When I Woke Up I Was a Hippopotamus Tom MacRae, 2014-01-01 When I woke up I was a Hippopotamus! Yawning in the morning, I raised up my sleepy head, then took one look out of the window and got straight back into bed. A little boy transforms into different creatures as his moods change throughout the day, until finally he goes a little too far and discovers his parents have transformed too!

The Opposite Tom MacRae, 2017-02-02 Nate wakes up one morning to see The Opposite sitting on his ceiling. This impish creature manages to ensure that whatever Nate says, the opposite will be true. Nate tries to fix each thing as it goes wrong, but the opposite happens! The mess he's making soon gets him into trouble and it takes some very quick thinking, and a clever twist, for Nate to be able to get rid of The Opposite once and for all.

Baby Pie Tom MacRae, 2009 Three little trolls named Oink, Boink, and Moink go out looking for a baby to make a baby pie, but they are in for a big surprise when they actually find one.

His Bloody Project Graeme Macrae Burnet, 2022-03-29 Shortlisted for the Booker Prize and an international bestseller: a brilliant meditation on truth, power, and (in)sanity. A BBC Radio 4 Book Club pick The year is 1869. A brutal triple murder in a remote community in the Scottish Highlands leads to the arrest of a young man by the name of Roderick Macrae. A memoir written by the accused makes it clear that he is guilty, but it falls to the country's finest legal and psychiatric minds to uncover what drove him to commit such merciless acts of violence. Was he insane? Only the persuasive powers of his advocate stand between Macrae and the gallows. Graeme Macrae Burnet tells an irresistible and original story about the provisional nature of truth, even when the facts seem clear. His Bloody Project is a mesmerising literary thriller set in an unforgiving landscape where the exercise of power is arbitrary.

The Lennox Legacy DE Rivett, CW Ward, LM Belkin, JAM Ramshaw, JFK Wilshire, 1996-01-01 The Lennox Legacy: The history of the CSIRO Laboratory at 343 Royal Parade Parkville records many of the events and incidents associated with the genesis and development of the Division of Protein Chemistry over a period of more than fifty years. This book has been titled in honour of Dr Francis Gordon Lennox, the Laboratory's founder and a man who believed that science has an important part to play in bettering the well-being of all Australians. His vision, over the years, of the critical importance of protein chemistry to Australian science and industry, was central to the Laboratory's national and international achievements. The book has been written three parts: *Part 1 attempts to trace the historical record of appointments and changes in research direction that have occurred in the laboratory from 1940 to the present day. *Part 2 presents a more detailed description of the major scientific activities that have been carried out in the Laboratory. It reveals how fundamental studies went hand-in-hand with applied research and thereby contributed greatly to the understanding of practical problems and their possible solution. *Part 3 provides a complete list of Patents and Publications arranged in decades for easy perusal. As former chief Gordon Crewther states in his foreword: Of necessity, the story is

incomplete, but because it records the stresses, exhilarations, frustrations, rewards, good fellowship, team spirit, irritations and humorous interludes arising from the research objectives of the Division and their accomplishment, there is something of interest for all present and past members of staff of CSIRO. The less technical sections, the occasional insights into/behind the scenes' activities, the glimpses of individual personalities, and the occasional reflections on science management, provides worthwhile reading for a more general audience.

Case Study Graeme Macrae Burnet,2022-03-29 A dazzling and darkly funny investigation into sanity, identity, and truth itself, with a page-turning, playful plot and labyrinthine layers. London, 1965. An unworldly young woman believes that a charismatic psychotherapist, Collins Braithwaite, has driven her sister to suicide. Intent on confirming her suspicions, she assumes a false identity and presents herself to him as a client, recording her experiences in a series of notebooks. But she soon finds herself drawn into a world in which she can no longer be certain of anything. Even her own character. In Case Study, Graeme Macrae Burnet presents these notebooks interspersed with his own biographical research into Collins Braithwaite. The result is a dazzling—and often wickedly humorous—meditation on the nature of sanity, identity, and truth itself, by one of the most inventive novelists writing today.

Gender and the Quest in British Science Fiction Television Tom Powers,2016-10-14 The subjects of this book constitute a significant cross section of BBC science fiction television. With such characters as the Doctor (an enigmatic time-traveling alien), Kerr Avon (a problematic rebel leader), Dave Lister (a slovenly last surviving human) and Captain Jack Harkness (a complex omnisequal immortal), these shows have both challenged and reinforced viewer expectations about the small-screen masculine hero. This book explores the construction of gendered heroic identity in the series from both production and fan perspectives. The paradoxical relationships between the producers, writers and fans of the four series are discussed. Fan fiction, criticism and videos are examined that both celebrate and criticize BBC science fiction heroes and villains.

