians and to physicists. There is no question that the book can be used as a reference book for advanced courses in the above mentioned areas. The numerous examples will provide students with the necessary material for exercising themselves and for self studying. Thanks are due to Mrs. Cynthia Jones for preparing patiently and competently the typescript of the book. The services of Mrs. Linda Strouth, Solid Mechanics Division, University of Waterloo, rendered in producing the camera-ready copy of the book with great skill and devotion, are gratefully acknowledged. Special thanks go to Mr. Ir. Ad. C. Plaizier, at Martinus Nijhoff/Dr. W. Junk, who with much understanding and enthusiasm supervised the production of the book as Publisher. May the readers of it enjoy it, and may they have the feeling of having gained something in turning to it and using it.

Theisohn,2017-01-09 In dieser Studie wird der Zionismus nicht primär als politische Bewegung betrachtet, sondern als eine 'Kulturpoetik' verstanden und analytisch fruchtbar gemacht. Das Verhältnis von Text und Territorium, von Schrift und Land wird in eingehenden Lektüren u. a. der Werke von Schnitzler, Herzl, Kafka, Beer-Hofmann,

Buber, Levinas und Schönbergs eruiert, mit dem Ziel, den Zionismus als eine alternative Poetik der Moderne zu beschreiben.
