Submarines Dr. Diana Prince, 2022-08-22 Submarines play a vital part in the military and security of several countries. From an early, rudimentary submarine prototype by Dutch inventor, Cornelius Drebbel in the late 1500's, these underwater crafts are today's part of military arsenals around the world. This book documents the use of submarines by several countries. Some countries without local manufacturing facilities for these large craft, have collaborated with other nations to obtain submarines for reconnaissance and defense. This book also documents the amazing journeys of the USS Nautilus in its underwater journey to the North Pole in 1958, and the USS Skate which later broke through the Arctic ice to surface at the North Pole.

Submarines David Ross, Chris Bishop, 2016-10-15 Submarines have changed the face of naval warfare since the first German U-boat in World War I. This heavily illustrated history charts submarines from then to now.

Viruses and Environment Edouard Kurstak, 2012-12-02 Viruses and Environment contains the proceedings of the Third International Conference on Comparative Virology, held at Mont Gabriel, Quebec, Canada on May 1977. The primary focus of the conference is the ecology of viruses, that is, the interrelationships between organisms and their environment. Organized into seven parts with a total of 33 chapters, this book centers on the impact of viruses on the environment; the persistent virus infections of man, vertebrate and invertebrate animals, and plants; and the smallest disease agents, the viroids. In particular, this book describes the reservoirs of viruses, such as arthropod vectors, water, cultivated plants,

and wild animals; safety considerations concerning the use of live virus vaccines; and the viral insecticides. The use of bacterial viruses in genetic engineering is also addressed. This treatise will be valuable to research workers in medical and biomedical fields; biological control; and animal and plant quarantine. It will also benefit the university teachers and graduate students.

Seaforth World Naval Review 2023 Conrad Waters, 2022-12-12 For over a decade this annual has provided an authoritative summary of all that has happened in the naval world in the previous twelve months, combining regional surveys with one-off major articles on noteworthy new ships and other important developments. Besides the latest warship projects, it also looks at wider issues of significance to navies, such as aviation and weaponry, and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance. As 2022 saw the outbreak of the first major European war since 1945, it is not surprising that the naval aspects of the conflict in Ukraine take center stage, with an interim assessment of the fighting so far and what can be gleaned of the strategies and tactics of the warring parties. Another newsworthy topic – hypersonic missiles – is the subject of Norman Friedman's expert analysis. Of the regular features, the 'Significant Ships' cover the US Navy's Nimitz class carriers, now representing fifty years of evolution; and HMNZS Aotearoa, the largest warship built for New Zealand. Of the Fleet Reviews, one looks at the US Navy's adaptation to the return of Great Power competition, not least with China, and the second covers the Vietnam People's Navy, which faces Chinese pressure at close quarters. Firmly established as the only annual naval overview of its type, *World Naval Review* is essential reading for anyone – whether enthusiast or professional – interested in contemporary

maritime affairs.

The World Sea Power Guide David Wragg, 2012-10-24 Compiled by the author of *Janes Air Forces of the World*, this book is a must for naval experts and enthusiasts. In one volume the reader will find the composition and details of all naval elements of a staggering 137 nations armed forces including paramilitary organizations as the US Coast Guard Service. The book starts with an introduction based on the situation today and the response of the leading maritime powers. This is an interesting period with considerable uncertainty for the Royal Navy following the Strategic Defense Review. Many other countries, including Australia and Spain are boosting their naval strength to achieve strategic reach, while piracy has become a major problem in at least four different areas of the world. In each case, the history is followed by details of current fleet sizes, composition and deployments.