The Human Factors of Process Safety and Worker Empowerment in the Offshore Oil Industry National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Board on Human-Systems Integration,Steering Committee on the Human Factors of Process Safety and Worker Empowerment in the Offshore Oil Industry: A Workshop,2018-07-20 Since the 2010 Deepwater Horizon blowout and oil spill, efforts to improve safety in the offshore oil industry have resulted in the adoption of new technological controls, increased promotion of safety culture, and the adoption of new data collection systems to improve both safety and performance. As an essential element of a positive safety culture, operators and regulators are increasingly integrating strategies that empower workers to participate in process safety decisions that reduce hazards and improve safety. While the human factors of personal safety have been widely studied and widely adopted in many high-risk industries, process safety – the application of engineering, design, and operative practices to address major hazard concerns – is less well understood from a human factors perspective, particularly in the offshore oil industry. The National Academies of Sciences, Engineering, and Medicine organized a workshop in January 2018 to explore best practices and lessons learned from

other high-risk, high-reliability industries for the benefit of the research community and of citizens, industry practitioners, decision makers, and officials addressing safety in the offshore oil industry. This publication summarizes the presentations and discussions from the workshop.

Steven Moffat's Doctor Who 2011 , At over 90,000 words, this is the most comprehensive guide yet published to the 2011 season of Doctor Who. This series of Doctor Who had the greatest ambition yet, as Steven Moffat created the most complex Doctor Who story arc ever. The apparent death of the Doctor in the very first episode set the groundwork for a series full of other shocks and revelations (such as River Song's identity), which ended with a return to the essential mystery that has always underpinned the programme. The format of this book is the same as the one that we laid out in our previous guide to Matt Smith's first series as the Doctor. Steven Cooper has written excellent detailed analyses of each episode, which he published online soon after each episode was broadcast, thus providing an invaluable record of how a long-standing fan reacted to each twist of the plot as it occurred. Kevin Mahoney follows Steven's analyses with his reviews, which he wrote from the perspective of having watched the entire series. This enabled Kevin to gauge exactly how Steven Moffat had put this season together, and to assess the success of his various hoodwinks and sleights of hand. There have been various controversies this series, such as Moffat's novel move to split the series in half. Then there were murmurings of discontent within fandom when the news that there might be fewer than 14 episodes in 2012 leaked out, along with the perennial erroneous tales from the newspapers about the loss of viewing figures. The cancellation of Doctor Who Confidential left some fans fearing for the future of such an expensive show in austere times. Others have gone further than this, to suggest that Doctor Who itself needs a break. However, despite some minor blips in the storytelling department in 2011, this book argues that there is still a great deal to be positive about in Doctor Who. While we haven't quite yet reached another golden age for the programme, the authors of this book believe that the potential is still very much there to achieve this.

Immersive Theatres Josephine Machon,2017-09-16 This comprehensive text is the first survey to explore the theory, history and practice of immersive theatre. Charting the rise of the immersive theatre phenomenon, Josephine Machon shares her wealth of expertise in the field of contemporary performance, inviting the reader to immerse themselves within this abundantly illustrated text. The first section of the book introduces concepts of immersion, situating them within a historical context and establishing a clear critical vocabulary for discussion. The second section then presents contributions from a wealth of immersive artists. Assuming no prior knowledge with its critical commentary, this is a rich resource for lecturers and students at all levels and internationally, including undergraduates and post-graduates, as well as practitioners and researchers of contemporary performance. This would also be an ideal text for general enthusiasts and readers with an interest in immersive theatre.

Lillian Armfield Leigh Straw,2018-03-27 An engaging account of an extraordinary, trailblazing woman - Australia's first female detective - LILLIAN ARMFIELD is also the vivid and gripping story of the origins of Sydney's organised crime underbelly. 'Special Constable' Lillian Armfield was policing Sydney's mean streets during some of the most dramatic years of crime in the city. By the late 1920s, eastern Sydney was the heartland of organised crime and the notorious turf battles known as the Razor Wars, where bloodied bodies were strewn across streets after late-night clashes between rival gangs. At first disapproved of by her male colleagues, and often working solo and undercover, Lillian investigated it all -

from runaway girls, opium dens and back-street sly grog shops to drug trafficking, rape and murder. She dealt with the infamous crime figures of the day - Tilly Devine, Kate Leigh, 'Botany May' Smith and their associates - who eventually accorded Lillian a grudging respect. Lillian Armfield's life and achievements were extraordinary. She paved the way for the women of today's police force and her amazing story is also a compelling chapter in Australian true crime history.
