Victorian Social Activists' Novels Vol 4 Oliver Lovesey,2021-03-25 The writers of these novels were involved in various types of activism, using approaches ranging from conservative amelioration to radical militancy. Their works employ a broad variety of genres from the novel of manners, sensation, education and vocation, to allegory, romance and lesbian fiction. Volume 4 includes 'Mona Maclean, Medical Student (1892)'.

Goodness Michael Redhill,2005 This remarkable autobiographical play by the award-winning author of *Building Jerusalem* and *Martin Sloane*, is a Russian-doll-like play: concentric stories enveloping each other. A writer is told, in confidence, a terrible tale of murder and injustice and he promises never to repeat the story. Goodness is the writer breaking his word. Recently divorced, Michael Redhill goes to Poland to get away from his life and to do some research on the Holocaust. Thwarted by witnesses unwilling to talk, he returns home via England, but in London is introduced to someone who can tell him a 'real' story of evil. Through this reluctant witness, Redhill learns of a genocide. He encounters, through the memory of the storyteller, an alleged war criminal, about to be put on trial. But this is an old man with Alzheimer's who can no longer remember the time his crimes were allegedly committed. Has his guilt dissolved with his memory? Could he be pretending to be ill in order to escape punishment? The witness conjures for Redhill the war criminal's passionate and beautiful daughter, who will defend her father at all costs. There is also the prosecuting attorney, who has much in common with the old man whose destruction he seeks. As well as an uncomfortable attraction to his daughter. Each is drawn to the other. All is witnessed by a female prison guard - the one who tells the playwright, years later, what really happened in the quest to give a nation some closure. Everyone's story is compelling, and the ending is as unexpected as it is shocking. Who do we believe? A prison guard still wounded by history? A writer suffering from heartache? A dying war criminal? What is our responsibility? Who does memory serve? Did the past really happen? And if it did, who has a claim on it? Goodness is a play about what happens in the gaps between experiencing, telling and hearing.

A Companion to First Ladies Katherine A.S. Sibley,2016-03-02 This volume explores more than two centuries of literature on the First Ladies, from Martha Washington to Michelle Obama, providing the first historiographical overview of these important women in U.S. history. Underlines the growing scholarly appreciation of the First Ladies and the evolution of the position since the 18th century Explores the impact of these women not only on White House responsibilities, but on elections, presidential policies, social causes, and in shaping their husbands' legacies Brings the First Ladies into crisp historiographical focus, assessing how these women and their contributions have been perceived both in popular literature and scholarly debate Provides concise biographical treatments for each First Lady

Mary Lincoln Stacy Pratt McDermott,2015-01-09 One of America's most compelling First Ladies, Mary Lincoln possessed a unique vantage point on the events of her time, even as her experiences of the constraints of gender roles and the upheaval of the Civil War reflected those of many other women. The story of her life presents a microcosm through which we can understand the complex and dramatic events of the nineteenth century in the United States, including vital issues of gender, war, and the divisions between North and South. The daughter of a southern, slave-holding family, Mary Lincoln had close ties to people on both sides of the war. Her life shows how the North and South were interconnected, even as the country was riven by sectional strife. In this concise narrative, Stacy Pratt McDermott presents an evenhanded account of this complex, intelligent woman and her times. Supported by primary documents and a robust companion website, this biography introduces students to the world of nineteenth-century America, and the firsthand experiences of Americans during the Civil War.

Mrs. Abraham Lincoln W. A. Evans,2010-02-15 First published in 1932, this was the first thoroughly researched biography of Mary Lincoln ever written, and it remains the most balanced and complete work on this controversial First Lady. Author W. A. Evans challenges the disparaging views of Mary Lincoln that were generally accepted at the time, offering a comprehensive and informed look at a woman whose physical and mental health problems have often been misconstrued or overlooked by other biographers. Evans conducted extensive research, interviewing Mrs. Lincoln's family members, seeking advice and assistance from numerous Lincoln scholars and historians, scouring thousands of pages of contemporary newspapers and primary resources, reviewing correspondence Mary wrote during her stay at Bellevue Place sanitarium, and consulting with several medical experts. The result of all this research is an objective and detailed portrait of Mrs. Lincoln and her influence on her husband that still has a great deal of historical value for readers today. A new foreword by Jason Emerson, author of *The Madness of Mary Lincoln*, provides biographical information on Evans and background on the origins of the book and its reception and influence. Finally back in print, this classic biography is essential reading for all with an interest in the Lincoln family.

A History of Watauga County, North Carolina John Preston Arthur,1992-06 This well-known history of Watauga County, North Carolina, is considered one of the best ever written. From Watauga County's 'Yankee Ancestry' to its role in the Revolutionary and Civil Wars, nothing is overlooked.

A Painful Inch to Gain Eileen Crofton,2014-02-05 The battles that women had to fight to enter the medical profession have been well-documented by historians. *A Painful Inch to Gain* takes a more personal approach, focusing on the stories of individual women medical students. Drawing as far as possible on their own words, Eileen Crofton (who herself qualified as a doctor during the Second World War) looks at what made these young women want to pursue a career in medicine in the first place. They knew they faced considerable obstacles. In the face of male hostility, how could they ensure that they got as thorough a medical training as the men? And how could they pay for this training, let alone feed and clothe themselves? With no role models, how were they to conduct themselves? What should they wear? How were they to balance the demands of their profession with their expectations of love and marriage? Finally, having qualified as doctors, what was to be their role in their chosen profession?

Women In Their Element: Selected Women's Contributions To The Periodic System Lykknes Annette, Van Tiggelen Brigitte,2019-08-05 This year we celebrate the 150th anniversary of Mendeleev's first publication of

the Periodic Table of Elements. This book offers an original viewpoint on the history of the Periodic Table: a collective volume with short illustrated papers on women and their contribution to the building and the understanding of the Periodic Table and of the elements themselves.Few existing texts deal with women's contributions to the Periodic Table. A book on women's work will help make historical women chemists more visible, as well as shed light on the multifaceted character of the work on the chemical elements and their periodic relationships. Stories of female input, the editors believe, will contribute to the understanding of the nature of science, of collaboration as opposed to the traditional depiction of the lone genius.While the discovery of elements will be a natural part of this collective work, the editors aim to go beyond discovery histories. Stories of women contributors to the chemistry of the elements will also include understanding the concept of element, identifying properties, developing analytical methods, mapping the radioactive series, finding applications of elements, and the participation of women as audiences when new elements were presented at lectures.As for the selection of women, the chapters include pre-periodic table contributions as well as recent discoveries, unknown stories as well as more famous ones. The main emphasis will be on work conducted in the late 19th century and early 20th century. Furthermore, the book includes elements from different groups in the periodic table, so as to represent a variety of chemical contexts.'As with the discoveries themselves, bringing these tales of female scientists to light has taken much teamwork, including by contributors Gisela Boeck, John Hudson, Claire Murray, Jessica Wade, Mary Mark Ockerbloom, Marelene Rayner-Canham, Geoffrey Rayner-Canham, Xavier Roqué, Matt Shindell and Ignacio Suay-Matallana.Tracing women in the history of chemistry unveils a fuller picture of all the people working on scientific discoveries, from unpaid assistants and technicians to leaders of great labs. In this celebratory year of the periodic table, it is crucial to recognize how it has been built — and continues to be shaped — by these individual efforts and broad collaborations.'Nature 565, 559-561 (2019)
