About Law Tony Honore,Tony Honoré,1995 Here is an introduction to the intellectual challenges presented by law in the western secular tradition. Treating not just British law, but the whole western tradition of law, Professor Honore guides the reader through eleven topics which straddle various branches of the law, including constitutional and criminal law, property, and contracts. He also explores moral and historical aspects of the law, including a discussion of justice and the difference between civil and common law systems. The law, Honore argues, is mainly concerned with the question of obedience to authority, and establishing the situations in which obedience is required and those in which it may be waived ought to be the central concern of all legal theorists.

Stanley's Dream Jacalyn Duffin,2019-08-30 In 1964-65, an international team of thirty-eight scientists and assistants, led by Montreal physician Stanley Skoryna, sailed to the mysterious Rapa Nui (Easter Island) to conduct an unprecedented survey of its biosphere. Born of Cold War concerns about pollution, overpopulation, and conflict, and initially conceived as the first of two trips, the project was designed to document the island's status before a proposed airport would link the one thousand people living in humanity's remotest community to the rest of the world - its germs, genes, culture, and economy. Based on archival papers, diaries, photographs, and interviews with nearly twenty members of the original team, Stanley's Dream sets the expedition in its global context within the early days of ecological research and the understudied International Biological Program. Jacalyn Duffin traces the origins, the voyage, the often-complicated life within the constructed camp, the scientific preoccupations, the role of women, the resultant reports, films, and publications, and the previously unrecognized accomplishments of the project, including a goodwill tour of South America, the delivery of vaccines, and the discovery of a wonder drug. For Rapa Nui, the expedition coincided with its rebellion against the colonizing Chilean military, resulting in its first democratic election. For Canada, it reflected national optimism as the country prepared for its centennial and adopted its own flag. Ending with Duffin's own journey to the island to uncover the legacy of the study and the impact of the airport, and to elicit local memories, Stanley's Dream is an entertaining and poignant account of a long-forgotten but important Canadian-led international expedition.

Laughter in Ancient Rome Mary Beard,2024-02-13 What made the Romans laugh? Was ancient Rome a carnival, filled with practical jokes and hearty chuckles? Or was it a carefully regulated culture in which the uncontrollable excess of laughter was a force to fear--a world of wit, irony, and knowing smiles? How did Romans make sense of laughter? What role did it play in the world of the law courts, the imperial palace, or the spectacles of the arena? Laughter in Ancient Rome explores one of the most intriguing, but also trickiest, of historical subjects. Drawing on a wide range of Roman writing--from essays on rhetoric to a surviving Roman joke book--Mary Beard tracks down the giggles, smirks, and guffaws of the ancient Romans themselves. From ancient monkey business to the role of a chuckle in a culture of tyranny, she explores Roman humor from the hilarious, to the momentous, to the surprising. But she also reflects on even bigger historical questions. What kind of history of laughter can we possibly tell? Can we ever really get the Romans' jokes?

The Law of Agreement Tony Burroughs,2012-04-01 No matter who you are or what you believe, you have the power to manifest what you want in life—a dream job, wealth, love, and health. In this concise and fascinating book, Tony Burroughs shows readers how to work with the Law of Agreement to change old beliefs about money, relationships, and health issues that are holding them back. He shares stories from his years of working with people from all over the world who are practicing living intentionally bringing into their lives that which serves the higher good and discarding the rest. The Law of Agreement says that as we lend our agreement to any belief, we reinforce it and make it stronger. Alternatively, as we refrain from lending our agreement to an idea that isn't likely to give us the results we're looking for, we dilute it and weaken its power over us and over everyone else simultaneously. Burroughs offers examples and stories that show how the Law of Agreement and its partner, the Law of Adversity, work simultaneously. What happens when we don't get what we want? What is the opportunity in adversity? The Law of Agreement shows how adversity can lift us up and out of our routines and help us to reach deep inside ourselves for answers to life's hardest questions. Full of real-life stories, examples, and solutions, The Law of Agreement is a practical and world changing book.

The Codification of Jewish Law on the Cusp of Modernity Edward Fram,2022-04-28 For more than four centuries, Jewish life has been based on a code of law written by Joseph Caro, his Shulhan `aruk ['set table']. The work was an immediate best-seller because it presented the law in a clear and concise format. Caro's work, however, was methodologically problematic and was widely criticized in the first generations after its publication. In this volume, Edward Fram examines Caro's methods as well as those of two of his contemporaries, Moses Isserles and Solomon Luria. He highlights criticisms of Caro's legal thought and brings alternative methodologies to the fore. He also compares these three jurists, while placing their methods, and cases in their historical, intellectual, and religious contexts. Fram's volume ultimately explains why Caro's methodologically problematic work won the day, while more sophisticated approaches remained points of legal reference but fell short of achieving the acceptance that their authors hoped for.