The Year in Hematology J. LoBue, 2013-11-11

Military Strategy of Middle Powers Håkan Edström, Jacob Westberg, 2020-10-15 Military Strategy of Middle Powers explores to what degree twenty-first-century middle powers adjust their military strategies due to changes in the international order, such as the decline in US power. The overarching objective of the book is to explain continuity and change in the strategies of a group of middle powers during the twenty-first century. These strategies are described, compared, and explained through the lens of Realism. In order to find potential explanations for change or continuity within the cases, as well as for similarities and differences between the cases, the strategies of 11 'middle' powers are analysed (Canada, Germany, Italy, Spain, Australia, Brazil, Indonesia, South Africa, India, Japan, and South Korea). This group

of countries are considered similar in several important aspects, primarily regarding relative power capacity. When searching for potential explanations for different strategic behaviours among the middle powers, their unique regional characteristics are a key focus and, consequently, the impact of the structure and polarity, as well as the patterns of amity and enmity, of the regional context are analysed. The empirical investigation is focused on security strategies used since the terrorist attacks 9/11 2001, which was one of the first major challenges to US hegemony. This book will be of much interest to students of military and strategic studies, foreign policy, and International Relations in general.

Mobility Patterns and Experiences of the Middle Classes in a Globalizing Age Monica Laura Vazquez Maggio, 2017-05-11 The book presents insights from a mixed methodology study that examines recent mobility patterns exhibited by the middle classes. Its major contributions are two-fold: theoretically, it advances the conceptualisation of middle class migration; empirically, it analyses the migratory motivations of a relatively new Latin-American group in Australia. The accelerated insertion of the Mexican society into globalisation processes is strongly linked not only to the growing participation in migration phenomena but also to people's outflow to new destinations. Although studies of Mexican emigration are vast, research on Mexican skilled migration is scarce, and research that focuses on mobility to non-USA destinations is even scarcer. Mexicans are a relatively new addition to Australia's multicultural society, and little is known about this group's profile and why they choose to migrate to Australia. Employing a mixed methodology approach, the book provides a comprehensive portrait of migration in a new group.

Climate Change Challenge (3C) and Social-Economic-Ecological Interface-Building Sunil

Nautiyal, Ruediger Schaldach, K V Raju, Harald Kaechele, Bill Pritchard, Kottapalli Sreenivasa Rao, 2016-06-04

This book is the outcome of two International Conferences held at the ISEC in Bangalore, India: the international conference on “Climate Change and Social-Ecological-Economical Interface-Building: Modelling Approach to Exploring Potential Adaptation Strategies for Bio-resource Conservation and Livelihood Development” held during 20–21 May 2015 and jointly organized by the Centre for Ecological Economics and Natural Resources (CEENR), Institute for Social and Economic Change (ISEC) and the Centre for Environmental Systems Research (CESR), University of Kassel, Germany; and the international conference “Climate Change and Food Security – the Global and Indian Contexts,” jointly hosted by the CEENR, ISEC and the School of Geosciences, University of Sydney, on 18–19 February 2015. The selected papers presented in this book portray a broad range of international research efforts aimed at developing a deeper understanding of human-environment systems but also at translating scientific knowledge into political and societal solutions and responses to the challenge of climate change.

The Modern Weaponry of the World's Armed Forces Col. Y Udaya Chandar (Retd.), 2017-04-24 The Modern Weaponry of the World's Armed Forces is a treatise of military weaponry. It depicts about forty present-day weapon systems possessed by various nations, describing three to four weapons of each category with images, specifications, origin, development and design briefly. The weapon systems presented are almost all from the twenty-first century or the weapons presently under development. Only a very few officers in the three services know the finer distinctions between, say, cruise missile and ballistic missile, fourth generation jet fighter and fifth generation jet fighter and howitzer and a field gun. All such nuances are explained clearly. The beginning explains the 'history of military weapons' briefly and ends with information on the missile shield erected by most countries including India. The missile shield destroys the hostile incoming aircraft or missile automatically. The missile shield presented is real, exists on the ground today and not fictitious. The militaries win the war with the help of the man who stands erect in the face of the enemy fire and the weapon that is in his hands. All the students of military science must read this invaluable book about the gun in the hands of a soldier, what exactly it is and how much it matters.

The Military Balance 2012 The International Institute for Strategic Studies (IISS), 2020-03-26 The Military Balance is the International Institute for Strategic Studies annual assessment of the military capabilities and defense economics of 170 countries worldwide. It is a useful resource for those involved in security policy making, analysis and research. The book is a region-by-region analysis of the major military and economic developments.
