International Trade of Secondhand Goods Michikazu Kojima, Shozo Sakata, 2021-09-28 This book demonstrates the flow of the international trade of secondhand goods and examines the socio-economic background and mechanisms of the trade. It highlights the actors involved in the trade of secondhand goods and how traditionally secondhand goods have largely been traded through social or ethnic networks in order to effectively transfer quality and market information. The development of information technology and emergence of new information platforms have changed these business models. The policies and regulations relating to the trade of secondhand goods are explored, alongside the negative impact of these trades, and the growing awareness of the circular economy. This book illustrates how importing countries as well as international institutions have developed regulations in order to balance these two issues. It will be relevant to students and economists interested in development economics and economics geography.

Corporate Governance in Japan Masahiko Aoki,Gregory Jackson,Hideaki

Miyajima,2007-09-06 Debates regarding corporate governance have become increasingly important in Japan as the post-war model of bank-based, stakeholder-oriented corporate governance faces the new pressures associated with globalization and growing investor demands for shareholder value. Bringing together a group of leading scholars from economics, law, sociology and management studies, this book looks at how the Japanese approach to corporate governance and the firm have changed in the post-bubble era. The contributions offer a unique empirical exploration of why and how Japanese firms are reshaping their corporate governance arrangements, leading to greater diversity among firms and new 'hybrid' forms of corporate governance. The book concludes by looking at what effect these incremental but transformative changes may have on Japan's distinctive variety of capitalism.