Minding the Law Anthony G. AMSTERDAM,Jerome S. Bruner,Anthony G Amsterdam,2009-06-30 In this remarkable collaboration, one of the nation's leading civil rights lawyers joins forces with one of the world's foremost cultural psychologists to put American constitutional law into an American cultural context. By close readings of key Supreme Court opinions, they show how storytelling tactics and deeply rooted mythic structures shape the Court's decisions about race, family law, and the death penalty. Minding the Law explores crucial psychological processes involved in the work of lawyers and judges: deciding whether particular cases fit within a legal rule (categorizing), telling stories to justify one's claims or undercut those of an adversary (narrative), and tailoring one's language to be persuasive without appearing partisan (rhetorics). Because these processes are not unique to the law, courts' decisions cannot rest solely upon legal logic but must also depend vitally upon the underlying culture's storehouse of familiar tales of heroes and villains. But a culture's stock of stories is not changeless. Amsterdam and Bruner argue that culture itself is a dialectic constantly in progress, a conflict between the established canon and newly imagined possible worlds. They

illustrate the swings of this dialectic by a masterly analysis of the Supreme Court's race-discrimination decisions during the past century. A passionate plea for heightened consciousness about the way law is practiced and made, *Minding the Law* will be welcomed by a new generation concerned with renewing law's commitment to a humane justice. Table of Contents: 1. Invitation to a Journey 2. On Categories 3. Categorizing at the Supreme Court *Missouri v. Jenkins* and *Michael H. v. Gerald D.* 4. On Narrative 5. Narratives at Court *Prigg v. Pennsylvania* and *Freeman v. Pitts* 6. On Rhetorics 7. The Rhetorics of Death *McCleskey v. Kemp* 8. On the Dialectic of Culture 9. Race, the Court, and America's Dialectic From *Plessy* through *Brown* to *Pitts* and *Jenkins* 10. Reflections on a Voyage Appendix: Analysis of Nouns and Verbs in the *Prigg*, *Pitts*, and *Brown* Opinions Notes Table of Cases Index Reviews of this book: Amsterdam, a distinguished Supreme Court litigator, wanted to do more than share the fruits of his practical experience. He also wanted to...get students to think about thinking like a lawyer...To decode what he calls law-think, he enlisted the aid of the venerable cognitive psychologist Jerome Bruner...[and] the collaboration has resulted in [this] unusual book. --James Ryerson, *Lingua Franca* Reviews of this book: It is hard to imagine a better time for the publication of *Minding the Law*, a brilliant dissection of the court's work by two eminent scholars, law professor Anthony G. Amsterdam and cultural anthropologist Jerome Bruner...Issue by issue, case by case, Amsterdam and Bruner make mincemeat of the court's handling of the most important constitutional issue of the modern era: how to eradicate the American legacy of race discrimination, especially against blacks. --Edward Lazarus, *Los Angeles Times Book Review* Reviews of this book: This book is a gem...[Its thesis] is easily stated but remarkably unrecognized among a shockingly large number of lawyers and law professors: law is a storytelling enterprise thoroughly entrenched in culture....Whereas critical legal theorists have talked among themselves for the past two decades, Amsterdam and Bruner seek to engage all of us in a dialogue. For that, they should be applauded. --Daniel R. Williams, *New York Law Journal* Reviews of this book: In *Minding the Law*, Anthony Amsterdam and Jerome Bruner show us how the Supreme Court creates the magic of inevitability. They are angry at what they see. Their book is premised on the conviction that many of the choices made in Supreme Court opinions 'lack any justification in the text'...Their method is to analyze the text of opinions and to show how the conclusions reached do not always follow from the logic of the argument. They also show how the Court casts its rhetoric like a spell, mesmerizing its audience, and making the highly contingent shine with the light of inevitability. --Mitchell Goodman, *News and Observer* (Raleigh, North Carolina) Reviews of this book: What do controversial Supreme Court decisions and classic age-old tales of adultery, villainy, and combat have in common? Everything--at least in the eyes of [Amsterdam and Bruner]. In this substantial study, which is equal parts dense and entertaining, the authors use theoretical discussions of literary technique and myths to expose what they see as the secret intentions of Supreme Court opinions...Studying how lawyers and judges employ the various literary devices at their disposal and noting the similarities between legal thinking and classic tactics of storytelling and persuasion, they believe, can have 'astonishing consciousness-retrieving effects'...The agile minds of Amsterdam and Bruner, clearly storehouses of knowledge on a range of subjects, allow an approach that might sound far-fetched occasionally but pays dividends in the form of gained perspective--and amusement. --Elisabeth Lasch-Quinn, *Washington Times* Reviews of this book: Stories and the way judges-intentionally or not-categorize and spin them, are as responsible for legal rulings as logic and precedent, Mr. Amsterdam and Mr. Bruner said. Their novel attempt to reach into the psyche of...members of the Supreme Court is part of a growing interest in a long-neglected and cryptic subject: the psychology of judicial decision-making. --Patricia Cohen, *New York Times* Most law professors teach by the 'case method,' or say they do. In this fascinating book, Anthony Amsterdam--a lawyer--and Jerome Bruner--a psychologist--expose how limited most case 'analysis' really is, as they show how much can be learned through the close reading of the phrases, sentences, and paragraphs that constitute an opinion (or other pieces of legal writing). Reading this book will undoubtedly make one a better lawyer, and teacher of lawyers. But the book's value and interest goes far beyond the legal profession, as it analyzes the way that rhetoric--in law, politics, and beyond--creates pictures and convictions in the minds of readers and listeners. --Sanford Levinson, author of *Constitutional Faith* Tony Amsterdam, the leader in the legal campaign against the death penalty, and Jerome Bruner, who has struggled for equal justice in education for forty years, have written a guide to demystifying legal reasoning. With clarity, wit, and immense learning, they reveal the semantic tricks lawyers and judges sometimes use--consciously and unconsciously--to justify the results they want to reach. --Jack Greenberg, Professor of Law, Columbia Law School

