Japanese Culture Paul Varley,2000-03-01 For nearly three decades Japanese Culture has garnered high praise as an accurate and well-written introduction to Japanese history and culture. This widely used undergraduate text is now available in a new edition. Thoroughly updated, the fourth edition includes expanded sections on numerous topics, among which are samurai values, Zen Buddhism, the tea ceremony, Confucianism in the Tokugawa period, the story of the forty-seven ronin, Mito scholarship in the early nineteenth century, and mass culture and comics in contemporary times.

Portraits of Chōgen John M. Rosenfield,2012 This volume vividly describes the efforts of the Japanese monk Shunjōbō Chōgen (1121-1206) to restore major buildings and works of art lost in the brutal civil conflicts of the 1180s. Chōgen is best known for his role in recasting the Great Buddha (Daibutsu) at Tōdaiji in Nara, reconstructing the South Great Gate (Nandaimon), and making the famous guardian statues there. This study concentrates on these and other works of art and architecture associated with Chōgen, situating them in the turbulent political and social climate of Japan and in the larger spiritual contexts of East Asian Buddhism.

Akutō and Rural Conflict in Medieval Japan Morten Oxenboell,2018-05-31 This volume offers the first in-depth analysis in English of an understudied phenomenon in medieval Japanese history: the so-called akutō (literally, "evil bands"). Employing chronicles, laws, and legal documents from the thirteenth and fourteenth centuries, as well as recent Japanese scholarship, Morten Oxenboell examines the significance of akutō in legal proceedings to provide a nuanced understanding of how rural communities organized for and engaged in violent conflicts. He deconstructs the image of akutō as instigators of violence by underlining the significance of the term as a rhetorical device used by litigants to voice their grievances in Kamakura legal proceedings. The many instances in which akutō appear offer a clear example of the ways in which the new legal vocabulary concealed realities behind rhetorical flourishes and narratives of violence and predation. Violence was certainly a part of the negotiation for rights and privileges in the estate system, and Oxenboell demonstrates how conflicts developed and were untangled by local actors, who were rarely given a voice in sources from this period. By peeling away the rhetoric, he presents us a unique view of rural populations organizing their communities in the face of violence, whether as victims of outside aggression or as aggressors themselves against landlords or neighbors. The book therefore goes beyond the usual focus on elites in medieval Japanese history by concentrating on local mobilization schemes and strategies, which were often framed and defamed by central elites. Rural residents, who could not rely on the authorities for protection, handled their own security concerns via complex social mechanisms that tied together locals and absentee landlords in an uneasy relationship of mutual dependency. By examining the fissures in this relationship—in the form of akutō complaints—Oxenboell shows that violent activism was part of the daily management of estates and that such conflicts do not indicate an absence of order but rather a system of checks and balances that helped create a vibrant society.

The Mythic Dimension Joseph Campbell,2007 These 12 eclectic essays explore the topic for which Campbell was best known: myth and its fascinating context within the human imagination in the arts, literature, and culture, as well as in everyday life.

Court and Bakufu in Japan Jeffrey P. Mass, 1995 The Kamakura period, 1180-1333, is known as the era of Japan's first warrior government. As the essays in this book show, however, the period was notable for the coexistence of two centers of authority, the Bakufu military government at Kamakura and the civilian court in Kyoto, with the newer warrior government gradually gaining ascendancy.

Educating for Sustainability in Japan Jane Singer, Tracey Gannon, Fumiko Noguchi, Yoko Mochizuki, 2016-10-04 Educating for Sustainable Development (ESD) approaches are holistic and interdisciplinary, values-driven, participatory, multi-method, locally relevant and emphasize critical thinking and problem-solving. This book explains how ESD approaches work in the Japanese context; their effects on different stakeholders; and their ultimate potential contribution to society in Japan. It considers ESD in both formal and informal education sectors, recognizing that even when classroom learning takes place it must be place-based and predicated on a specific community context. The book explores not only 'Why ESD', but why and how ESD in Japan has gained importance in the past decade and more recently in the wake of the triple disaster of March 2011. It considers how ESD can help Japan recover and adapt to disasters and take initiative in building more resilient and sustainable communities. This volume asks the questions: What are some examples of positive contributions by ESD to sustainability in Japan? What is the role of ESD in Japan in activating people to demand and work towards change? How can schools, universities and non-governmental organizations link with communities to strengthen civic awareness and community action? After an introduction that elucidates the roots and recent promotion of ESD in Japan, part one of this volume looks at the formal education sector in Japan, while part two examines community-based education and sustainability initiatives. The latter revisits the Tohoku region five years on from the events of March 2011, to explore recovery and revitalization efforts by schools, NGOs and residents. This is an invaluable book for postgraduate students, researchers, teachers and policy makers working on ESD.

The Ancient World Sarolta Anna Takacs, Eric H. Cline, 2015-07-17 Designed to meet the curriculum needs of students from grades 7-12, this five-volume encyclopedia explores the history and civilizations of the ancient world from prehistory to approximately 1000 CE. Organized alphabetically within geographical volumes on Africa, Europe, the Americas, Southwest Asia, and Asia and the Pacific, entries cover the social, political, scientific and technological, economic, and cultural events and developments that shaped the ancient world in all areas of the globe. Each volume explores significant civilizations, personalities, cultural and social developments, and scientific achievements in its geographical area. Boxed features include Link in Time, Link in Place, Ancient Weapons, Turning Points, and Great Lives. Each volume also includes maps, timelines and illustrations; and a glossary, bibliography and indexes complete the set.

Dynamic Knowledge Interaction Toyoaki Nishida, 2000-03-23 Internet, intranets, the Web, chat rooms, E-mail, and E-business. With the advent of this widespread networking, it is clear that the nature of human interactions is changing. As communities develop based on common knowledge, connections through traditional social routes are de-emphasized. Dynamic Knowledge Interaction presents groundbreaking, inte

The Economic Aspects of the History of the Civilization of Japan Yosaburo Takekoshi, 2016-04-01 Originally published by Allen & Unwin in 1930 this 3-volume collection brings together writings on the economic aspects of Japan's history. Covering the period from the 1600s until the 1920s this work offers the reader, not only an economic history of the Japanese, but also a social and political history. By explaining the realities of daily life during the periods covered, this collection allows the economic aspects to be fully appreciated.

The Management of Mass Burn Casualties and Fire Disasters M. Masellis, S. William A. Gunn, 2007-07-23 Thermal harm is one of the most traumatizing assaults on man and his environment. Whether suffered by living beings as burn injury, or sustained by societal structures as fire damage, the resulting physical pain and material loss can be extremely distressing both to the person and to society. The health professions and in particular burn specialists have been continually developing effective means of combating burn disease and promoting rehabilitation of the victims, especially in mass casualty situations. In parallel, various levels of the community have been mobilizing fire prevention and fire-fighting mechanisms that protect society and the environment from the ever-increasing hazards of fire disasters. It is therefore surprising that, while aiming at the same objective, the two sectors have rarely come together; doctor has rarely worked with fire chief. Yet both disciplines have so much to learn from and contribute to each other's efforts. The Mediterranean Burns Club is a professional organization that brings together persons concerned with burn therapy and fire safety in all forms, especially in the countries of the Mediterranean basin. It is honoured to have been identified by the United Nations as a premier scientific body in its field within the programme of the International Decade for Natural Disaster Reduction. It is therefore natural that it should have initiated an international gathering of specialists engaged in burns as a surgical, clinical problem, and of counterparts dealing with fires as a societal, disaster management problem.