Legal Aspects of Privatisation Bulent Seven, 2002 The main aims of this thesis are as follows: (a) To present a comprehensive analysis of the concept of privatisation its origins and limits, (b) To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective; (c) To define and analyse particularly legal issues which arise during the privatisation transactions: e.g. labour law, competition law etc.; (d) To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide guidelines for those individuals and organisations participating in the privatisation exercises. This work found out that there is no simple, internationally applicable recipe for privatisation; various legal methods and techniques can be used to privatise state owned enterprises. Because each country has different circumstances, it is impossible to provide a unique model for privatisation; each country needs to design its own model according to its circumstances. Privatisation is an essential but insufficient element for structural economic reform in the economy and society. Privatisation is not a panacea, it is not the solution to every economic and administrative problem; selling an enterprise to the private sector does not mean an end to all problems. Also privatisation is not an overnight process or a magic touch; it will be a lengthy process. Furthermore, a decision that something can be privatised does not mean that it should be privatised. In that context, privatisation is not good or bad; it is an economic and social instrument. If it is well designed it may bring substantial benefits to the economy and society. In many countries, many state owned enterprises, particularly the ones which are financially weak, have still not been privatised. This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades.

Profit and Punishment Tony Messenger, 2021-12-07 In *Profit and Punishment*, a Pulitzer Prize-winning journalist exposes the tragedy of modern-day debtors prisons, and how they destroy the lives of poor Americans swept up in a system designed to penalize the most impoverished. "Intimate, raw, and utterly scathing" — Heather Ann Thompson, Pulitzer Prize-winning author of *Blood in the Water* "Crucial evidence that the justice system is broken and has to be fixed. Please read this book." —James Patterson, #1 New York Times bestselling author As a columnist for the *St. Louis Post-Dispatch*, Tony Messenger has spent years in county and municipal courthouses documenting how poor Americans are convicted of minor crimes and then saddled with exorbitant fines and fees. If they are unable to pay, they are often sent to prison, where they are then charged a pay-to-stay bill, in a cycle that soon creates a mountain of debt that can take years to pay off. These insidious penalties are used to raise money for broken local and state budgets, often overseen by for-profit companies, and it is one of the central issues of the criminal justice reform movement. In the tradition of *Evicted* and *The New Jim Crow*, Messenger has written a call to arms, shining a light on a two-tiered system invisible to most Americans. He introduces readers to three single mothers caught up in this system: living in poverty in Missouri, Oklahoma, and South Carolina, whose lives are upended when minor offenses become monumental financial and personal catastrophes. As these women struggle to clear their debt and move on with their lives, readers meet the dogged civil rights advocates and lawmakers fighting by their side to create a more equitable and fair court of justice. In this remarkable feat of reporting, Tony Messenger exposes injustice that is agonizing and infuriating in its mundane cruelty, as he champions the rights and dignity of some of the most vulnerable Americans.

Law and the Regulators Tony Prosser, 1997 This book will, for the first time, offer a comprehensive analysis of the legal duties which apply to the regulators of privatized industries, transport, civil aviation and independent television in the United Kingdom, with detailed accounts of how these duties have been put into practice by the regulators. There is an assessment of the philosophy behind these principles, and an account of the principles which can be derived from the law of the European Union, which are relevant to regulators' work. Particular emphasis is placed on the interaction of the encouragement of competition, the encouragement of economic efficiency and the implementation of social goals such as the provision of universal public service, and the way in which these various principles interact.

Medicine and Justice Katherine D. Watson,2019-12-06 This monograph makes a major new contribution to the historiography of criminal justice in England and Wales by focusing on the intersection of the history of law and crime with medical history. It does this through the lens provided by one group of historical actors, medical professionals who gave evidence in criminal proceedings. They are the means of illuminating the developing methods and personnel associated with investigating and prosecuting crime in the eighteenth and nineteenth centuries, when two linchpins of modern society, centralised policing and the adversarial criminal trial, emerged and matured. The book is devoted to two central questions: what did medical practitioners contribute to the investigation of serious violent crime in the period 1700 to 1914, and what impact did this have on the process of criminal justice? Drawing on the details of 2,600 cases of infanticide, murder and rape which occurred in central England, Wales and London, the book offers a comparative long-term perspective on medico-legal practice – that is, what doctors actually did when they were faced with a body that had become the object of a criminal investigation. It argues that medico-legal work developed in tandem with and was shaped by the needs of two evolving processes: pre-trial investigative procedures dominated successively by coroners, magistrates and the police; and criminal trials in which lawyers moved from the periphery to the centre of courtroom proceedings. In bringing together for the first time four groups of specialists – doctors, coroners, lawyers and police officers – this study offers a new interpretation of the processes that shaped the modern criminal justice system.

Critical theory and legal autopoiesis Gunther Teubner,2019-05-10 This volume collects and revises the key essays of Gunther Teubner, one of the world’s leading sociologists of law. Written over the past twenty years, these essays examine the ‘dark side’ of functional differentiation and the prospects of societal constitutionalism as a possible remedy. Teubner's claim is that critical accounts of law and society require reformulation in the light of the sophisticated diagnoses of late modernity in the writings of Niklas Luhmann, Jacques Derrida and select examples of modernist literature. Autopoiesis, deconstruction and other post-foundational epistemological and political realities compel us to confront the fact that fundamental democratic concepts such as law and justice can no longer be based on theories of stringent argumentation or analytical philosophy. We must now approach law in terms of contingency and self-subversion rather than in terms of logical consistency and rational coherence.

Bridging Center and Periphery Lukas Lemcke,2020-03-06 Lukas Lemcke challenges the conventional understanding of the Late Roman administration as a three-tiered system by demonstrating that its hierarchy of communication was distinctly two-tiered. In so doing, he offers a new perspective on the functional and organizational structure of this administrative system and advances our understanding of the vicariate by introducing a new functional dimension and by reassessing its development during the fifth and early sixth centuries. Based on a comprehensive collection of legal, epigraphic and other literary documents to which the concept of formal communication is applied, the author explores the forms and development of administrative communication channels that facilitated the official exchange of information from Constantine to Justinian and thus reveals how emperors actively sought to regulate the centripetal and centrifugal flow of official information.

Judicial Review of Commercial Regulation Jaime Arancibia,2011-04-07 English courts have traditionally held a policy of judicial restraint towards regulatory decisions in the commercial context. This book provides a critical view of the courts' deferential attitude and advocates a more intensive form of judicial review which is more satisfactory in terms of individual justice. Addressing the issue in three parts, the orthodox common law position on judicial review is first set out, demonstrating the deferential approach of the courts and highlighting the limited scope of review in a commercial context. The regulator's expertise and institutional autonomy, and the demands of administrative efficiency, all contribute to preventing the courts from interfering with the development of regulatory policies. The book then moves on to consider how current policy appears to be inconsistent with the relevant values of English public law which protect individuals from capricious and arbitrary executive action - particularly the right of the applicant to obtain an independent assessment of the validity of the impugned decision by a court which acts as ultimate arbiter of law. Setting out an alternative model based on European human rights law, the book contends close supervision is necessary over decisions which alter or determine the operation of markets in order to reach a level of judicial control that is consistent with the requirements of fairness and reasonableness in this area and with proper respect for the rights of the parties involved. This alternative approach finds its roots in the principle of proportionality, which entails a greater judicial attenuation of administrative autonomy in order to ensure that actions do not go beyond what it is strictly necessary to achieve the desired outcome.
